No. 1034.

From

H. B. GRIGG, ESQ., M.A.,
Director of Public Instruction,
Madras,

To

THE HONORABLE E. F. WEBSTER,
Chief Secretary to Government,
Fort St. George.

SIR,

I HAVE the honor to submit the report on education in the Presidency for the official year 1883-84.

I.—GENERAL STATISTICS.

Change in statistical forms.

2. I would premise that the several statements appearing in the body of, and appendices to, this report have been framed with special reference to the instructions of the sub-committee appointed by the Government of India, when the Education Commission was sitting, to revise the statistical forms in use. The main features of the new forms are the division of schools into public and private, the treatment of each institution as a single school instead of several schools according to departments, college departments alone being kept distinct, the opening of columns in the departmental returns to show the social and economic status of pupils under instruction, and the abolition of the distinction between English and Vernacular primary schools.

Number of schools and scholars.

3. The year has been one of general progress. The number of institutions connected with the department on the 31st March 1883, according to my last report, was 17,494. This figure, however, is reduced to 16,590 if the departments of schools are thrown out as above shown. The number of schools, public and private, on the 31st March last was 16,139, which shows a diminution of 451 schools net. The decrease, it will be observed from the statement appended, is confined to vernacular lower secondary (middle) schools for boys, and primary schools for boys and the same schools for girls. The increase in the number of secondary schools for girls explains the falling off under primary schools for girls, thus showing that the diminution is an indication of advance in standard. There has been an absolute fall in the number of boys' schools, which resulted from the closing of a considerable number of evanescent primary schools in consequence of the prevalence of small-pox and other epidemics; from a reduction in the rates of grants in certain localities, chiefly in the Tinnevelly District; from restriction in the amount allotted for education by several Boards; from the elimination of small temporary schools by the revised rules—(1) article 50, requiring an average attendance in the circles of 8 pupils in the case of boys' and 4 pupils in the case of girls' schools, and in Municipalities 16 and 8 respectively; (2) article 58, requiring preference to be given to schools according to a defined order; (3) article 64, reducing the amount of grant proportionately if the school has been less than twelve months on the list;—by the careful scrutiny exercised in the selection of schools for aid, which led to the rejection of not a few ill-managed and inefficient schools, the aiding of which entailed almost useless expenditure on the State or Local or Municipal funds; and, lastly, by the temporary check caused by the raising of fees throughout the whole Presidency just before the close of the year, and also the extension of the fee system to classes of schools which had previously been excluded from the operation of the Fee notification. Notwithstanding, however, all these disturbing causes, I am glad to be able to report that there was a small increase in the number of pupils

GENERAL STATISTICS.

from 446,324 to 447,786. These figures are, I cannot doubt, far more substantial than those of preceding years, for, as pointed out last year, energetic efforts are being made each year to make the returns more reliable, which the strengthening of the inspecting staff has rendered practicable. Moreover, I hope to show later in the report that if the total numbers are gauged by the permanence of schools and their improvement in standard or quality, the advance of the year is in reality far more satisfactory than these figures alone would indicate. It is the practice of the department to impress upon all its subordinate officers that mere numerical increase, more especially in very elementary schools, is a matter of far less importance in the end than improvement in the standard of education. This policy has, I am glad to say, been followed by not a few of the Local Boards also, who are beginning to appreciate the fact that money spent on schools which do not improve is practically money thrown away, for the schools would probably exist and do the same amount of work if they received no aid from the State. The Home Government have laid down the principle that grants-in-aid are as much intended to encourage internal development in schools as the spread of elementary instruction. In Southern India the demand for the knowledge of the arts of reading, writing, and arithmetic is growing so strong that the knowledge will be obtained whether the State aids or not; but it is only by the aid and interference of the State that these arts will be taught on the most approved methods and in a manner which will lay a satisfactory foundation upon which to build the mighty structure of a truly catholic system of national education. At present, I believe our chief object should be to provide foundations which will bear all that the growing necessities of the people are likely to lay upon them.

In the following table showing the totals of schools and scholars under the different classes of institutions, pupils are, for the purpose of comparison, distinguished according to stages of education irrespective of the schools to which they are attached.

Classes of institutions.	1882-83.		1883-84.	
	Schools.	Scholars.	Schools.	Scholars.
Arts colleges	29	2,112	30	2,175
Professional colleges	3	217	3	237
Upper secondary (high) schools for boys (English)..	94	6,045	113	6,027
Lower secondary (middle) do. (do.)..	493	20,584	496	22,129
Do. (do.) do. (Vernacular)	136	619	101	477
Upper secondary (high) schools for girls (English)...	16	76	19	94
Lower secondary (middle) do. (do.) .	45	641	50	845
Do. (do.) do. (Vernacular)	46	259	64	394
Primary schools for boys	15,152	387,329	14,692	386,092
Do. for girls	526	26,670	508	27,262
Normal schools for masters	36	978	42	1,044
Do. for mistresses	4	197	8	263
Professional and technical schools	10	597	13	747
Total ...	16,590	446,324	16,139	447,786

With the exception of upper secondary schools, in which there is the slight decrease of 18 pupils due to the late publication of the Matriculation results, the decrease in the number of passes in the Middle School Examination, and the change in the fee system—and of primary schools for boys, in which there is a fall of 1,237 pupils, the causes of which have already been explained—there has been numerical progress along the whole line, notably in upper and lower secondary schools for girls, in lower secondary schools for boys, in normal schools for masters and mistresses, and in professional and technical schools. Notwithstanding the changes in classification, with the exception of lower secondary vernacular and primary schools, decreases which have already been explained, the number of institutions shows advance under each class.

Distribution of schools by districts and divisions.

4. The annexed summary shows the distribution of schools by districts and divisions. The inadequacy of the number of schools for the instruction of the population of the Presidency, amounting to thirty-one millions, was dwelt on in my last report. The

GENERAL STATISTICS.

remarks then made might be again repeated with little modification. Improvement, however, has been made in the standard of education; but with the limited funds at the disposal of the State it is to be feared that this process of improvement will absorb the balance of the funds available for education and leave but little in most districts for encouraging the opening of new schools. The introduction, however, of the new Local Self-Government Acts will, I trust, tend to promote the spirit of self-help and economy in the distribution of the small funds available, but there can be no question that financial limitations must check the rapid spread of knowledge amongst the people, notwithstanding the growing demand for instruction according to western methods in the first essentials of all knowledge—the arts of reading, writing, and ciphering.

Districts and divisions.	Area in square miles.	Population as per census return of 1881.	Number of pupils, 1881-82.	1882-83.		1883-84.		Increase.		Decrease

Total ...	139,191	30,868,504	393,683	16,590	446,324	16,139	447,786	347	14,950	798	13,488

Great variations will be noticed under schools, or scholars, or both, in almost all the districts. The decrease under schools, however, is more or less nominal, I have added a column to the statement showing the number of pupils in each district in 1881-82. It will be observed that in every case the numbers are greater, and in most cases much greater, than in that year, even in districts which show slight decline in the past year. As regards this year, 7 districts show increase in schools and scholars, 2 districts increase in schools and decrease in scholars, 5 districts decrease in schools and increase in scholars, and the remaining 8 districts decrease in both schools and scholars. Three districts (Kistna, Bellary and Cuddapah) out of 5 in the second division advanced in schools and scholars, the increase in schools in Kistna showing the highest figure in the Presidency, and that in scholars in the same district being the highest, Malabar and Madura excepted. Ganjam and Godávari show a fall in both schools and scholars, owing, apart from the general causes already indicated, to the closing of certain schools

GENERAL STATISTICS.

for want of funds. Thirty per cent. of the total decrease in schools and 40 per cent. in that of pupils appertain to Tinnevelly. In this district the special causes at work, beyond the general, were the difficulties connected with vaccination and the inadequacy of the subordinate inspecting agency.

Taking schools and scholars by divisions, it will be observed that as regards schools, the second and seventh divisions show an increase, while the other five divisions show a decrease. In three divisions—first, third and fifth—the number of scholars has fallen. The sixth division has the largest increase in pupils, though the number of schools has fallen by 14. The average attendance of each school has risen from 27 to 28. This increase is very satisfactory as evidencing the gradual expansion of permanent schools. The average, however, has no doubt also been raised by the elimination of petty schools under article 50, the multiplication of which is frequently a serious impediment to the development of existing institutions. The increased average would have been considerably larger but for the operation of some of the restrictive causes above mentioned. Four years ago the average attendance was 25.

Unaided institutions, including private schools	5,987	119,797	5,568	113,754
Total ...	16,590	446,324	16,139	447,786

Under departmental schools there was a falling off of 1 school and 1,639 pupils. This is due to the transfer to the Municipalities of 14 Government middle schools under G.O. No. 1768, 17th August 1883, the abolition of the Periyakulam and Polláchi schools, the establishment of 5 elementary schools in the Upper Godávari district, and the opening of a few girls' schools. The large decrease in pupils is the result of the transfer from the department of well-attended middle schools and the abolition of middle and primary departments of second-grade colleges. The new schools, on the other hand, from their character have naturally at present a small attendance. The Board schools have risen in number and include all the middle schools transferred to them. The attendance has, however, slightly fallen. There has been considerable advance in the strength of "aided" institutions, though the schools were fewer than in 1882-83. Under "unaided" schools, under which private schools are included, there was a fall both in schools and scholars. This decline was partly due to the gradual passage of schools of this class into the aided list, and also the general causes already noted affecting all schools. The fact that more than one-third of the schools connected with the department are unaided strikingly illustrates the inadequacy of the financial means available for the rapid development of education, for if this vast number passed within a short period into the list of institutions making demands for aid on the State, there can be little question that the demands would not be complied with without serious disturbance in the financial position of the Presidency.

Seventh do.	959,514	8,589	9,953	112	96

It will be observed that the population per pupil ranged from 15 (Madras) to 124 (Vizagapatam) against 15 (Madras) to 131 (Cuddapah). In other words, boys and girls taken together, in Madras 2 children out of every 7 were at school, whilst in the least advanced, Vizagapatam, only 1 child in 20 was at school. Fluctuations will be noticed in the order of districts. Madras, Tinnevelly, Nílgiri, South Arcot and North Arcot retained their position; 8 districts lost one place and 2 districts two places each, while 5 districts gained one place, 1 district two places, and 1, South Canara, five places. The increase noticeable in Canara has resulted probably from several causes: the interest taken in education by the Local Board, the strengthening of the inspecting agency, and the transfer of the charge of the district to an officer who is able to devote more attention to its wants than was possible when Canara formed a portion of the large sixth division.

Viewing pupils by divisions, the population per pupil ranged from 48 (third division) to 96 (seventh division) against 48 (third division) to 112 (seventh division), a change which indicates advance in the most backward, but stationariness numerically in the most advanced division. On this subject Mr. Garthwaite remarks :—

On the whole the proportion of the population per pupil has increased slightly, but only in Chingleput and Nellore, not in Madras. In no case, however, as far as I am aware, have really useful schools been closed. The slight decrease in the number of scholars will soon be got over, and even now compensation is found in some improvement in the instruction. The very low educational position of Nellore deserves the serious attention of the Local Fund Board of that district. To me it appears that the only effectual remedy lies in the direction of increased agency for training the existing schoolmasters, especially the younger generation of them. Trained men always have larger schools and better ones. I am unable to account for the educational backwardness of Nellore, not being intimately enough acquainted with the educational history of the district, but, as far as I can ascertain, the main difficulty has been in getting a supply of good teachers. Had secondary and primary normal schools been established in Nellore at the same period they were in Malabar, Nellore might perhaps have

been in educational matters as comparatively advanced as that district, especially if an Inspector had had his head-quarters in the district. GENERAL STATISTICS.

The first division, which took place above the second in the previous year, lost it during the year under review owing to a fall in the number of pupils in the Ganjam and Godávari districts.

Education in relation to male and female population.

8. In the above statement, however, male and female population and the number of boys and girls under instruction have not been distinguished. The annexed table gives the percentages under instruction in each district and division. The percentage under boys ranged from 10 to 64 and that under girls from ·4 to 23. The proportion of male population to one boy was 38 and that of female population to one girl was 328. Seven districts have more than a fifth of their boys of school-going age under instruction, while 4 districts have only one-twentieth of their girls of school-age at school. Although the number of girls at school is still only 2 per cent. of the girls of school-age, still the year shows an advance of 9 per cent., *i.e.*, the number has risen from 43,671 to 47,550. In 1874-75 there were only 19,582 girls in schools connected with the department, so that the number has increased by 150 per cent. in the course of ten years. Even at the close of 1879-80 there were only 29,282 girls at schools. In the order of progress, Madras stands first with nearly 1 girl out of 4 at school; then follow the Nílgiris, in which the position is peculiar in consequence of the Lawrence Asylum; next comes Tinnevelly with 1 girl in 20 at school; then Godávari, Kistna and Malabar follow with 1 girl in 33 at school, whilst Cuddapah and Anantapur close the list with only 1 girl in 300 under instruction. Owing to the shorter school-life of girls as compared with boys, the number of girls becoming what is termed in the Census reports "instructed" each year contrasts much more favorably with that of boys than the proportion of 2 per cent. to 17 per cent. would indicate, but there are at present no data on which to base any accurate opinion on the subject.

Educational condition of the great classes of the population.

9. Statement I in appendix to the report gives particulars as to the percentages of pupils under instruction to the total population of school-going age in each district and under each great class of the population, calculated according to the figures of the last census (1881). Hindus are exhibited under three heads—Brahmans, Vaisyas with Sudras, and other Hindus including Paraiyas—with a view to note the progress made by the chief sections of this class of the community. The following is a summary of the statement:—

GENERAL STATISTICS.

Classes.	Population of school-going age.		Pupils under instruction.		Percentage.	
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.
Europeans and Eurasians	2,745	2,165	3,441	2,898	125	134
Native Christians	48,791	51,254	25,683	10,892	52	21
Muhammadans	142,249	146,444	29,456	1,939	21	1·3
Hindus—Brahmans	82,667	84,243	61,901	6,207	75	7·4
Hindus—Vaisyas and Sudras	1,364,712	1,392,866	257,351	23,118	19	1·7
Hindus—Others	648,212	659,684	20,653	2,215	3	·3
Others	2,209	2,035	1,751	281	79	14
Total ...	2,291,585	2,338,691	400,236	47,550	17·5	2·0

The attendance on the whole but slightly differs from that of the previous year. The percentage of boys decreased by ·1, while that of girls increased by the same figure; but whilst the proportionate decrease under boys was merely nominal, being only as 1 to 176, the proportionate increase under girls was tangible, being as 1 to 19, or more than 5 per cent. Taking the sum of males and females instructed as per census of 1881, and the males and females under instruction as per returns for 1883-84—but not allowing for deaths among instructed, which, if made, would not materially affect the figures, considering the average age of instructed persons in the present backward condition of the country—it will be observed that out of a male population of 15,278,233, or if boys below 6 years be deducted, 14,061,520, 1,915,297 were either instructed or receiving instruction, while out of a female population of 15,590,271, or if girls under 6 years be deducted, 14,354,123, only 141,563 come under that category. These figures, after deducting children too young for school, show that 6 out of 7 males and 100 out of 101 females, of all classes, are still illiterate. As, however, the average school-life extends probably over considerably less than half the period from 6 to 13 years taken as the school-going age, it follows that annually about one-third of pupils under instruction pass to swell the ranks of the instructed. At this rate, even assuming the number of boys at school to remain unaltered, and the population to increase at a rate of about 1 per cent. annually, in ten years the instructed male population should have increased to about 3,000,000 and in a generation to 4,000,000. In other words, if the proportion of boys at school to total male population remained unchanged during this period, at the close of a generation one male of every three over 6 years of age should be able to read, write and cipher more or less efficiently. But as there is much reason to hope that the attendance in school may double in ten years, it is not, perhaps, an oversanguine expectation that the above result will be achieved by the close of the present century. Between 1871 and 1881 the advance was about 40 per cent.; that now estimated approximates 50 per cent. What the rate of progress among women will be it is impossible to foretell with any approximation to the possible outcome, but if the growing change in Native opinion receives no unexpected check, I am disposed to think that the numbers will have risen tenfold, that is, the close of the century will find the education of girls, numerically, in the position now held by that of boys. The above remarks refer only to numerical extension; but, viewed in connection with the quality and standard of knowledge, the advance should be very far greater than that above opined.

I proceed to remark on the educational condition of each section of the population as noticed in the summary.

Europeans and Eurasians.—There was a slight advance in the number of pupils under instruction. The percentage of boys and girls to children of school-going age rose from 123 and 127 to 125 and 134 respectively. The advance is probably due not so much to increased admissions as to fewer withdrawals in consequence of the desire of parents to give their children a superior education. If the desire continues unabated, the percentage should rise to 150, but will probably not go much higher; the result of which would virtually be that every Eurasian from 6 to 16 years of age would be at school. Thirteen districts show an increase in numbers, while in the remaining districts, including Madras, the numbers either

remained stationary or fell slightly, the fluctuations in certain cases being accounted for by the movements of parents from one district to another. It is noticeable that the city of Madras is credited with 1,993 boys and 1,882 girls, that is, 58 per cent. of the boys and 63 per cent. of the girls in the whole Presidency. The number of children at schools exceeded in some cases the number of pupils of school-age, for reasons explained in my last report.

The committee, of which I was President, appointed to consider whether the Bengal Code, on the education of European and Eurasian children, would be adopted in this Presidency with any modifications, held several meetings during the year, but did not complete their deliberations and submit their final recommendations before the close of the official year. The changes which they proposed to introduce into the Grant-in-Aid Code to afford substantial aid to schools maintained for European and Eurasian children and to improve the instruction given therein—proposals which have lately been approved by Government—will be more appropriately noticed in the report for the current year.

Native Christians.—The percentage of Native Christian children under instruction to the population of school-going age fell from 58 to 52 under boys, but increased from 19 to 21 under girls. From these figures, however, it cannot be concluded that the education of Native Christian boys received any check during the year throughout the Presidency. No less than fifteen districts show more or less improvement in attendance, and the fall in the remaining districts was slight, save in Tinnevelly. In this district the grants for institutions maintained for Native Christians and mission as well as for non-mission schools were reduced by the Board in 1883-84. This fact partially accounts for the closing of several schools and for the consequent diminution in numbers. The number of Native Christian girls, as shown above, improved, Tinnevelly and most other districts showing an increase. In the case of girls' schools no change was made in the rate of grant.

Muhammadans.—There was a satisfactory increase in the number of Muhammadan boys (2,059) and girls (545) under instruction. In the past five years the number of Muhammadans in schools connected with the department has almost doubled (31,419 against 16,576). The percentage of pupils to children of school-age rose by 2 per cent. in the case of boys and ·6 in the case of girls, the latter showing relatively a far greater advance. Five years ago there were only 381 Muhammadan girls against 1,963—a figure which there is good reason to suppose is much below the actual advance, as several girls' schools for Muhammadans are not as yet under inspection. These increases are very encouraging.

Hindus—Brahmans.—The statistics relating to the education of Brahmans have been separately prepared for the first time. Seventy-five per cent. of boys and 7·4 per cent. of girls of school-going age were at schools at the close of the year. These figures are highly creditable to the energy and liberal-mindedness of the Brahman community. It must, however, be borne in mind that the percentage is raised by the fact that, as a class, Brahmans continue their studies to a far later age than probably any community, Europeans excepted. The percentage of girls is still low, although third in order. Advance, however, will probably be very rapid in the course of the next few years. Moreover, I have reason to think that this class, more than any other, teaches its girls to read and write at home.

Hindus—Vaisyas and Sudras.—Taking Vaisyas and Sudras together, it will be observed that 19 per cent. of the male and 1·7 per cent. of the female population of school-going age are actually under instruction. These percentages compare very closely with those relating to Muhammadans. The fact that such a vast proportion of the Sudras are engaged in agriculture may be taken to account for their comparative backwardness. Their progress mainly depends upon the action of Local Boards.

Hindus—Others.—The percentages under other Hindus, including Paraiyas, are, as may be expected, very low. Special measures seem called for to encourage the education of Paraiyas. During the year changes were made in the Code favorable to backward races, but I am now considering how far it is practicable to advise the extension of those measures to Paraiyas. The difficulty is mainly one of money as their numbers are so very large, but progress will necessarily be slow.

GENERAL STATISTICS.

Others.—No special remarks are called for regarding the education of the minor sections of the population included under this head. Paraiyas were shown under this class in last year's returns. But advantage was taken of the revision of the statistical tables to exhibit them under Hindus, the head to which they more properly belong, and under which they are classed in the Census returns.

Of the 14,594 public primary schools (proper) in the Presidency at the close of the year, 13,119 were chiefly intended for Hindus, 19 for Europeans and Eurasians, 1,152 for Native Christians, and 304 for Muhammadans.

Distribution of pupils in colleges and schools for general education.

10. Statement No. II in appendix gives the distribution of pupils in colleges and schools for general education, departments not being distinguished. Native Christians, Muhammadans and Hindus in colleges show an increase, while the number of Europeans and Eurasians fell from 51 to 43, the decrease appertaining to Madras. The difference between the number of Brahman pupils reading respectively in the secondary and primary schools compared with that of Native Christian, Muhammadan, Vaisya and Sudra pupils in the corresponding schools is very striking, the proportion in the case of Brahmans alone being relatively satisfactory in the several departments.

Distribution of pupils according to wealth.

11. The statement in the margin gives the distribution of pupils according to wealth. Pupils whose parents or guardians are in receipt of Rs. 5,000 or upwards a year are entered under "Richer" classes, those whose parents draw an income of Rs. 200 and upwards but less than Rs. 5,000 a year are entered under "Middle" classes, and those whose parents draw an annual income of less than Rs. 200 are entered under "Poorer" classes. It will be observed that more than 80 per cent. of the pupils in all schools taken together were returned as belonging to the poorer classes and 19 per cent. to the middle classes, while less than 1 per cent. belonged to the richer classes. It is also noticeable that while ·7 per cent. and 18 per cent. respectively of male pupils belonged to the richer and middle classes, 1 per cent. and 22 per cent. of female pupils appertained to these heads. I have, however, no great faith in the returns under the richer and middle classes, more especially the former. The children of "richer" officials alone in schools should considerably exceed 3,500. Possibly this number multiplied by 3 would show a nearer approximation to the truth.

Pupils.	Richer classes	Middle classes.	Poorer classes.
Boys	2,948	72,606	3,24,682
Girls	509	10,636	36,405
Total ...	3,457	83,242	361,087

Distribution of pupils according to the occupation of parents or guardians.

12. A summary of pupils, classified according to the chief occupation of their parents or guardians, is given in the margin. The entry against others represents the pupils, the occupation of whose parents cannot be ascertained. Landholders, who form the bulk of the population, necessarily contributed a much larger number of pupils than others. Traders come next. The number of artizans is more satisfactory than might have been expected, although, according to the estimate in the Census, not one artizan boy in 12 of school-age is receiving instruction. Such pupils, however, are chiefly in primary schools. Every effort must be made to advance the knowledge of this class of the population if the industrial progress of the country is to be rapidly pushed forward. It is a noteworthy feature that while 14 per cent. of the male pupils were children of officials or petty officials and menial servants, these classes contributed 24 per cent. of female pupils. The small proportion of girls of the landholders' class shows that female education is especially backward in rural tracts.

Occupation.	Boys.	Girls	Total.
Officials	16,704	5,117	21,821
Petty officials and menial servants ...	39,702	6,438	46,140
Traders ..	66,299	6,803	73,102
Landholders ...	182,068	14,282	196,350
Artizans .	25,946	3,771	29,717
Coolies .	45,242	5,516	50,758
Mendicants .	5,711	1,065	6,776
Others ..	18,564	4,558	23,122
Total ...	400,236	47,550	447,786

On the subject of the education of artizans Mr. Garthwaite has the following suggestive remarks :—

The children of "artizans" form only 6 per cent. of the attendance. In a recent inspection report I remarked as follows :—

The absence of children of the artizan class from nearly all Madras schools is much to be regretted, but will continue as long as the present faulty system of teaching English continues, by which boys remain years at school without acquiring that practical command over the language which might under proper methods be communicated within a comparatively short period. So too, to some extent, as regards a knowledge of accounts and ability in vernacular business letters and other documents. These are the subjects in which practical knowledge would be useful to Madras artizans, and which the more intelligent of them would be glad to send their boys to school for, if they were certain that they could get it, and get it within a short time. But they are certain of the reverse, and hence very sensibly prefer to keep their boys at home, working at something useful, viz., their own trade. The encouragement required to be given to the artizan class to send their children to school seems to me to be entirely in the above direction; I see no other.

Race and sex of pupils.

13. The race and sex of pupils are compared below with the figures of the previous year :—

Race.	1882-83.			1883-84.			Population.	Proportion of population to one pupil.	
	Boys.	Girls.	Total.	Boys.	Girls.	Total.		1882-83.	1883-84.
Hindus	338,257	28,798	367,055	339,905	31,540	371,445	27,027,110	73	72
Native Christians .. .	28,465	9,983	38,448	25,683	10,892	36,575	666,967	17	18
Muhammadans	27,397	1,418	28,815	29,456	1,939	31,395	1,924,625	67	61
Europeans and Eurasians ...	3,381	2,755	6,136	3,441	2,898	6,339	32,733	5	5
Others	5,153	717	5,870	1,751	281	2,032	1,217,069	207	599
Total ..	402,653	43,671	446,324	400,236	47,550	447,786	30,868,504	69·2	68·9

The proportion of population to one pupil improved under "Hindus," "Muhammadans," and "Europeans and Eurasians," notably under "Muhammadans." Owing to a diminution in the number of Native Christians, as elsewhere explained, the proportion under this head rose from 17 to 18. The proportion under "Others" shows great variation, but this was the result of the inclusion of Paraiyas under Hindus in the figures of 1883-84.

Languages studied by pupils.

14. In the margin will be found a summary of the languages—English, vernacular, and classical—studied by pupils. Advantage was taken of the revision of statistical forms to obtain information regarding the number of pupils studying the different South Indian vernaculars. An increase will be noticed in the number of boys reading the different languages, Persian excepted, and this was probably due to a larger number of pupils having taken up Arabic. The large increase under Arabic seems to be due to increasing tendency of indigenous Muhammadan schools to connect themselves with the department. There was a fall in the number of girls studying Sanskrit and Persian. In regard to other languages, the number of girls shows increase. No comparison can be made as regards pupils bringing up the vernaculars, no information being available for 1882-83. The number of pupils studying the chief vernaculars—Tamil, Telugu, Malayalam, Canarese, Hindustani and Uriya languages—is compared below with the number of persons whose mother-tongue is one of these languages according to the Census of 1881 :—

Languages.	Boys.		Girls.	
	1882-83.	1883-84.	1882-83.	1883-84.
English	68,045	70,834	4,489	4,732
Sanskrit	4,426	4,671	31	7
Arabic	1,484	3,231	81	393
Persian	904	673	111	5
Latin	906	1,018	16	20
Greek	18	20	...	..
Tamil	395,781	193,955	40,555	22,074
Telugu		125,633		15,020
Malayalam		36,030		5,364
Canarese		17,729		1,153
Hindustani		5,555		795
Uriya		14,322		207
Tulu		194		82

GENERAL STATISTICS.

Language.	Persons (in thousands).	Pupils (in thousands).
Tamil	12,091	216
Telugu	11,745	141
Malayalam	2,366	41
Canarese	1,296	11
Hindustani	694	5
Uriya	1,020	14

This statement is of peculiar value, as hitherto no estimate has been attempted of the relative advance of the great race divisions, as defined by languages, of the Presidency. It will be observed that the Tamils head the list, though but slightly in advance of the Malayalis. The Uriyas stand third, an unexpected position. The Canarese people are the most backward. Not one-sixth of the Muhammadan pupils study Hindustani. In fact, if due allowance be made for this fact, it will probably be found that the Muhammadans, excluding Mappilas, take the highest instead of the last place. This fact is brought out in the Census returns, for out of 1,924,000 Muhammadans, only 693,000 are returned as learning Hindustani as their mother-tongue. About 650,000 speak Malayalam, so that practically, as the number speaking Hindustani is almost identical with that of those who have it for their mother-tongue, only one Muhammadan in three talks Hindustani as his vernacular. Of these, only one in two requires his child to be taught Hindustani. These facts explain the indifference of Muhammadans as regards special Hindustani schools for their race.

Vaccination.

15. Information was also obtained on this occasion regarding the number of pupils on the 31st March who were unprotected from small-pox. From the summary given in the margin, it will be observed that out of 447,786 pupils in schools furnishing returns, 73,014 pupils or 16 per cent. only were neither vaccinated nor marked with small-pox. The percentage is small, considering that in some places the rule that vaccination is a condition of aid under the results grants system is not in force. The bulk of the unprotected children appertains to primary schools. The proportionate percentage of unprotected girls was greater than that of unprotected boys.

—	Unprotected boys.	Unprotected girls.
Colleges	49	...
Secondary schools ...	4,265	1,005
Primary schools ...	59,456	8,212
Special schools	25	2
Total ...	63,795	9,219

Schools and scholars in Municipalities and Local Fund Circles.

16. The number of schools and scholars in Municipalities and Local Fund circles is given in the margin. There was a decrease in the number of schools in Municipalities as well as in circles, but the decrease in Municipalities, viz., 27 schools, was nominal. On the other hand, the number of pupils in Municipalities rose from 102,166 to 105,801, or by 3,635, while that in rural circles diminished by 2,173. The advance made by the Municipalities is encouraging. During the year the responsibilities of Municipalities in regard to education had greatly increased, but the change, so far as can at present be judged, was advantageous to the progress of education.

Municipalities and Local Fund Circles.	1882-83.		1883-84.	
	Schools.	Scholars.	Schools.	Scholars.
In Municipalities ...	1,812	102,166	1,785	105,801
In Local Fund Circles ...	14,778	344,158	14,351	341,985

Comparing the number of schools and scholars in each Municipality, as given in Statement III in appendix, with the figures of 1882-83, it will be observed that there was general improvement in numbers. There were 36 Municipalities against 33 in the preceding year, in which the pupils exceeded 1,000. Eight Municipalities against 7 in the previous year had more than 90 per cent. of the children of school-going age at school, and in two instances—Ongole and Dindigul—the number of pupils actually under instruction exceeded the number of children of school-age. Allowance should, however, be made in the case of these as well as in that of all other Municipalities for pupils belonging to rural circles reading in schools within

municipal limits. The total number of boys under instruction rose from 65·1 to 66·9. Under girls also there was an improvement in attendance from 14·6 to 15·6. There were only 14 towns, against 21 last year, in which less than 10 per cent. of girls of school-age were at school, and in 11 Municipalities more than 25 per cent. of the girls were attending school. It is noticeable that, while in all the Municipalities, Palamcottah and Tuticorin excepted, in the fifth division, comprising the districts of Tanjore, Madura and Tinnevelly, the education of boys has greatly developed, less than 15 per cent. of the girls were under instruction. The placing of all the girls' schools in the districts concerned under the charge of the Inspectress of Girls' Schools, with a separate deputy to assist her, will, I trust, with other causes at work, ere long bring about an improvement in this direction.

School fees.

17. The subjoined table exhibits the income derived from fees during the last ten years :—

Years.	Government institutions.		Institutions under the management of Local Fund Boards and Municipalities and of committees under the control of Government.		Public institutions under private management and private institutions.		Total.	
	Attendance on 31st March.	School fees.	Attendance on 31st March.	School fees.	Attendance on 31st March.	School fees.	Attendance on 31st March.	School fees.
		RS.		RS.		RS.		RS.
1874-75	10,675	1,13,378	19,292	22,072	225,770	5,37,150	255,737	6,72,600
1875-76	11,100	1,22,552	26,808	30,001	246,572	5,53,167	284,480	7,05,720
1876-77	10,317	1,22,422	33,009	36,431	244,622	5,45,237	287,948	7,04,090
1877-78	10,993	1,22,068	26,903	30,160	217,913	4,69,747	255,809	6,21,975
1878-79	11,279	1,33,921	29,688	34,189	196,871	4,80,193	237,838	6,48,303
1879-80	11,304	1,32,810	39,765	40,318	217,310	5,18,599	268,379	6,91,727
1880-81	11,668	1,42,488	39,548	40,804	276,592	6,40,022	327,808	8,23,314
1881-82	12,141	1,47,576	43,585	47,349	337,957	7,50,580	393,683	9,45,505
1882-83	11,936	1,62,299	48,507	58,626	385,881	8,22,687	446,324	10,43,612
1883-84	10,297	1,77,040	48,225	86,826	389,264	8,93,763	447,786	11,57,629

There was on the whole an increase of Rs. 1,14,017, or more than 10 per cent. in the income from this source, in spite of the reduction in the number of schools and diminution in the number of male pupils, female pupils generally paying little or no fees for schooling at present. This increase, which I consider highly creditable to the middle classes of the country, indicating as it does the strength of their desire for knowledge by the surest of all tests, that of money-value, is to be attributed mainly, perhaps, to the introduction of the new scheme of fees from 1st January 1884, but also partly to the prior determination of some Local Boards to levy fees in their schools, to the large increase in the attendance in middle classes, to the improved attendance in good and well-established schools, to the growing feeling that the well-to-do classes should pay the approximate cost of their children's education, and also to the new provision of the Grant-in-aid Code, which gives preference to schools in which regular fees are levied. There has been an increase of 72 per cent. in the fee-revenue on the whole during the decade, and of nearly three and a-half lakhs during the past four years. The people now pay for education a sum which exceeds the total proceeds of taxation in mofussil Municipalities and which is about one-sixth of the total land-cess of the Presidency. The increase, it will be noticed, extended to all classes of institutions. In Government schools the increase amounted to 9 per cent., though the Government middle schools in Municipalities were handed over to those bodies with financial effect from 1st April 1883 and the lower classes of certain schools were abolished—notably the middle and primary departments of second-grade colleges—with effect from 1st January 1884. In the case of Board schools the increase amounted to 50 per cent. This very great increase was the result of the transfer of middle and primary schools in Municipalities to these bodies and the levying of fees in all schools in the Godávari and other districts, where no fees were previously charged. Further improvement will be noticed in my next report as the scale of fees in Board schools in rural circles has been only recently raised. The increase in the case of aided

GENERAL STATISTICS.

and unaided public schools under private management and in private schools was 8 per cent. over the figures of 1882-83. Of the amount shown under this head, Rs. 6,78,953, or three-fourths, appertained to aided public institutions. There is, I think, reason for the expectation that the fee-revenue of the current year will approximate thirteen lakhs, or nearly double the sum paid by the people for instruction in 1879-80.

Mr. Monro remarks as follows regarding the increase in the fee-revenue in his division :—

The increase in the amount of fees levied is 14 per cent., whilst the increase in the attendance is only 6 per cent. This is satisfactory as refuting the anticipations of some managers of schools who predicted disaster from the enhanced rates. The opposition has now calmed down, managers having realized the full benefit of punctual payments and the check of migration. The new scheme is, I think, a step in the right direction, if for no other reason than that it will cause people to estimate education at a greater value and admit of higher salaries being paid to teachers, thereby raising the profession of teaching in dignity. The unwillingness of parents to pay for so valuable a thing as the education of their children seems to be of some antiquity.

"Res nulla minoris
Constabit patri quam filius."

No amount of money is grudged for marriage feasts, pilgrimages and the like, but in the matter of education, though the demand for it is strong enough, the reluctance to pay for it is difficult to overcome—*Nosse veluit omnis, mercedem solvere nemo.* It is this that probably accounts for the proverbial poverty of the "pedagogue" and the low position he has generally occupied in public estimation. An increase of pay means, in this country at least, a rise in social position.

The raising of the status of the teacher will, I am inclined to think, contribute as much as normal training to improve the quality of the teaching. No amount of normal training will make a man a good teacher if he takes no pride in his profession.

The variation in the fee-revenue of primary schools in different districts having attracted my attention, I have had the following return prepared, from which two things especially may be inferred; first, that the returns from primary schools in rural tracts probably greatly understate the revenue from fees; second, that the fees paid hitherto in districts in which Boards have directly provided schools are unduly low. As regard the former, it is unreasonable to suppose that the average remuneration of a teacher, exclusive of grant, does not exceed Rs. 2-4-0, or, with grant, Rs. 5. I should be inclined to estimate the average remuneration of a village teacher, exclusive of grant, at about Rs. 5, and, with grant, Rs. 8. As regards the second point, I have only to draw attention to Ganjam as compared with Vizagapatam, or the Godávari as compared with the Kistna, or of Coimbatore compared with a rich district like Malabar.

District.	Number of institutions.	Average number on the rolls.	Revenue from fees.	Average from each school.

Primary schools for boys. — Under the management of the Boards	...	2,22,070	38,480	17·3	0 5 7					

The percentage of fees in the college departments of Government colleges was 29·1 against 24·3 in the same departments of aided colleges, and the percentages in the school departments of the respective classes of institutions were 58·6 and 56·4. Taking both the departments, however, it will be observed that 36·2 per cent. of the cost of Government colleges was met from fees, while 40·2 per cent. was so met in aided colleges.

The cost to Government of educating each pupil in the college and school departments of their own colleges was Rs. 160-11-8 and Rs. 24-12-3 respectively, while the figure stood as Rs. 34-2-0 and Rs. 4-12-1 in aided institutions. Taking the colleges and school departments together, each pupil in Government institutions cost Rs. 89-7-5 against Rs. 9-10-4 in aided institutions. Thus, Government had to pay for the education of each boy in their own institutions ten times as much as in aided institutions, exclusive of pensionary liabilities. The difference, however, is in great measure due to the fact that the Government institutions have no primary or middle classes.

As regards high or upper secondary schools, it will be observed that the proportion of fees to total cost was much greater in Government than in aided schools, which is due, to a certain extent, to the introduction of the new rates

GENERAL STATISTICS.

from January 1884. The cost to Government of educating each pupil was Rs. 3-13-8 in aided institutions, while it was Rs. 9-10-2 in their own schools.

The high schools under the management of Boards, 3 in number, were even more self-supporting as regards fees than the departmental schools, nearly 70 per cent. of the entire cost having been covered by fee-revenue; but two of them are really middle schools with a fifth class tentatively opened. The cost to Government of educating each pupil in these schools was Rs. 2-3-10.

The Government middle (lower secondary) schools for boys were not quite as self-supporting as high schools, as some of them, being situated in small towns, could not raise any considerable fee-revenue. The percentage of fees was 44·5 against 38·1 per cent. in aided schools of the same description. The cost to Government of educating each pupil was Rs. 12-8-6 in their own schools against Rs. 2-4-10 in aided institutions.

The Board schools, it is satisfactory to note, were nearly as self-supporting as departmental schools, and the cost to Government of educating each pupil was Rs. 1-6-2.

The percentages relating to primary schools—Government and aided—admit of no comparison, as the Government schools under this head are few in number and very favorable rates of fees are levied therein.

Percentage of fees in colleges.

20. The percentages of fees to total expenditure in the college and the school departments of Government and aided colleges are shown in the subjoined statement, excluding pensionary charges in the case of Government institutions:—

Colleges.	Percentage of fees to total cost, 1883-84.			Percentage of fees to total cost, 1882-83.

Tuticorin Caldwell college	14·0	...	14·0	21·80

In 9 out of 10 Government colleges, the percentage of fees to total cost shows an improvement over the figures of the preceding year, the solitary exception being the Cuddalore college, in which the percentage slightly declined, viz., by ·9.

As regards aided colleges, increase will be noticed, except in 7 cases, where the diminution was probably the result of a fall in attendance, or of the employment of additional teachers rendered necessary by the development of the institutions concerned, or of both.

There were only 3 Government institutions, *i.e.*, the second-grade colleges at Madura, Calicut and Mangalore, in which one-half of the charges was met from fees, while 6 aided institutions come under this category. The proportion of fees in the Bellary college was again deplorably low. There was a fall in the fee income of the Trichinopoly S.P.G. college in consequence of the competition of the St. Joseph's college. Taking college departments alone, there were 4 Government and as many aided institutions in which a third of the entire outlay was borne by fee-revenue.

Percentage of fees in high (upper secondary) schools.

21. The annexed statement shows the percentages of fee-revenue to total cost in the 12 Government, 3 Municipal, and 55 aided high schools at the close of the year :—

In all Government high schools, Kurnool excepted, more than 50 per cent. of the charges was met from fees. Increase will be noticed in the case of each school, Saidápet excepted. In 29 out of 55 aided high schools, fees covered a moiety of the entire cost. In 14 aided high schools less than a third of the charges was borne from fees. But some of the schools included under this head are result schools, and sufficient development has not yet taken place to admit of a larger proportion of their cost being covered by fees,

GENERAL STATISTICS.

Percentage of fees to cost in middle schools.

22. The names of Government middle schools, Board middle schools on the salary system, and aided salary-grant middle schools, in which 50 per cent. of the charge was met from fees, are given below :

Middle schools.	Percentage of fees to total cost.	Middle schools.	Percentage of fees to total cost.

Chicacole Municipal school	86·09	Mangalore St. Rozario's school	62·49

There were 20 Government, 24 Board (Local Fund and Municipal) and 8 aided middle schools in which the fees covered more than 50 per cent. of the entire cost, against 17 Government, 10 Board and 10 aided schools in the preceding year. In two schools the fees exceeded the cost and in several nearly equalled it. Schools of this class are rapidly, as is but right, becoming self-supporting. The current year's report will contain, I trust, a much longer list of such schools, as the new scheme of fees was only introduced towards the close of the year. Results schools and schools aided from Municipal and Local funds on the salary-grant system are not included in the above list.

Profits made in salary-grant schools.

23. A list of salary-grant schools in which the Government and Municipal grant and fees together exceeded the total cost during the year is appended.

Institutions.	Grants.	Fees.	Total of grant and fees.	Total expenditure.	Excess of receipts.	Excess of receipts in 1882-83.
	RS.	RS.	RS.	RS.	RS.	RS.
Coimbatore college	4,611	12,902	17,513	15,103	2,410	...
Madura Hindu Middle school	903	3,151	4,054	3,438	616	667
Vellore Church of Scotland Mission school ...	2,328	5,200	7,528	7,076	452	...

Kapistalam Middle school	267	830	1,097	1,054	43	

The number of schools fell by three, and the total amount of the profits was Rs. 4,687 against Rs. 6,100, the total of such profits in the previous year. With two exceptions the excess is nominal and amounts to little more than a small credit balance at the end of the year. This is necessary, as schools have exceptional expenditure at longer or shorter periods for which it is desirable funds should accumulate. This is illustrated by the fact that only three of the schools in the above list were in the list of the preceding year. Superior schools have in not a few cases been utilizing their increased income in improving their staff—a most necessary and commendable measure. If good men are to be attracted to the profession of teaching, the scale of remuneration must be liberal.

Progress of the Grant-in-aid system.

24. The expenditure on grants-in-aid to private institutions from Provincial, Municipal and Local funds during the last ten years is summarized below. It does not include salary and results grants from Provincial funds to Local fund and Municipal schools.

Years.	Payments made from			Total.	Years.	Payments made from			Total.
	Provincial funds.	Local funds.	Municipal funds.			Provincial funds.	Local funds.	Municipal funds.	
	RS.	RS.	RS.	RS.		RS.	RS.	RS.	RS.
1874-75 ...	2,57,787	1,23,303	26,221	4,07,311	1879-80 ...	2,61,292	1,10,741	24,057	3,96,090
1875-76 ...	2,64,818	1,70,469	33,009	4,68,296	1880-81 ...	2,32,950	1,78,467	34,899	4,46,316
1876-77 ...	2,78,682	2,04,743	33,294	5,16,719	1881-82 ...	2,51,204	2,53,819	43,768	5,48,791
1877-78 ...	2,81,895	1,78,184	34,427	4,94,506	1882-83 ...	3,11,285	3,01,099	59,115	6,71,499
1878-79 ...	2,68,986	1,39,026	25,005	4,33,017	1883-84 ...	3,17,258	2,83,095	74,926	6,75,279

The amount of grants from all sources rose by Rs. 3,780. The aid given to schools under private management from Provincial and Municipal funds shows an increase of about Rs. 6,000 and Rs. 16,000 respectively, but that given from Local funds fell by more than Rs. 18,000, which was due to the reduction in the rate of grants adopted by some of the Boards during the year on the score of financial pressure and also to the abolition of certain schools on the combined system maintained or aided from Local funds. The total grant shows an increase of 71 per cent. over the figures of 1879-80.

Classification of the grant-in-aid expenditure.

25. The particulars of the entire expenditure on grants-in-aid are compared below :—

Grants.	1882-83.	1883-84.
I—Grants for salaries to private schools under inspection.	RS.	RS.
Grants for salaries and house-rent	1,57,939	1,67,378
Furniture, book, and apparatus grants	2,672	1,235
Grants on account of fees for poor European and Eurasian children	436	1,331
Scholarship grants	6,982	8,224
Building grants paid from Provincial funds	2,863	3,358
Results grants to private schools	1,40,393	1,35,732
Total ...	3,11,285	3,17,258
II—Other grants.		
Salary and scholarship grants to Local Fund schools	4,740	6,358
Do. do. to Municipal schools	1,632	274
Results grants to Local Fund and Municipal schools	12,686	22,201
Grants to eleemosynary schools not under inspection	1,608	1,822
Total ...	20,666	30,655
Grand Total ...	3,31,951	3,47,913

The expenditure on salary grants from Provincial funds to schools under private management rose by Rs. 9,439 in consequence of the additional and fresh grants sanctioned on behalf of certain deserving institutions. There was a fall of nearly Rs. 5,000 in the amount of results grants to schools under private management, due to the transfer of middle education charges to Municipalities, but, on the other hand, the results grants paid to Municipal and Local Fund schools rose by

GENERAL STATISTICS.

about Rs. 10,000—a fact which indicates the development of the Board schools. Under this head demands on Provincial funds are likely to increase somewhat rapidly as there appears to be a strong inclination on the part of most Boards to improve their schools.

Schools under private management aided on the salary grant system.

26. The particulars regarding the attendance in, and grants drawn by, salary grant schools under private management will be found in statement No. IV in appendix. The number of boys' schools fell from 108 to 86, owing to the transfer of certain schools to the results system. The number of girls' schools rose from 85 to 94, as several new schools, including the Maharajah of Vizianagrum's girls' schools in Madras, were brought on the aided list. The total attendance was 26,027 against 25,093 in 1882-83. The salary grants paid to girls' schools rose from Rs. 34,201 to Rs. 43,141. Under this head the demand for aid is likely to increase rapidly.

The Grant-in-aid Code.

27. The Grant-in-aid Code sanctioned in 1880 came into full force on the 1st April 1883 and all schools had their grants re-distributed with reference to its provisions. As explained in my last report, teachers who had put in six years' continuous service on the 31st March 1883 were allowed to continue to draw their grants undisturbed. This re-distribution effected a net saving of nearly Rs. 10,000 in the amount of salary grants. A portion of the saving was utilized in giving increased aid to certain institutions, such aid being necessary generally in consequence of the raising of the standard of the institutions.

Changes in the Grant-in-aid Code.

28. Several important changes were sanctioned in the Grant-in-aid Code during the year, which will be noticed under the following heads :—

(1.) *Appointment of local agents.*—Difficulties having arisen in consequence of the appointment of the headmasters of schools under the control of trustees and associations as *managers* for the transaction of business with the department without any limitation in their powers, rule 3 of the Grant-in-aid Code was so far amended as to give such trustees or associations power to "appoint the headmaster of the school, or other person, their local agent, to transact the current business of the school on their behalf with the Education Department."

(2.) *Time to be spent in secular teaching.*—The Code, as first promulgated, required the head of a college or school to spend three or four hours respectively in secular teaching. The head of a large institution has to supervise the instruction given by his subordinates and to attend to general management, and this was not practicable so long as he was required to devote as many as three or four hours to actual teaching. Heads of colleges and schools were accordingly permitted to spend in secular teaching " such time, not being less than one hour daily, as may seem necessary for the well-being of the school."

(3.) *Period of furlough.*—Section 12 of the Code empowered the department to recognize six months' leave in case of masters of aided schools. To provide more liberally in regard to leave in the case of masters who have to proceed to Europe, the period was extended to twelve months, if taken in Europe after four years' continuous service in the country.

(4.) *Relaxation in favor of old teachers.*—The concessions granted on behalf of old teachers by the Notification of the 16th February 1880 and extended by G.O., No. 57 of the 17th April 1882, expired on the 31st March 1883. As it was considered a real hardship to reduce the grants of teachers of some standing and experience, or to require such men to proceed to the normal schools for training, a relaxation was sanctioned to the effect that masters and mistresses, whose continuous service as teachers was not less than six years on the 31st March 1883, were to be considered eligible for the favorable rates sanctioned in Government Notification, dated 16th February 1880, so long as they continue to perform efficiently the duties of their calling.

(5.) *Certificates granted by public educational bodies.*—Article 25 of the Grant-in-aid Code recognized the certificates granted by the Committees of the Council on Education in Great Britain and the Commissioners of National Education in

Ireland. As this measure led to the treatment of teachers holding certificates from other educational bodies as uncertificated for the purposes of State aid, the article was amended so as to include teachers holding certificates granted by any "public educational body recognized by Government."

(6.) *Honoraria to Hindu and Muhammadan mistresses.*—Elementary girls' schools maintained by Mission Societies have, as a rule, worked fairly successfully, and this happy result is no doubt, to a great extent, due to the practice of marrying young mistresses to schoolmasters and entrusting the girls' branch of a village school to the wife under the general supervision of the husband. Some inducement was considered necessary to bring about a similar state of things as regards secular teachers. The following addition was accordingly made to article 22 of the Grant-in-aid Code:—

"Honoraria, amounting to Rs. 60, Rs. 120 and Rs. 240, will be given to the wife or widow of Hindu and Muhammadan masters on passing for an ordinary certificate of the third, second or first grade, respectively, provided the husband or guardian is a teacher by profession, and the wife or widow, in the case of the third grade, has been continuously engaged in school-teaching for one year, and in the case of the second and first grades for two years."

(7.) *Honoraria for passing in vernaculars.*—With a view to encourage mistresses and normal students to qualify in a second or third language, it was considered expedient to grant honoraria under certain restrictions, and the following addition was sanctioned to rule 46 of the Code:—

"The Director of Public Instruction may grant an honorarium, equal to two months' salary, to a mistress who qualified in a second or third language of the test of the grade in which she holds a normal certificate, provided such language or languages be South Indian vernaculars and not the vernacular of the mistress. Grants at half the above rates may be given to a mistress holding an ordinary certificate, who has been employed as a teacher for two years preceding the examination. Grants equal to three months' scholarship will be given to a female normal student passing in a second language in the test for which she appears."

(8.) *Grants to gymnastic and drill instructors.*—As the provisions of the Code contemplated aid to calisthenic teachers in gymnasia who may or may not be attached to schools, the following addition was made to article 39 of the Code:—

"A half-salary grant will be given to a fully qualified teacher of gymnastics, and a one-third grant to a drill master or mistress who possesses also an elementary knowledge of gymnastics."

(9.) *Capitation grants to conductresses.*—No aid could be given under the Code for servants of any kind. This prevented managers of many girls' schools from employing conductresses in their schools. The employment of this agency being found essential for the well-being of girls' schools, it was resolved to give aid on account of this class of school servants; and in order to induce them to do their best to secure regular attendance, their remuneration has been made to depend on the attendance. The following addition was made to article 46:—

"A monthly grant of one anna will be given in aid of the salaries of conductresses employed in girls' schools for each girl not residing on the school premises, who is certified by the manager to have made fifteen full daily attendances in the month. During authorized vacations grant may be drawn according to the average grant of the two preceding months."

(10.) *Requisition of a minimum attendance in results schools.*—To check the multiplication of petty results schools and to prevent the abuse of a person being able practically to constitute his own children with their private tutor a school and to obtain grant, the requisition of a minimum limit as regards attendance was considered absolutely necessary, and the following clause was added to article 50.

"No school will be included in this statement which has not, if a school for boys, an average daily attendance during the three months preceding the date of application of 8 pupils; if a school for girls of 4 pupils. In schools in Municipalities, the average attendance must not be less than 16 and 8 respectively."

(11.) *Conditions of aid under the results system.*—The increasing number of results schools rendered it necessary that a careful selection should be made among the competing schools. In order to guide the sanctioning authorities in the matter of the selection, and also to inform the managers of the directions in which

GENERAL STATISTICS.

they should improve their schools, and to guard also against the sudden withdrawal of aid, rule 58 of the Code was amended as follows:—

"Amongst schools otherwise equally eligible a preference will be given to those—

(*a.*) in which school fees are levied and trustworthy returns of such fees are submitted;
(*b.*) which are provided with a fairly sufficient teaching staff;
(*c.*) which have fair accommodation and are otherwise well-organized;
(*d*) which have been continuously maintained;
(*e.*) in which certificated teachers are employed.

In the case of schools whose maintenance is guaranteed for a given time, aid shall not be wholly withdrawn without due and sufficient notice, which shall not be less than six months."

(12.) *Extra grants for Muhammadans.*—The rate of grant for Muhammadans was raised by 25 per cent. in consideration of the late age at which they begin their secular instruction and their comparatively slow progress therein.

(13.) *Extra grants to children of backward races.*—The necessity for encouraging private effort in the instruction of children of backward races, whether living within or without the special localities to which the tribes belong, engaged the attention of the department during the year, and the following addition was sanctioned to rule 77 of the Code. Such special encouragement was also recommended by the Education Commission.

Rule 77—(*a.*) Grants shall be paid at double rates to managers of schools in the Agency tracts of the Northern Circars, and at rates 50 per cent. higher than those named in the above scale to managers of schools in the Kollegal and Satyamangalam (above the ghâts) Taluks of the Coimbatore District, in the Nilgiri District, and in the Wynaad Taluk of the Malabar District.

(*b.*) Grants may also be paid at excess rates of 50 per cent. on account of pupils passing in schools wherever situated and belonging to the following races:—

Khonds.	Irulas.	Malsurs.
Savaras.	Kurambas.	Kadors.
Badagas.	Koravas.	Malayalis.
Todas.	Kotâs.	

or to any other tribe if sanctioned by Government.

Kurubas in the Anantapur District have been lately added to the list of special tribes.

(14.) *Readjustment of grants for the seventh standard.*—The maximum grant for the seventh standard was originally fixed at Rs. 25. To make the grants proportionate to the results, the grants for first, second and third classes in the standard, which is tested by the Middle School Examination, were fixed at Rs. 30, Rs. 20 and Rs. 10 respectively.

(15.) *Grants to teachers receiving no fixed stipends.*—The provisions of article 14 of the Code and the declaration attached to the grant-in-aid bills did not strictly apply to teachers receiving no fixed stipends, to wit, members of religious societies who are precluded from receiving fixed salaries by the rules of the societies to which they belong. To remedy this defect the following addition was made to the article in question:—

"In the case of members of religious societies, who receive no fixed remuneration for their services as teachers, a declaration by the managers that such teachers have been duly employed in accordance with the terms of the order sanctioning grants will suffice."

The following addition was made to the declaration:—

"I further certify that, in accordance with the provisions of article 14 of the Grant-in-aid Code, the teachers (here enter names), who are precluded by the rules of the society to which they belong from receiving fixed salaries, have been duly employed in this institution in accordance with the terms of the order sanctioning grants on their behalf."

(16.) *Transfer of charges on account of middle education of boys to Municipal Boards.*—In G.O., No. 1768, Government were pleased to sanction, on the recommendation of the Local Self-Government committee, the transfer of charges on account of middle education of boys in Municipalities to the Municipal Boards concerned, and the following changes were made in the Code:—

Rule 6.—For the words "in the primary schools or classes of schools for boys" the words "in the middle and primary schools or classes of schools for boys in the mofussil Municipalities" to be substituted.

Rule 9.—For the words "to be employed in primary classes" the words "to be employed in middle and primary schools or classes in the mofussil Municipalities" to be substituted.

Rule 10.—For the words "in the case of primary schools and classes" the words "in the case of middle and primary schools and classes in the mofussil Municipalities" to be substituted.

Rule 11.—For the words "all grants to teachers in primary schools or classes" the words "all grants to teachers in middle and primary schools or classes in the mofussil Municipalities" to be substituted.

Rule 82.—For the first two sentences substitute "all results grants earned by boys in the mofussil Municipalities shall be payable from Municipal funds. Grants earned by boys in rural circles under the first, second, and third standards shall be payable from Local funds."

(17.) *Grants to superintendents of girls' schools and teachers of female normal schools.*—The provisions of the Code did not provide for the grant of special aid towards the salaries of superintendents of girls' schools or teachers of female normal schools, and as such aid was felt very necessary for the development of female education, the following addition was made to rule 46 of the Code:—

Rule 46.—After the words "in schools for Muhammadans" insert "and mistresses employed as superintendents of girls' schools or teachers in female normal schools as well as mistresses in schools in remote and backward parts of the country, where, in the Director's opinion, the fees levied at authorized rates do not cover a reasonable portion of the teacher's salary."

(18.) *Special aid to middle and high schools in rural tracts and to normal and practising schools.*—In the case of high and middle schools, in rural tracts, the attendance is not always sufficient to provide a fair proportion of the cost of an efficient staff, and the managers were led to rest satisfied with teachers of inferior attainments. To give special aid in the case of deserving schools and also to provide for aid being given towards the salaries of teachers of normal and attached practising schools, the following addition was made to article 27:—

"For middle and high schools situated in rural towns and villages, in which the fees do not cover an adequate portion of the school expenditure, and also for all normal schools, and attached practising schools, the Director may sanction a grant not exceeding one-half of the total salary to a trained master of the first, second or third grade, and a grant not exceeding one-third of the total salary to a master of any of the said grades holding an ordinary certificate."

(19.) *Introduction of hygiene in girls' schools.*—On the recommendation of the Inspectress of Girls' Schools, hygiene was introduced as an additional alternative subject for girls under the third standard, this subject being more popular and more practically useful than history; and the grant for the subject was fixed at Rs. 2.

(20.) *Zenana education.*—In my last report I referred to the scheme tentatively sanctioned for carrying out zenana education. The scheme was tested by the National Indian Association, and several practical difficulties having occurred it has been recently amended. The changes will be noticed in the report for the current year.

Several minor amendments in the Code were also sanctioned during the year, which, however, need no special mention here.

Instruction in Sanitation.

29. The number of candidates who selected hygiene in the last Special Upper Primary Examination was 1,701 and the number of passes 1,449 against 1,523 entrances and 1,276 passes in the preceding year. Hygiene, which is very popular, was introduced as an alternative subject for girls in the third standard of the results scheme, and it is under contemplation to permit boys to appear in it.

Instruction in Agriculture.

30. Government sanctioned the introduction of agriculture into the middle schools at Bellary, Salem and Madura. No action however could be taken on this order, as the middle departments attached to the Government colleges in the localities specified were abolished towards the close of 1883. The subject will be considered along with the scheme under preparation for the development of technical and scientific education in the Presidency.

Supply of library and prize books and apparatus.

31. The practice hitherto observed of obtaining library and prize books through Messrs. Baker and Co. is still in force, the work performed by the late Curator of Government Books and his

GENERAL STATISTICS.

establishment in this connection now having devolved on this office establishment, book branch.

School libraries.

32. The school libraries, including the consulting library opened in connection with the Presidency College, were maintained in good order, and have in most cases been more fully utilized than in preceding years. Libraries containing suitable elementary books are being already formed in Government girls' schools. The assistance of Government has been given as far as practicable towards the formation of libraries in private schools. It is under contemplation to supply important Government institutions with popular and useful magazines; the numbers will be bound at the close of each year and be added to the consulting library. In course of time, it is hoped that public libraries may spring up in connection with local colleges, if the means can be found of drawing forth public liberality towards the establishment of such institutions.

Museums and exhibitions.

33. Something too will, I trust, in time be done towards the establishment of museums and exhibitions as a potent means of developing the industrial education of the people. The large number of visitors to the museum of the School of Arts and to the Central Museum show the popular liking for such exhibitions. The needle-work exhibition organized by the National Indian Association, Madras Branch, and recently recognized by Government, is, I think, already creating a keener interest in needle-work in girls' schools by fixing a public standard of merit and raising a spirit of emulation among schools. The creation, however, of distinct artistic needle-work classes in girls' schools, to which girls should, after completing their elementary education, devote most of their time is, I think, essential, if needle-work of a higher order of excellence is to be produced.

Physical training.

34. During the year considerable advance has taken place not only in forming gymnasia and in introducing regular gymnastic instruction in most schools, but also in promoting amongst pupils a love of out-door games, such as cricket, badminton, and lawn tennis. All the leading institutions in Madras and most of those in the country have specially qualified gymnastic instructors—most of whom have been trained by private instructors and the Field Games Association. Grants have been invariably sanctioned when applied for for the entertainment of instructors and also for the requisite apparatus. The gymnasia already opened have worked, on the whole, satisfactorily, and in some parts of the country a real love of athletic exercises seems to be springing up among pupils in schools. Marked excellence in the performance of gymnastic feats has been attained in some places.

Mr. Monro's remarks on the subject of physical training will be read with interest.

I have often called your attention to the sedentary character of the education in this country as tending to produce effeminacy of character. The following extract from Plato may be quoted in illustration of my meaning :—

"Neither are the two arts of music and gymnastic really designed, the one for the training of the soul and the other for the training of the body.

"But what is the real object ?

"I believe that the teachers of both have in view chiefly the improvement of the soul.

"How is that ?

"Did you never observe the effect on the mind of an exclusive devotion to gymnastic or the opposite effect of an exclusive devotion to music ?

"In what is that shown ?

"In producing a temper of hardness and ferocity, or, again, of softness and effeminacy.

"Yes I am quite aware that your mere athlete becomes too much of a savage, and that the musician is melted and softened beyond what is good for him."

* * * * *

"He who mingles music with gymnastic in the fairest proportion and best attempers them to the soul, may be called the true musician and harmonist."

* * * * *

"Such then are the principles of nurture and education."

Following these principles, I have endeavoured, as far as possible, to encourage a taste for

gymnastics in the different schools of the division. By gymnastics I do not mean exclusively performances on the parallel bars and the like. These, though good in themselves, are, as a rule, not popular with boys, because they do not involve any competition, at least to a very small extent. Boys should therefore be encouraged to practise such games as running, leaping, wrestling, &c. It may be objected that my views are Utopian; but, in my experience, Hindu boys are quite as fond of these games as English youths, if they are only encouraged. To this end I think that there should be an annual exhibition of athletics on the occasion of the prize distribution. Schools should also be encouraged to compete occasionally with one another in games. In this way an *esprit de corps* and a feeling of attachment to the "school-boy spot" would grow up, with the probable result that we should hear less of that capricious migration from one institution to another which it has required a Government order to check.

Most of the colleges and secondary schools have made some attempt at gymnastic instruction, but few of them are provided with the necessary apparatus. The Calicut college has suitable apparatus, but the boys do not take kindly to gymnastics, owing to the fact that they come to school early and take no midday meal, so that by the evening they are physically incapable of exertion. The headmaster has promised, however, to meet the difficulty by providing a luncheon room for caste boys. The instructor of the Coimbatore college was absent in Madras for a term of training in the Field Games Association at the time of my visit, so that gymnastics were not taught. The St. Joseph's and S. P. G. Colleges at Trichinopoly were not provided with gymnasia. It is to be regretted that two such large and important institutions should pay no attention to this branch of education, and I trust that, during the current year, some attempt will be made in this direction. Gymnastics flourish in the Pálghat high school, which is furnished with all the necessary apparatus and a competent instructor. In the Cannanore high school, which is only provided with a set of parallel bars, the boys showed great proficiency and elicited the admiration of the spectators at the annual distribution of prizes. Credit is due to the headmaster of the Brennen high school, Tellicherry, for the manner in which he has encouraged lawn-tennis in his school. Gymnastics also receive some attention at the high school, Udamalpet. Of the middle schools, Erode is perhaps the best, but little progress can be expected in any of them until the necessary apparatus is provided. As regards normal schools, the Tellicherry school is the best. The Coimbatore Local Fund Board declined to sanction apparatus for the normal school, Coimbatore, but the headmaster had, with laudable public spirit, erected a rough set of parallel bars at his own expense. I have often remarked on the importance of instructing normal students in gymnastics, and I trust that the new column in the form of examination for teacher's certificate will tend to diffuse a taste for physical exercises in village schools. Regarding primary schools, you were good enough to sanction the introduction of Forest's Hand-book on Gymnastics into these schools, and it is, I believe, being translated into the different vernaculars. A fair number of primary schools are already supplied with the book. In the absence of apparatus, there is no reason why gymnastics on the native system might not be practised. These involve no expense and no instructor, at least in rural tracts, where the practice of a sort of gymnastics seems to be indigenous. Your recent ruling extending Section 97 of the Grant-in-aid Code to swings has been productive of surprising results. A considerable number of managers of schools have applied for aid towards the erection of swings, and I trust before long to see every girls' school in the division supplied with this healthy form of recreation.

Cost of the University.

35. From the balance sheet of the University, hereto annexed, it will be observed that there was a balance in its favor of Rs. 13,080-6-5 against Rs. 8,959-0-3 at the close of the previous year. The recent raising of the scale of fees for the Arts course, coupled with the fact that the number of candidates for the different University examinations is annually increasing, will, it is hoped, in course of time, provide a moderate endowment. The increasing work of the Registrar has led to the appointment of an Assistant Registrar during the current year.

Receipts.	Rs.	A.	P.	Charges.	Rs.	A.	P.
Opening balance on the 1st April 1883.	8,959	0	8	Salaries of office establishment ...	6,183	15	6
Fees from candidates	91,650	0	0	Do. of examiners	65,502	0	0
Sale of books and certificates	5,473	15	4	Contingent charges...	21,316	9	8
					93,002	9	2
				Closing balance on 31st March 1884 ...	13,080	6	5
Total ...	1,06,082	15	7	Total ...	1,06,082	15	7

Cost of the departmental examinations.

36. The number of candidates registered for the last School Management Examination was 244 and the fees collected amounted thus to Rs. 244. The amount paid during the year to meet the cost of the examination was Rs. 14-9-5.

GENERAL STATISTICS.

Expenditure on educational buildings from the Educational Building Fund.

37. The expenditure incurred on school-houses during the year from the Educational Building Fund amounted to Rs. 55,406-5-11, of which Rs. 9,434 was on account of establishment and tools and plant in connection with the works carried out by the Public Works Department. The particulars are given in the subjoined statement :—

Expenditure by the Public Works Department.	RS. A. P.	Expenditure by the Educational Department.	RS. A. P.
Original works and improvements above Rs 1,000	34,365 9 9	Original works and repairs less than Rs. 1,000	6,781 13 3
Minor new works and repairs	4,158 4 3	Building grants (exclusive of Rs. 3,358-4-0 paid from Provincial funds)	666 10 8
Public Works supervision and tools and plant	9,434 0 0		
Total ..	47,957 14 0	Total ...	7,448 7 11

The important original works undertaken during the year were—

	RS.	A.	P.
The Chittoor high school	16,806	12	1
Additions to the Rajahmundry college	5,455	11	11
Improvements and repairs to the Madras normal school	5,430	6	1
Tiruvâlúr Government school	4,443	12	3
Russellkonda school	1,024	11	3
Re-flooring the class-rooms of the Madura college ...	1,204	4	2
Total ...	34,365	9	9

The expenditure incurred on the Chittoor high school building from its commencement has aggregated nearly Rs. 24,000 : the work will probably be completed by the close of the current year.

Building grants.

38. The building grants paid during the year amounted to Rs. 4,024-14-8, of which Rs. 3,358-4-0 was debited to Provincial funds and the balance, viz., Rs. 666-10-8 to the Educational Building Fund. Annexed is a list showing the institutions to which grants were paid :—

	RS.	A.	P.
Ootacamund Nazareth Convent girls' school ...	1,000	0	0
Vizagapatam London Mission school	738	5	4
St. Thomas' Mount Wesleyan Mission boys' and girls' schools	639	4	0
Ramnad S.P.G. Hindu girls' school	569	0	0
Masulipatam Sharkey Memorial school	295	0	0
Udipi Brahman girls' school	116	10	8
	3,358	4	0
Palamcottah Catholic school	666	10	8
	4,024	14	8

The amount would have been much greater had managers completed the building for which aid has been sanctioned, and drawn their grants within the year. The current year's report will show a larger expenditure on building grants.

Educational Building Fund.

39. The balance sheet of the Educational Building Fund is annexed. The capital in favor of the fund on the 1st April 1883 was only Rs. 45,000, and this amount was just sufficient, as explained in my last report, to meet the liabilities of the fund then outstanding against it. It was accordingly decided towards the close of the year to wind up the fund. The balance in favor of the fund on the 31st March, viz., Rs. 2,178-9-1, was adjusted in favor of Provincial services, the completion of the important works

then on hand having been entrusted to the Department of Public Works. Petty repairs to such of the school-houses as are under the management of the department will be provided for in the annual educational budgets. All original works will be carried out from the funds at the disposal of the Public Works Department.

Receipts.	RS. A. P.	Charges.	RS. A. P.

Local Fund operations.

40. The Local Fund Boards maintained at the close of the year 1,144 schools attended by 38,662 pupils. The net expenditure incurred on account of these schools was Rs. 2,28,225. The Local Boards spent besides Rs. 1,139 on grants towards salaries and stipends in schools maintained by the department, Rs. 99 on grants towards Municipal schools, Rs. 2,81,095 on salary and results grants to private schools, and Rs. 1,19,646 on inspection, scholarships, buildings, and miscellaneous items.

Statement No. VI in appendix gives the receipts and charges appertaining to education in each circle. The total receipts amounted to Rs. 11,22,392, including a balance of Rs. 3,27,423; of this sum Rs. 7,12,112 represented one-sixth land-cess. The total net charges on education, including grants for school-houses, were Rs. 6,95,458, which is close upon 88 per cent. of the net income, excluding balance. And if the cost of general management be included, it may safely be assumed that the Boards are now spending 90 per cent. of their available income for educational purposes. The balance thus left to meet the development of schools and extension of education is extremely small. The Boards, however, expended Rs. 35,491 on secondary schools, including primary classes. This expenditure would, if suitable fees are levied and the schools worked on an economical basis, be entirely avoided, as with few exceptions fees *plus* Provincial grants should suffice to cover the charges of secondary schools. The recent revision of the fee rates and the levy of fees in all Board schools should, however, besides meeting the present excess on secondary schools, set free funds under Board primary schools also in districts which possess such schools, but in districts which work on the aid system relief can only be obtained by reducing the rate of aid—a most delicate operation, which often "quenches the smoking flax."

Municipal operations.

41. The Municipalities, Madras and mofussil, were maintaining at the close of the year 134 schools attended by 9,185 pupils. The net cost to Municipal funds on their account was Rs. 36,536, of which only Rs. 9,704 were expended on secondary schools; this is inclusive of the cost of primary classes attached to secondary schools. They spent besides Rs. 184 and Rs. 2,878 respectively on schools maintained by the department and Local Fund Boards; Rs. 74,137 on grants, salary and results, to schools under private management; and Rs. 9,518 on inspection, scholarships, buildings and miscellaneous items. Statement VII in appendix gives particulars of receipts and of charges, appertaining to education, of each Municipality, Madras excepted. The total assets were Rs. 14,00,762 excluding opening balance, Imperial license-tax, and debt accounts. The charges aggregated Rs. 1,51,162, or nearly 11 per cent. of the entire receipts, but if fees be deducted from both sides, nearly 9 per cent.

Total expenditure on education from Provincial and Educational Building Funds.

42. The annexed statement gives the entire expenditure from Provincial and Educational Building Funds on education during 1883-84, compared with the figures of 1882-83:

GENERAL STATISTICS.

43. General tables II and IV in the appendix give a summary of expenditure on education from all sources. The percentages of expenditure under the important heads are compared in the margin. The direct expenditure on public instruction was 84·58 per cent. of the entire outlay against 86·09 per cent. in the previous year, the decrease appertaining to school education, general, *i.e.*, secondary and primary schools, on which 67·50 per cent. was spent against 70·23. This was due to the increased expenditure under University, Buildings and Miscellaneous. The percentage against secondary schools under 1883-84 includes the outlay on primary departments of high and middle schools. There was an increase of nearly 1 per cent. under Arts Colleges and Buildings. The total proportionate expenditure on secondary and primary education was about $3\frac{1}{2}$ per cent. less than in the preceding year, but the proportion 67·50 is still a fair one. The fluctuations under other heads do not call for any special remark.

Expenditure from all sources.

Education Commission.

45. The Education Commission completed their inquiry and submitted their final recommendations during the year. My remarks having been submitted and the final orders of Government and of Government of India having been passed after the close of the year, the subject will be dealt with in the current year's report.

Changes among the graded officers.

46. Mr. Thompson retired towards the close of the year and Mr. Evans died in June 1883. Messrs. Bilderbeck and Ranganatha Mudaliyar were promoted to the graded list. Mr. Marsden, the Inspector of Schools, Coorg, was brought on the Madras Graded List on the 1st April 1883, and appointed Inspector of Schools, South Canara, (seventh educational division). One-third of his pay is debited to the Madras Government.

II.—CONTROLLING AGENCIES.

Direction.

47. I proceeded on privilege leave for two months from the 3rd April 1883 and Mr. J. T. Fowler, senior Inspector of Schools, acted for me. In January, I made a short tour in the fifth division, visiting, among other places, Kumbakónam to confer in person with Major Morant, R.E., the Acting Consulting Architect, regarding the extension of the college buildings, more especially the erection of a suitable laboratory and science lecture-rooms. The plans, with estimate amounting to Rs. 75,000, have since the close of the year been sanctioned by Government. The second tour I made through the first educational division, comprising the Ganjam, Vizagapatam and Godávari Districts, in February and March, when I visited the Berhampore, Rajahmundry, Cocanada, Vizianagrum and Vizagapatam colleges and several other important institutions, and was able to confer with the Collectors of Vizagapatam and Godávari regarding educational affairs in their districts. No change occurred in my office establishment during the year.

Changes among Inspectors of Schools.

48. The constitution of South Canara a separate division under a special Inspector, raised the number of Inspectors of Schools from 6 to 7. The size of the fourth division was reduced by transferring Trichinopoly to the charge of the Inspector of Schools, sixth division, the latter officer having been relieved of the charge of South Canara. In the charge of the second and seventh divisions there was no change. The first

CONTROLLING AGENCIES.

division was under Mr. Monro till about the middle of July 1883, when he was posted to act in the sixth division, Mr. Moss of the Mangalore college having succeeded him. Mr. G. Duncan, Acting Principal, Government Normal School, Madras, was in charge of the Presidency division for about four months, during the period for which Mr. Fowler acted for me and including the interval between Mr. Fowler's departure on furlough and Mr. Garthwaite's arrival in the Presidency division in July. Mr. William Morgan, Headmaster of the Calicut college and Acting Inspector of Schools, fourth division, one of the oldest officers of the department, much to my regret, died in April last. The division was in charge of Mr. Garthwaite for about a month until Dr. Bradshaw, the permanent incumbent, returned to duty from furlough. In the fifth division, Mr. Marden was on privilege leave for three months, Mr. S. Seshayya acting for him. Mr. Monro, as explained above, assumed charge of the sixth division in July on Mr. Garthwaite's transfer to the Presidency division.

Work done by Inspectors of Schools.

49. Annexed is a statement of work done by the Inspectors of Schools. The decrease in the number of schools examined, noticeable in every division, is due to a change in the returns, by which departments of schools are not now reckoned as separate institutions, as in the returns of the previous years.

CONTROLLING AGENCIES.

Inspectress of Girls' Schools.

50. An important change was sanctioned during the year in the range of the Inspectress of Girls' Schools. All the girls' schools in the South Arcot, Trichinopoly, Tanjore, Madura and Tinnevelly Districts were placed under her direct supervision, and in consequence she was given an additional deputy. Miss Rajagopal, of the Government Female Normal School, filled this post till December last, when she resigned, and as no qualified mistress was available, Venkataramayya, Deputy Inspector of Schools, Cuddalore, was temporarily appointed as deputy to Mrs. Brander.

Work done by the Inspectress of Girls' Schools.

51. Mrs. Brander examined 117 schools and 6,157 pupils during the year against 162 schools with 5,947 pupils. The decrease in the number of schools is due to departments of schools not being reckoned as separate schools. The Inspectress spent 85 days in examining schools and 84 days on circuit. She travelled 3,107 miles against 2,800 miles in the previous year.

Changes among provincial Deputy Inspectors of Schools.

52. There were 48 provincial Deputy Inspectors at the close of the previous year. In September 1883, Government accorded their sanction to a revised scheme, the main features of which were an increase in the number of higher grade deputies, the institution of a class of probationers on a salary of Rs. 75 per mensem, the introduction of a uniform rate of travelling allowance, and the inclusion in the general scheme of the Deputy Inspector of Muhammadan Schools and the Deputy Inspectress of Girls' Schools. All the Local Fund additional deputies, with the exception of the officer in charge of the Vellore range, East, were brought on the Provincial list, the Boards concerned having agreed to contribute towards the pay of the officers and their establishments. The Vellore additional Deputy Inspector was transferred to the Provincial list on the 1st April last. Five new deputies were appointed under the revised scheme, 3 in the Anantapur, South Arcot and Madura Districts, the Boards having undertaken to contribute towards their salaries, &c.; 1 deputy in the Coimbatore District, the Board having agreed to contribute Rs. 750 per annum and having taken over the Government school, Polláchi; and the fifth deputy in the South Canara District, in consideration of the Local Fund Board having taken over the management of the Government normal school, Mangalore.

On receipt of Government sanction, I classified the officers of this branch of the department and issued the following instructions regarding the position and promotion of Deputy Inspectors :—

All officers in the fifth and sixth classes whose service under Government is less than 10 years on the 1st January 1884, will receive no substantive promotion until they have passed the test prescribed in Proceedings No. 392, dated 24th January 1882, in a second vernacular language,—and if they are not trained teachers, or have not qualified for an ordinary certificate under article 20 of the Grant-in-aid Code, until they have qualified. Officers who hold their appointments sub. *pro tem.* will be required to qualify in the same manner before they can be confirmed. It is also essential for confirmation that the Inspector report favorably of the deputy's work during the preceding twelve months, and certify his belief that the officer concerned will make an efficient and thoroughly trustworthy deputy.

In future all admissions to the list of Deputy Inspectors will ordinarily be through the grade of probationer, and all promotions, acting or substantive, will be by seniority in the list, tempered by selection for special merit.

To aid the Director in the selection of deputies, in the month of November in each year the Inspectors of the first, second, third, fourth, fifth and sixth divisions will submit to this office the names of two persons, the Inspector of the seventh division the name of one person, who, they consider, will prove efficient deputies. From this list selection will ordinarily be made, a vacancy in a division being, when practicable, filled by one of the nominees of the Inspector of the division, the nominee being, in the first instance, appointed to the probationer class. Each Inspector will annually give notice in the District Gazettes of his division of his willingness to consider applications for the post if submitted before a certain date.

Inspectors should ordinarily select experienced teachers, or Inspecting Schoolmasters, who have passed at least the F.A. Examination, who have been trained in a superior normal school, and whose age does not exceed 30 years. In no case will the name of a graduate or undergraduate who has not passed the examinations prescribed in article 19 or 20 of the Grant-in-aid Code, be accepted after the close of the year 1884.

No probationer will be appointed substantively to the sixth class, or officer now acting sub. *pro tem.* confirmed in that class, until he has passed—

(I) the tests prescribed in article 19 of the Grant-in-aid Code for first-grade teachers;

(II) in a second language according to the test laid down in Proceedings, No. 392, dated 24th January 1882; CONTROLLING AGENCIES.

(III) a special examination to be held annually in August in—

(a) the general and office routine duties of a Deputy Inspector;

(b) the Standing Orders of the Educational Department;

(c) the Grant-in-aid Code;

(d) the history, topography, race and caste distribution and population statistics of the division in which he serves;

(IV) until he has satisfied the Director, on the report of the Inspector of the division after one year's experience of his work, that he has efficiently performed his duties, is thoroughly trustworthy, and is qualified to examine in each subject laid down for standards I to VI, excluding needle-work in standards above the IV.

After the 31st December 1885 no candidate will be appointed a probationer who has not received normal training.

No undergraduate Deputy Inspector who is not confirmed on or before the above date, will be eligible for promotion to the first, second or third class, and no matriculate of less than 10 years' service on the 1st January next, already confirmed in the list of deputies, will, in any case, be promoted to the above grades unless he passes the First Examination in Arts.

No deputy whose service in the department is less than 5 years on the 1st January next, will receive more than one step of substantive promotion unless he undergoes successfully normal training, and no deputy whose service in the department is less than 10 years on the said date, unless he passes the tests prescribed in article 20 of the Grant-in-aid Code for first-grade teachers.

A graduate Deputy Inspector of exceptional merit is not precluded from the prospect of transfer on promotion to the list of teachers.

Work done by provincial Deputy Inspectors of Schools.

53. Annexed is the usual statement regarding the work done by the provincial deputies. Each deputy examined on an average 295 schools and 5,271 pupils, spent 193 days on circuit, and travelled 1,512 miles. This rate of work is, I consider, quite as much as can, in ordinary circumstances, be expected in view of the heavy office work devolving on the deputies in connection with the writing of inspection reports, the preparation of certifying memoranda, the preparation and valuation of examination papers, and the compilation of monthly and periodical returns and statistics. In a few districts the ranges of some deputies are still unduly heavy, notably in Tinnevelly and Godávari, and funds have been provided for these additional appointments, as well as for an additional deputy for the Inspectress of Girls' Schools in the budget for 1885-86. I trust ere long, after the introduction of the new Act, that some of the larger circles, possessing numerous schools maintained by the Board, will appoint district superintendents of education, and thus relieve deputies as far as possible of administrative work in connection with Board schools, so that they may be confined to the exercise of their proper functions, the inspection and examination of schools for grant on behalf of Government. The creation of a superior educational superintendent working directly under the Board has much in its favor, and will, I am convinced, be in reality an economical measure.

The work of the deputies is at present regulated by the circular instructions issued from time to time from this office, which it is very desirable to condense into a code, supplementing these orders by fresh instructions in many matters, but I have not yet been able to take the subject regularly in hand.

Local Fund additional Deputy Inspectors.

54. Nine out of 10 Local Fund deputies in the previous year were transferred to the Provincial list as above explained. The Local Fund Deputy Inspector, Vellore, East, the only remaining officer, examined 235 schools and 3,830 pupils, spent on circuit 227 days, and travelled 1,885 miles.

Deputy Inspectress of Girls' Schools.

55. Opportunity was taken when the subordinate inspecting agency was reorganized, to appoint a second deputy to the Inspectress of Girls' Schools. Miss Govindarajulu was placed in charge of the girls' schools in the Nellore, Madras, Chingleput and South Arcot Districts, with Madras as her head-quarters, and Miss Rajagopaul was put in charge of the Trichinopoly, Tanjore, Madura and Tinnevelly Districts, with Madura as her head-quarters. Miss Rajagopaul resigned her appointment in January, when, for want of a suitable female agent, the Deputy Inspector of Schools, Cuddalore Range, was placed in charge of the southern division as a tentative measure. The appointment of another deputy to the Inspectress will be necessary on the transfer of the girls' schools in the North Arcot, Salem, and Coimbatore Districts to her charge, a very desirable measure.

Work done by deputies to Inspectress of Girls' Schools.

56. The two deputies examined between them 261 schools with 8,624 pupils, and were on circuit for 210 days. In judging the outturn of work, it is to be borne in mind that the second range was constituted towards the close of the year and further that the schools are scattered about the country, and consequently that more time is spent in travelling than in the case of ordinary district deputies.

Inspecting Schoolmasters.

57. The following statement exhibits the number of Inspecting Schoolmasters employed during the year :—

CONTROLLING AGENCIES.

District.	1882-83.	1883-84.	District.	1882-83.	1883-84.
Ganjam	8	6	North Arcot	2	2
Vizagapatam	6	6	Salem	10	10
Godávari	10	10	Tanjore	13	14
Kistna	11	12	Madura	12	11
Bellary	3	6	Tinnevelly.	3	3
Anantapur	4	4	Trichinopoly	7	6
Cuddapah	6	5	Coimbatore	8	10
Kurnool	8	4	Nílgiri	1	1
Nellore	7	7	Malabar	16	17
Madras	3	3	South Canara	4	3
Chingleput	6	6			
South Arcot	7	7	Total ...	155	153

The number of Inspecting Schoolmasters was almost the same as in the preceding year. Out of 153 Inspecting Schoolmasters, 1 was paid from Provincial, 22 from Municipal, and the rest, 130, from Local funds. Regarding these officers Mr. Garthwaite writes :—

In my last annual report on education in the sixth division I have stated at some length my views on this class of officers. It will be sufficient to say here that what I have seen of those of this division does not lead me to change my opinion. The tendency is for them to be the mere satellites of the Deputy Inspectors, dancing attendance on them and working little (and that little unsystematically and desultorily) at the improvement of the village schools, while, on the other hand, the Deputy Inspectors seem to have thought that to effect that improvement for which they gave the Inspecting Schoolmasters so little time, was the peculiar province of that class of officers, to whom mostly, if not entirely, it was to be delegated. The Deputy Inspectors of Nellore and Kávali clamour for additional Inspecting Schoolmasters. Their head-quarter inspecting schoolmasterships were abolished during the year, and the funds thus set free were utilized in the maintenance of the Normal School, Kandukúr, newly opened during the year.

I consider this agency should be retained until elementary schools are officered generally by trained men. They are capable of doing useful work if properly supervised. If the Inspecting Schoolmasters who are not competent be replaced by trained matriculates, there would be no room for complaint. Mr. Monro remarks on this point :—

This agency has fallen into discredit in the department. It is observed that Inspecting Schoolmasters are idle and inefficient. I admit that there is some truth in this view, but I contend that the cause lies in the selection of the men. It will be seen ..... that of the 36 Inspecting Schoolmasters in the division, 11 only are matriculates and one an F.A., the rest being men of inferior attainments. In fact, this agency has for a number of years been a sort of asylum for the effete and time-expired officers of the department. Anything is looked upon as good enough for an Inspecting Schoolmaster. When a vacancy occurs what generally happens is this. The Deputy Inspector observes that a man of long experience, and one who possesses the confidence of the villagers, is required. "There is an old eighth-grade man in a certain high school who ought to be provided for. He is teaching English to a high class, though quite ignorant of the language, it having been found impossible to provide for him elsewhere. He is the very man for the post. Besides, he is a poor man with a large family, and an increase to his income would be acceptable." The eighth-grade man is therefore appointed. He is a man worn out by age and by long service under Government. Though perhaps not gifted with "a plentiful lack of wit" he has "most weak hams." Consequently travelling is distasteful to him. He therefore travels as little as possible, malingering whenever he can escape the Deputy Inspector's notice, which is often the case, as these officers, as a rule, send up the diaries of their Inspecting Schoolmasters without even looking at them. The eighth-grade man, moreover, is of a conservative turn of mind and looks upon western education as a fad of the Sirkar's. It is not therefore a matter for surprise that the agency should come in for a large share of abuse at the hands of some officers of the department. If younger men of superior attainments were selected as Inspecting Schoolmasters and the pay slightly raised, I see no reason why an Inspecting Schoolmaster should not be as efficient as a Deputy Inspector. There can be no doubt that he fills an important function, acting, as he does, as a middleman between the Deputy Inspector and the village teacher.

At the instance of the President, Local Fund Board, Nellore, after consulting the Inspectors of Schools, a code was promulgated during the year for the guidance of the Inspecting Schoolmasters. Extracts from my proceedings are subjoined.

I. An Inspecting Schoolmaster, although paid from Local funds, is under the immediate

control of the Deputy Inspector of the range in which he is located. His head-quarters will be fixed by the Inspector in communication with the President. All applications for leave and other communications by an Inspecting Schoolmaster must be forwarded to the President through the proper channel. CONTROLLING AGENCIES.

II. He must ascertain particulars regarding the area, the population, the number of towns and villages in his range; also as to the number of schools in each town or village and the approximate number of scholars in each school. He must maintain a list of schools in the following form, and such list shall be corrected annually by him and examined from time to time by the Deputy Inspector:—

Name of village.	Population.	Chiefly consisting of what castes.	Name of manager or head-master.	Qualifications of head-master.	Number of scholars.	Highest standard attained.	Description of school, *i.e.*, Government, aided, or unaided.	Remarks.

III. He will, when visiting a village, endeavour to enlist the sympathies of the headman in the education of the children—girls as well as boys. If no school exists, he should offer every assistance towards starting one, in the way of selecting a teacher, providing books, and organizing the school.

IV. His tours must be arranged systematically, each village being visited at stated intervals, not only villages which have schools, but those that have none; but the visits to the latter need not be so frequent as to the former.

V. He will visit every primary school under his supervision at least twice in the year, and as often as his superior officer may direct. A single day should suffice for inspection in most cases, but in places where there are several schools the halt may be extended to two or even three days. With the exception of the first five or six weeks of the official year, an Inspecting Schoolmaster should spend three weeks in each month on tour. He is entitled to enjoy all gazetted holidays.

VI. He will submit to the Deputy Inspector programmes for his tours twice a year, viz., in the months of March and September. In sanctioning these tours, the Deputy Inspector will be careful to exclude schools whose teachers no longer need the advice and assistance of the Inspecting Schoolmaster, also to ensure due attention to backward localities and classes. No important deviations from the sanctioned programme are permissible without the sanction of the Deputy Inspector.

VII. He will submit to the Deputy Inspector on the fifth of each month, in duplicate, a brief diary and report of his work in the preceding month in the following forms:—

Diary of the Inspecting Schoolmaster of the *Taluk or Sub-Range*
for the month of 188

Day.	Date.	Travelled		Distance.	Object of journey.
		From village.	To village.		

CONTROLLING AGENCIES.

Report Sheet of the Inspecting Schoolmaster of the *Taluk or Sub-Range*
for the month of 188

Taluk	Village.	Description of school.	Name of teacher.	Date of visit.		Number of times previously inspected in official year.	Number.			Remarks.
				Present.	Last.		Class or standard.	On roll.	Present.	

The Deputy Inspector will submit one copy of the diary and report to the President, the other, if required, to the Inspector.

VIII. In the remark column of his report the Inspecting Schoolmaster will mention any matters demanding the attention of the Deputy Inspector. These will be noted on by the Deputy Inspector, and, if necessary, brought to the notice of the higher authority concerned.

IX. The Deputy Inspector will furnish each Inspecting Schoolmaster in his range with a printed copy of the gazette list of schools to be examined in the sub-range. He will also furnish a list showing the dates in which Local Fund or Municipal primary schools will be examined.

X. In districts in which girls' schools are under the charge of the Inspectress of Girls' Schools, the Inspecting Schoolmasters will forward to the Deputy Inspectress of the division extracts from their monthly reports relating to girls' schools. Inspecting Schoolmasters must also, when required, assist the Deputy Inspectress in the examination of girls' schools, and, in order that his duty may not clash with his ordinary work, the Deputy Inspectress of Girls' Schools will furnish half-yearly to the Deputy Inspector of the range in which girls' schools exist, a list showing the dates on which she will examine the schools concerned. The Deputy Inspector will, when sanctioning the Inspecting Schoolmaster's tour programme, see that time is provided for this work.

XI. The chief duty of an Inspecting Schoolmaster is to develope the elementary education of the people—

(*a*) by inspecting and organizing primary, more especially indigenous, schools;

(*b*) by examining, not teaching, the pupils at each inspection, and by pointing out to the head teacher the defects in each branch of study which he may notice. He should note in a book, which each head teacher should keep for the purpose, suggestions for his guidance;

(*c*) by instructing and training the schoolmaster so as to render him an efficient teacher according to improved methods of teaching. Such instruction should, except when exercising the teacher in the management of a class or when giving a model lesson, be given in the absence of the scholars, so that the master may not lose their respect. When practicable, the teachers should be brought together for a few days in a class;

(*d*) by encouraging inefficient teachers to join a normal school, to pass the general test of fifth-grade teachers, to visit and watch the working of well-organized elementary schools;

(*e*) by bringing to the notice of the Deputy Inspector teachers who show special diligence and intelligence in the management of their schools;

(*f*) by explaining to the teachers of indigenous schools the provisions of the Grant-in-Aid Code in the matter of results grants, and by trying to bring under examination as many schools as possible. He should see that every teacher in his range possesses a vernacular copy of this portion of the Code;

(*g*) by rendering teachers assistance in securing books, slates, copy-slips, copy-books, furniture, black-boards, and other necessaries for the efficient conduct of a school;

(*h*) by helping teachers to classify their pupils and to systematize their instruction by explaining to them how to keep correctly the necessary registers and by aiding them in framing their applications for grant;

(*i*) by warning teachers against irregularities and neglect of orders which involve loss or reduction of grant or other penal consequences.

XII. An Inspecting Schoolmaster will bring specially to the notice of the Deputy Inspector any irregularities committed by masters of schools in the sanctioned list in the keeping of their registers or their conduct in school.

XIII. He should impress upon teachers and parents of pupils the benefits of vaccination.

XIV. Subject to the rules from time to time in force, he may sell school books and receive commission for the same.

XV. Besides the register noted in Rule II, he will maintain a register of letters received and a register of letters sent out, and such other books or registers as may be laid down by superior authority, and as regards the annual and other periodical returns he must abide by the instructions given by the Deputy Inspector.

XVI. He must accompany the Deputy Inspector or Inspectress in an inspection tour when required to do so.

Sufficient time has not yet elapsed to ascertain whether the rules will have the effect of increasing the usefulness of this agency, but they are calculated to do so. Hitherto the success achieved by these agents has generally not been very satisfactory, a result which, I believe, was in no small measure due to the fact that the men had no very clear notion of their duties. If district superintendents should be appointed in any district hereafter, the control of Inspecting Schoolmasters should be transferred from the deputies to the superintendent.

Besides the Inspecting Schoolmasters, two special officers, styled superintendent, of the same rank as Inspecting Schoolmasters, were employed from Provincial funds in the hill tracts of Ganjam and Vizagapatam, and 6 Municipalities also and 1 Local Fund Board employed special officers to superintend the education given in elementary schools. The Inspector of Schools, first division, has not noticed the work done by the Superintendent of Hill Schools.

III.—UNIVERSITY EDUCATION.

Changes in bye-laws.

58. Bye-laws regulating the constitution of meetings of the Senate, the order of business to be followed at such meetings, the rules of debate, the appointment of committees, and the conduct of elections for University offices, were drawn up by a committee appointed by the Senate, adopted by that body, and sanctioned by Government. Some minor changes in the bye-laws relating to the holding of convocations for conferring degrees were also sanctioned. The scheme of studies and examinations for the proposed Bachelor of Science degree was discussed by the Senate, but not finally adopted. The discussion of the report of the Faculty of Medicine was adjourned pending the receipt of a supplemental report on the suggestions made by Dr. Wilson relating chiefly to the chemistry portion of the curricula. No report was submitted by the Faculty of Law.

Convocation of graduates.

59. The Senate had under consideration the question of instituting a convocation of graduates and passed resolutions in favor of the proposal. A draft Bill to amend Act XXVII of 1857, prepared by the Senate, is now before the Government of India. The Local Government recorded its opinion that, having special regard to the circumstances of Madras, the desire to create such a body was not unreasonable, but that the question was one which must be viewed in connection with all the Indian Universities.

Affiliated institutions.

60. Three institutions were affiliated to the University during the year, all up to the First Arts course, viz., (1) the Pithápuram Rajah's College, Cocanada; (2) the Lutheran Mission Central College, Tranquebar; and (3) St. Joseph's Institution, Cuddalore. The number of affiliated institutions has thus risen from 40 to 43.

University Fee Fund.

61. The balance in favor of the University Fee Fund on 31st March last was Rs. 11,230. The total income was Rs. 97,124, of which Rs. 91,650 were derived from fees for examinations. The expenditure on examiners' salaries was Rs. 65,500. The cost of establishment was only 6 per cent. of the expenditure. The fees for the Matriculation, F.A., and B.A. Examinations have been recently raised from Rs. 10, Rs. 20, and Rs. 30, to Rs. 12, Rs. 24 and Rs. 36 respectively. One of the objects in view is the formation of a reserve fund; another the remuneration of superintendents of University examinations: this work is now performed gratuitously.

UNIVERSITY EDUCATION.

University examinations.

62. The number of candidates registered for the different examinations rose from 5,816 to 6,968, the number of examinees from 5,740 to 6,848, and the number of passes from 2,060 to 2,460, while the percentage of passes to examinees remained stationary, viz., 35·9. The number of examinees in 1873-74 having been 2,115, the number in ten years has risen by 224 per cent.

University endowments.

63. Two new endowments, one a scholarship and the other an annual prize, were founded, the former by the Hon'ble V. Rama Aiyangar and the latter by the Rev. W. Miller, C.I.E. The capital was respectively Rs. 3,000 and Rs. 1,000. The annual average of the endowments —which now aggregate Rs. 45,500—of the University since its incorporation is Rs. 1,685. All the endowed scholarships and prizes were awarded, Rajah Sir T. Madhava Rau's Matriculation prize excepted.

(*a.*) ARTS.

M.A. degree.

64. Eight candidates were registered and examined, 1 in Branch II, 1 in Branch III, 1 in Branch IV, and 5 in Branch V. Only 2 passed against 2 out of 5 in the previous year, and the 2 successful pupils of Branch V were placed in the third class.

B.A. degree.

65. The general results of the B.A. Examination are summarized below. The senior B.A. classes in all institutions, which were numerically small in 1882, increased considerably in strength in 1883. The number of examinees rose by 50 per cent., but the percentage of passes has not kept pace with that of examinees. In Government institutions the falling off is very small, but in institutions under private management, especially the Mission colleges at Tanjore and Trichinopoly, it is very marked. The staff in each of these colleges, especially the latter, needs strengthening.

General results.		Public institutions under the Madras Government.	Public institutions in Native States.	Public institutions under private management.	Private study.	Total.
Examined ...	1882-83	90	27	89	15	221
	1883-84	149	38	134	13	334
Passed—						
First class ...	1882-83	2	...	2	...	4
	1883-84	..	...	1	...	1
Second class.	1882-83	21	3	18	4	46
	1883-84	40	9	25	1	75
Third class ...	1882-83	26	8	34	2	70
	1883-84	38	11	32	2	83
Total ...	1882-83	49	11	54	6	120
	1883-84	78	20	58	3	159

The percentage of passes during the last six years is given in the annexed table. The number of entrances and passes was greater than in any previous year, but the percentage of passes was less.

Years.	Examined.	Passed.	Percentage.	Years.	Examined.	Passed.	Percentage.
1878-79	231	140	60·6	1881-82	261	144	55·2
1879-80	175	85	48·6	1882-83	221	120	54·3
1880-81	195	113	58	1883-84	334	159	47·6

An analysis of passes is given below. In English, Optional subject and History there has been a fall in the percentage of passes, notably under the last head, while there has been a slight increase under "Optional language" and "Mental Philosophy." The failure of one candidate out of every three in English, in which the minimum is only one-third marks, points to the necessity that exists for greatly improving the method of instruction in this language throughout the schools and

colleges of the country. Considering that most candidates have devoted from twelve to fifteen years to the unremitting study of English, it is unreasonable to suppose that far better results might not be secured than at present if the methods of imparting a knowledge of the language, more especially in the earlier stages, were more scientific than those now in vogue.

Analysis of passes.	1881-82.	1882-83.	1883-84.
Number examined	261	221	334
Number passed in—			
English	178	166	235
Optional language	244	211	324
Optional subject	206	167	240
Mental Philosophy	227	177	268
History	202	182	237

The results of the examination in the several optional subjects are given in the table below :—

Years.	Logic and Morals.		Mathematics.		Physical Science.	
	Examined.	Passed.	Examined.	Passed.	Examined.	Passed.
1879-80 ...	107	46	50	24	18	15
1880-81 ...	115	62	65	41	15	10
1881-82 ...	148	102	77	71	36	34
1882-83 ...	125	96	43	25	53	45
1883-84 ...	165	123	59	48	110	69

It augurs well, I hope, for the future progress of the Presidency in material well-being that the number of candidates bringing up Physical Science has increased six-fold during the quinquennium. Among the causes at work in attracting students to this branch is the belief that the possession of such knowledge is more likely to lead to remunerative Government employment; but as ere long all who seek will not be able to obtain such employment, the number of those who will be compelled to seek a livelihood by independent industry must be considerable, and, in the present politico-social condition of the country, a number of men possessing a fair knowledge of Natural and Physical Science, thus seeking employment, can hardly fail to help forward the development of the industrial and natural resources of the country. The number of candidates for the Logic and Morals branch has fallen from 56 to 50 per cent.; 81 per cent. of the candidates for the Mathematics branch met with success, while 74·5 and 62·7 per cent. of the candidates for the Logic and Science branches passed.

The results of the examination in optional languages are :—

Languages.	Examined.			Passed.			Percentage of passed candidates.		
	1882.	1883.	1884.	1882.	1883.	1884.	1882.	1883.	1884.
Sanskrit	40	33	53	36	28	50	90	85	94
Latin	9	10	8	7	10	7	78	100	88
Greek	...	...	1	...	...	1	...	...	100
Persian	...	2	3	...	2	3	...	100	100
Tamil	115	97	166	114	93	164	99	96	99
Telugu	35	32	33	30	32	31	86	100	94
Canarese	27	14	22	26	14	20	96	100	91
Malayalam	35	31	45	31	30	45	89	97	100
Hindustani	...	2	3	...	2	3	...	100	100
Total ...	261	221	334	244	211	324	93	95	98

Of the 10 failures, 3 were in Sanskrit, 1 in Latin, 2 in Tamil, 2 in Telugu, and 2 in Canarese. There has been an increase in the number of Sanskrit candidates.

A detailed list of the institutions from which the candidates appeared is appended.

UNIVERSITY EDUCATION.

Total ...	89	2	18	34	54	134	1	25	32	58
Private study	15	...	4	2	6	13	...	1	2	3
Grand Total ...	221	4	46	70	120	334	1	75	83	159

The largest number of candidates belonged to the Madras Christian College, which is followed by the Presidency College, but not very closely; as regards passes, the Presidency College heads the list with 50 men, while the Christian College passed 49 men. The Kumbakónam College passed a larger number than in the preceding year, though the success obtained was not proportionately so good. The Rajahmundry College and the Trivandrum and Bangalore Central Colleges passed 50 per cent. of the candidates they sent up. The Hyderabad College appears for the first time in the list.

F.A. Examination.

66. The results of the First Examination in Arts are summarized in the annexed statement. The number of examinees has risen by 42 per cent. and that of passes by 80 per cent. There is an increase in the number of candidates sent up by every class of institution; the number of private students has fallen. This indicates the growing tendency of students who have failed in previous examinations to resume their studies in colleges, a tendency which deserves the utmost encouragement for many cogent reasons. As regards passes there is advance under all heads, including private students, though the number of first-class passes has fallen.

General results.		Public institutions under the Madras Government.	Public institutions in Native States.	Public institutions receiving aid.	Public institutions not receiving aid.	Private study.	Total.
Examined ...	1882-83	243	112	308	59	61	783
	1883-84	363	164	458	76	49	1,110
Passed—							
First class ...	1882-83	14	4	12	1	...	31
	1883-84	8	6	13	...	...	27
Second class ...	1882-83	83	37	105	16	7	248
	1883-84	163	80	199	23	9	474
Total ...	1882-83	97	41	117	17	7	279
	1883-84	171	86	212	23	9	501

The percentage of passes during the last six years is given below :—

Years.	Examined.	Passed.	Percentage.	Years.	Examined.	Passed.	Percentage.
1878-79	663	172	26	1881-82	733	423	58
1879-80	582	295	51	1882-83	783	279	36
1880-81	478	167	35	1883-84	1,110	501	45

Forty-five per cent. of the candidates were successful against 36 per cent. in the previous year. The percentage is, however, below the two preceding alternate years (1879-80 and 1881-82). The succession of a year of failure to a year of success, upon which I dwelt at some length in the last report, is again evidenced by the results of 1883-84. My opinion as to the cause of this variation and as to the remedy which should be applied remains unchanged, but I have not yet seen my way to give effect to the proposed remedy.

An analysis of passes is given below. The percentage of passes has improved under all heads, History excepted, in which it has fallen from 76 to 72. Similar failure in this subject has already been noticed in the B.A. Examination. In English the percentage of success was only 65, which, considering that this is a year in which the proportion of third-year men was great, indicates the necessity for raising the standard of knowledge for a pass in the Matriculation Examination. In the optional language the percentage was almost stationary, viz., 92. Not less than 70 per cent. of the examinees succeeded under each of the other heads.

Analysis of passes.	1881-82.	1882-83.	1883-84.
Number examined	733	783	1,110
Number passed in—			
English	571	433	728
Optional language	709	728	1,025
History	651	597	805
Mathematics	538	458	784
Physiology	586	686	982

The results of the examination in optional languages are contrasted below :—

Languages.	Examined.			Passed.			Percentage.		
	1881.	1882.	1883.	1881.	1882.	1883.	1881.	1882.	1883.
Sanskrit	90	117	175	74	102	124	82	87	71
Latin	15	17	26	14	16	20	93	94	77
Persian	4	5	5	4	5	4	100	100	80
Tamil	353	358	510	351	341	501	99	95	98
Telugu	91	104	155	90	101	142	99	97	92
Canarese	61	67	84	58	65	80	95	97	95
Malayalam	114	112	150	113	96	149	99	86	99
Hindustani (Urdu)	4	2	4	4	1	4	100	50	100
Uriya	1	1	1	1	1	1	100	100	100
Total ...	733	783	1,110	709	728	1,025	97	93	92

The percentage of passes has fallen in Sanskrit, Latin, Persian, Telugu, and Canarese. In Tamil there was slight improvement. In Malayalam the percentage reached the figure of 1881. There has been a steady increase in the number of Sanskrit candidates.

UNIVERSITY EDUCATION.

A detailed list of the institutions from which students came up is subjoined.

The Kumbakónam College heads the list of Government schools with 63 passes, viz., with more than a third of the total number of passes from Government schools. The Mangalore College lost its place in the list, having passed 10 candidates only, while the Madura and Calicut Colleges passed 16 and 13 respectively. The Bellary College stands at the bottom of the list of Government colleges with 4 passes. The colleges in Native States did on the whole well, the Hyderabad College excepted, in which only 2 pupils passed out of 14 sent up. The aided colleges are headed by the Madras Christian College, which passed 67 out of 154 examinees.

The percentages of passes to examinees in the several classes of institutions were—

Departmental colleges	47
Government colleges in Native States	52
Aided colleges	46
Unaided colleges	30

Of the passed candidates, on the whole, 34 per cent. came up from the departmental colleges, 17 from the Government colleges in Native States, and 42 from aided and 5 from unaided colleges.

Classes of the community represented at the B.A. and F.A. Examinations.

67. The annexed statement gives information as to the classes of the community to which the successful candidates in the B.A. and F.A. Examinations belonged. The increasing eagerness of the Brahmans to obtain Western knowledge is well illustrated by this table. The proportion of Brahmans to the total number of passes has risen in a marked manner in both the examinations, while that of "Other Hindus" and "Native Christians" has fallen. No Muhammadan passed the B.A. Degree Examination, though 5 appeared, while 5 Muhammadans passed the F.A. Examination against 4 in the preceding year.

The number of first-grade colleges has risen from 8 to 9 owing to the opening of the B.A. classes in the Maharajah of Vizianagrum's College at Vizianagrum. The transfer of this college to the list of first-grade colleges and the raising of the St. Joseph's Institution, Cuddalore, and of the Lutheran Mission School, Tranquebar, to the status of colleges, have increased the number of second-grade colleges from 20 to 21.

There has been an increase of 72 pupils, or 16 per cent., in the strength of the B.A. classes: the increase in 1882-83 under this item over the figures of 1881-82 was 14 per cent. The advanced charge for collegiate education has therefore not materially affected these classes. But a similar advance has not taken place in the strength of the F.A. classes. While the figures in the last report showed an increase of 24 per cent., this report shows but a small advance, viz., 3 per cent. This is to be attributed to the late publication of the results of the Matriculation Examination and also to some extent to the change and advance in the fee rates. How slight has been the check caused by the latter is evidenced by the fact that in July last there were 1,585 students in the F.A. classes, while in July 1883 there were only 1,437 students—an increase of 10 per cent. In the last quinquennium the number of students has very nearly doubled in the B.A. and in the F.A. classes.

Movement of college students.

69. In the last report it was roughly calculated that only about one-half of the Matriculates join colleges annually, whilst two-thirds of the F.As. continue their studies for the degree. Detailed statistics are now available. Out of 1,739 Matriculates of December last, 388 were from Travancore, Maisur and other States and private

students. Most of these would either have joined the colleges in those States or discontinued their studies. This leaves 1,351 Matriculates, of whom 654 or 48 per cent. are returned as having joined the colleges connected with the department. The causes which temporarily reduced the number in these classes on the 31st March have been noted above. If allowance be made for the students who joined subsequently, the conclusion arrived at in the last report was probably not below the mark. As regards F.As., 501 passed last December, of whom 89 belonged to other States or were private pupils, leaving 412 students to continue their course in the colleges connected with the department. The returns show that 349 F.A. men of last December are at such colleges, and from this figure 48 should be deducted, being the number of Travancore, Maisur, Jaffna and Hyderabad pupils reading in the metropolitan colleges; hence it may be inferred that approximately 75 per cent. of the successful F.A. candidates continue their studies for the B.A. course, which is slightly above the rough calculation made last year.

Classes of the community to which the college pupils belonged.

70. The table annexed exhibits in detail the classes of the community to which the college pupils on the 31st March belonged.

Colleges.	Europeans and Eurasians.	Native Christians.	Muhammadans.	Brahmans.	Vaisyas.	Sudras.	Other Hindus.	Others.	Total.
Government	11	10	12	597	20	155	1	3	809
Aided	32	145	21	780	45	223	7	..	1,253
Unaided	...	..	...	76	2	32	..	3	113
Total ...	43	155	33	1,453	67	410	8	6	2,175

The Brahmans constitute two-thirds of the attendance at colleges, Sudras and Native Christians about 20 and 7 per cent. respectively. The number of Muhammadans has increased from 30 to 33, a very small proportion compared with the Hindus.

Distribution of college pupils according to wealth.

71. The subjoined table gives the distribution of college pupils according to wealth :—

Colleges.	Richer classes.	Middle classes.	Poorer classes.	Total.
Government	39	412	358	809
Aided	36	734	483	1,253
Unaided	6	43	64	113
Total ...	81	1,189	905	2,175

Nearly 60 per cent. of the pupils belonged to the richer or middle classes, which include all pupils whose parents or guardians have an annual income of Rs. 200 or upwards.

Classification of college pupils according to the occupation of parents or guardians.

72. The next table gives the classification of pupils according to the chief occupation of their parents or guardians.

Colleges.	Officials.	Petty officials and menial servants.	Traders.	Landholders.	Artizans.	Coolies.	Mendicants.	Others.	Total.
Government	223	107	43	365	6	1	8	56	809
Aided	386	108	97	423	2	...	21	216	1,253
Unaided	12	43	4	49	...	...	5	...	113
Total ...	621	258	144	837	8	1	34	272	2,175

UNIVERSITY EDUCATION

The landholders contributed the largest proportion of college pupils, 39 per cent.; officials and petty officials and menial servants together supply 40 per cent., and the traders 7 per cent. The occupation of parents of 13 per cent. of the pupils is not known. That 34 sons of mendicants and the son of a cooly should be receiving education in our colleges is full of significance. The very small representation of artizans and of the trading classes is much to be regretted, as upon the growing intelligence of these sections of the population the material advance of the country must in a great measure depend. Of the pupils in Government colleges, 40·8 belonged to officials or petty officials and menial servants, while 39·4 per cent. of the pupils in aided colleges were so circumstanced.

First-grade Colleges.

Presidency College.

73. The strength of the college at the close of the year was 265 against 254 at the beginning. The increase was, however, confined to the B.A. classes, the F.A. classes showing a decrease of 14 pupils. The decrease has since been partly made good, as on the 1st August there were 114 students, the number in the second department being only 5 less than on the 31st March 1883. The causes of the temporary check in the second department of most colleges have already been noticed. The policy of withdrawing from secondary education and limiting the work of the institution to the University arts course, begun in the preceding year, was continued in this by the abolition of the upper fourth class in January 1884. The funds thus set free were utilized for strengthening the tutorial staff in the college, two teachers of the junior department being required to assist in that department. The annexed statement, which indicates fairly the proportionate demand for higher education in the several parts of the country concerned, gives the distribution of the pupils on the 31st March in the Presidency and Madras Christian Colleges and also the number of students studying in colleges in the districts and States from which students appear for the University examination in arts. It will, however, be observed that the total attendance in colleges at Madras is 808, little more than double the attendance at the colleges in Tanjore. It is noteworthy also that there were only 284 Madras students in its colleges, a number far exceeded by Tanjore and exceeded by Trichinopoly, and closely followed by Malabar.

Of the students in local colleges only 183 are in the senior (or B.A.) department, whilst in the Presidency and Christian Colleges respectively the numbers were 160 and 183. Only a fourth of the pupils in the Presidency College and a little more than a third of the pupils in the Madras Christian College were natives of the Madras and Chingleput Districts, the remaining pupils having come from the Presidency generally. The preference exhibited for the metropolitan colleges is probably due not only to the laudable desire on the part of parents to give their sons the benefit of the wider culture which it may be presumed is imparted by a residence at the capital and by attendance at colleges possessing strong professoriates, but also among other things to the fact that until recently no provincial colleges were able to impart efficient instruction in Natural Science. Of the students who selected this branch at the degree examination of 1884 no less than 77 per cent. were from the Presidency and Christian Colleges. It will be observed that although there are now two first-grade colleges in the Northern Circars, no less than 33 pupils came from this province; and although there are two first-grade colleges in the Tanjore District, no less than 135 pupils attend the Presidency and Christian Colleges from the Tanjore, Madura and Tinnevelly Districts.

The following extracts from my review of the Principal's report point to the chief incidents in the year's working of the college.

Mr. Thompson's connection with the college ceased towards the end of the year on his retirement from the service of Government. During more than 21 years had this gentleman occupied the important office of Principal, and he has been in great measure the means of raising the institution to the high position it now holds in South India. The Director fully endorses the remarks made by Dr. Duncan of this officer's valuable and indefatigable services, and trusts that the action which has been taken to commemorate them will result in the establishment of a memorial which will be commensurate with Mr. Thompson's claims on the respect and gratitude of a large number of the educated portion of the community.

To the post of Principal, Dr. Duncan, Professor of Logic and Moral Philosophy, has been appointed, Mr. Thompson's chair being filled by Mr. Bilderbeck, who was succeeded in the chair of Mathematics by Mr. P. Ranganatha Mudali, who had long acted as Professor. Dr. Oppert returned to duty, in consequence of which Mr. Seshagiri Sastri reverted to his place as Superintendent of Vernacular Studies. The Law department was strengthened by the appointment of an additional Professor, the post having been conferred by the Government on Mr. V. Bhashyam Aiyangar. In the department of Science, Surgeon Fuller at the end of the year was appointed to act for Dr. Wilson, who proceeded to Europe on sick leave. The abolition of the middle department placed the services of Messrs. Williams and Winfred at the disposal of the Principal in the college department. An efficient gymnastic instructor was appointed and a change was made in the office of librarian.

In the arts branch of the college there has been moderate increase compared with the figures of the two previous years—

	1882.	1883.	1884.
B.A. class	117	135	160
F.A. do.	94	119	105

The increase in the B.A. classes is decided and satisfactory, although there was a slight falling off in class IV assuming there were no admissions on 1st April. The decrease in the F.A. class has not been explained, but is probably due to the rapid development of second-grade colleges in the provinces. The rise of senior classes necessitates the strengthening of the teaching staff and probably the sub-division of the classes. The abolition of the high school department at the close of this year will set the necessary funds free.

The rapid extension of second-grade colleges might have been expected to tell on the attendance of the college, but whilst only six districts show decrease aggregating 17 students, eleven districts show increase aggregating 69 students. With the single exception of Nellore, all the districts showing increase have one or more colleges, whilst three out of the five districts showing decrease have no colleges. The inference appears to be that the advance of higher education in the provinces is favorable to the advance, at least, of the first-grade Presidency colleges.

The success of the college in the University examinations was marked, that in the B.A. Examination being especially noteworthy. The percentages compared with those of last year are as follow :—

UNIVERSITY EDUCATION.

	1882-83.	1883-84.
B.A.	68·4	60·2
F.A.	34·3	42·6

The Arni gold medal has again fallen to a student of the college.

Dr. Duncan's remarks regarding the success of the middle department are endorsed. The school has secured excellently the object for which it was re-established, but as that object can, it is hoped, now be otherwise attained, its abolition was deemed expedient. The number of students taking up Physical Science is now nearly as great as that taking up Logic and Morals. It is not desirable to admit more pupils to the science classes than the laboratory can accommodate. The proposals of the Principal for extending the accommodation are awaited.

The Law department was reorganized towards the end of the year. The increased strength of the classes, although the fee was raised from Rs. 30 to Rs. 50 the term, is gratifying, as also the marked improvement in the tone of the class.

The re-arrangement of the library, the issue of a new catalogue, and the use made of the consulting library are among the satisfactory features of the year's report.

It is hoped that the interest of students in the gymnasium will not be permitted to flag. The institution of periodical competitions will tend to secure the popularity of the exercises. The condition of the tennis club is encouraging.

The Director notes with pleasure the success which so far has attended the introduction of the new scheme of fees. He trusts there will be no necessity for the grant of concessions regarding fees on the re-opening of the college.

The history of the year reflects great credit on Dr. Duncan and his colleagues.

Regarding Mr. Thompson, Dr. Duncan writes :—

Mr. Thompson's connection with the college terminated on the 5th March of this year. Appointed Principal in 1862, Mr. Thompson has held the office for 21½ years—a period covering nearly the whole of the time during which this institution has been preparing candidates for the University examinations. With the exception of about twenty who were educated under Mr. Powell, all the graduates who look to this college as their *alma mater* have been pupils of Mr. Thompson. And thus it comes about that of the twelve hundred graduates of the University scattered throughout the Presidency, Mr. Thompson can probably claim a larger number than any other educationist in Southern India. To say that his name will be held in enduring remembrance by them will appear like a truism to those who knew Mr. Thompson's devotion to his work and the warm interest which he took in his pupils, not merely while they were members of the college, but throughout their after-life. It is in contemplation, I believe, to perpetuate his name in a way which will be most gratifying to himself, by connecting it with something that will be either useful or ornamental to the college he loves so well and in which he spent the best years of his life. By the college staff generally Mr. Thompson is remembered as a straightforward, considerate chief, who ever set the example of conscientiousness in the discharge of duty. His name will long be cherished with affectionate esteem by the Professors, to each of whom he was known as a warm friend, a judicious adviser, and a genial companion.

I also quote *in extenso* his remarks on the library, the gymnasium, and the fees.

The Library.—Since the date of the last report the library has been re-arranged and a new catalogue printed, according to which the number of separate works is 1,787 and of volumes 3,629. Since the catalogue was printed, presentation copies of several Indian books have been received, besides forty volumes of the valuable *Oriental Series* published by Messrs. Trübner and Co. As soon as the books indented for in May last have been received a supplementary catalogue will be printed. In this connection I may mention the serious inconvenience of the present system of procuring books both for the library and for prizes. The indents are usually sent in early in the month of May, but the books are not received till April of the following year. This not only prevents the anniversary of the college from being held at the most convenient season, but also renders it impossible to supply the library with books recently published: few books reaching us within eighteen months or two years of the date of publication.

The consulting library continues to maintain its popularity and usefulness; the number of consultations from 1st January to 31st December 1883 being 7,858, of which only 151 were by professors and masters. A peon on increased pay was sanctioned for this library, which is at present located in the same room as the general library. I have been consulting with Dr. Oppert, the Curator of the Oriental Manuscripts Library, with a view to ascertain whether, on the closing of the high school, it will be possible to find for his valuable library other accommodation than the present within the building, but as yet no arrangement has been sufficiently matured to justify me in laying it before you.

Gymnasium and Field Games.—Mr. Clayton Cotter entered upon his duties as gymnastic instructor on the 1st April 1883. The interest of the pupils in the exercises was kept up fairly well throughout the year 1883; but since the beginning of this year I have observed signs of flagging interest, manifesting itself in irregularity of attendance and in the frequency of the

applications I receive for entire exemption from the work of the class. It was intended to have a competition towards the close of 1883 or early in 1884; but the pressure of other work on those going up for the University examinations rendered it difficult to organize a meeting before Christmas, and the slowness with which some of the classes have been formed this year, on account of the delay in the publication of University results, has made it impossible to do anything this year.

The tennis club, which is a purely voluntary society, consisting of professors, masters and pupils, continues to prosper.

Fees.—The system of charging and collecting fees by the term, which was introduced at the beginning of the year, has been worked with a success far beyond my anticipations. Not that I ever anticipated any serious difficulty of a permanent character; but it was natural to expect that at first there would be obstacles of a temporary kind to overcome. In point of fact, however, these latter have been too few and unimportant to be worthy of mention. The fee is paid in a lump sum, the system of instalments not being followed either in the school or college. At this date out of 94 pupils in the high school, 68 have paid the fee for the term; while of the 265 pupils of the college 211 have paid, and of those who have not yet paid, several are free scholars. This result is all the more gratifying since it has been achieved without the least attempt at pressure; a notice on the board that the fees would be received being the only intimation the pupils have required. I can hardly suppose that this gratifying experience I have had of the new system is due in any great measure to the easy circumstances of our pupils. It is owing, I think, mainly to the appreciation of the new system on their part and their loyal readiness to co-operate with myself and my colleagues in all matters affecting the welfare of the college.

Kumbakónam College.

74. The strength of the Kumbakónam College has fallen to 209, due among other causes to a larger number of pupils from the town and district resorting to the colleges in the Presidency town. The fact is in no way to be regretted. Twenty-three passed for the B.A. Degree and 63 for the F.A. Examination against 15 and 37 respectively in the previous year. The following are my remarks on the working of the college during the year.

Staff.—Mr. Stuart was in charge of the institution during the whole year; Mr. S. Seshayya occupied the post of first assistant during the greater portion. The scale of establishment was strengthened by the addition of a science lecturership carrying a salary of Rs. 200–250; also by provision for a teacher of gymnastics. The latter post was filled in September, the former in July.

Attendance.—The strength of the college has fallen from 271 and 249 at the close of 1881-82 and 1882-83, respectively, to 209, but Mr. Stuart remarks that it is not desirable to increase the number of students until the present building is considerably enlarged. The junior B.A. and the junior F.A. classes have increased, but in the corresponding senior classes there has been considerable falling off. The decrease in the senior F.A. is satisfactorily explained as due to strictness in the matter of promotion. On no account should a student be promoted who is not fully competent to read in the class which he desires to enter. The migration of students is chiefly confined to those belonging to the Tanjore District, excluding the town of Kumbakónam, as it appears that the number of students from the taluk of Kumbakónam and the district of Tanjore fell by 43, whilst that from other districts remained stationary. There was a small increase in the town of Kumbakónam. As there was an increase of 13 students in the Presidency College, and of 14 students in the Christian College, most of the students concerned appear to have gone to the Presidency, and in some ways the change is not to be regretted.

Tamil is the only vernacular taught in the college. It is doubtful, if provision were made for teaching a second or third vernacular, whether many students from the districts concerned would attend the college. The teaching of Sanskrit will, it is hoped, in time be entrusted to a graduate with a good knowledge of English, of the principles of philology and of the history of languages.

Athletics.—It is very satisfactory to find that the practice of gymnastics is becoming more popular, and that the students engage every evening in various out-door exercises. The Director hopes that Mr. Stuart may see his way to establish an annual prize competition. An indent may be submitted for providing a more complete set of apparatus for the gymnasium.

Fees.—The arrangements made for introducing the new system of fees were judicious, and the new scale does not appear to have been a hardship to the students. It will probably be unnecessary to make any concession as regards payment next term.

Examinations.—The results of the B.A. Examination were not as satisfactory as could be desired. Greater stringency in the matter of promotion will, it is hoped, ensure better results in future. Including old students in the F.A. Examination, 63 candidates passed out of 131 examined. Of 79 students in the senior F.A. class, 43 passed. The results are much more favorable than in the preceding year.

Boarding-house.—The Director trusts the Principal will be able to try on a small scale the experiment of lodging and boarding students, as, unless such an experiment is successfully made, it is hardly desirable to embark on the larger scheme in the present circumstances.

UNIVERSITY EDUCATION.

Grounds.—No mention is made of the improvements which, it is believed, were carried out in the college grounds. The information should now be supplied. In future reports a short account should be given of the financial condition of the institution.

Regarding the introduction of the new rates of fees, promotions, and the results of the Matriculation Examination Mr. Stuart writes :—

The new system of fees was introduced in the beginning of 1884, the fee for all classes being fixed at Rs. 31 per term of six months. For the first term I arranged that students should pay Rs. 5 upon entrance, Rs. 20 on 10th March, and the remainder Rs. 6 on 10th April. I cannot find that the new scale of fees has proved a hardship to the students; and though a few may have been prevented from joining the college by the increase of fee, yet the number of matriculated students who entered the college this year is greater than the corresponding number last year, and quite as great as can, in existing circumstances, be efficiently taught.

The usual college examination was held in December last. It was conducted by the college staff with the assistance of Mr. S. Krishnaswami Aiyar, B.A., Mr. Murugasam Pillai and Mr. Sadagopa Chari of the Town High School, Mr. Ranganatha Rau, B.A., and Mr. Damodaram Pillai, B.A., to all of whom I take this opportunity of expressing my best thanks.

In both the classes that were examined about 25 per cent of the students were not promoted; in other respects the results of the examination were satisfactory. As a rule, those students who were not promoted left the college, and either discontinued their studies or found admission into other colleges. This accounts for the decrease in numbers of the senior F.A. class in 1884 as compared with that of 1883, when I was not so strict in the matter of promotions.

For the B.A. Examination of the Madras University 56 students of the college were examined, of whom 23 passed, or 41·07 per cent., the average throughout the Presidency being 47·6 per cent. Of these 56 students, 47 belonged to the senior B.A. class of 1883, and of these 47, 16 passed (eight in the second class), or 34·04 per cent. This result is of course very poor; but the measure of success achieved, small as it was, exceeded my expectations and the expectations of all those members of the college staff who had anything to do with the senior B.A. class of last year. I trust that my year's experience of the working of the University examinations may enable me so to regulate promotions as to ensure that none but properly qualified candidates may appear for such examinations, and that consequently better results may be obtained in future.

For the First Examination in Arts 131 students of the college appeared, of whom 63 passed—4 in the first class, the percentage of passes being 48·1 per cent., the average throughout the Presidency being 45·1 per cent. Of these 131 students, 79 belonged to the senior F.A. class of 1883, and of these 79, 43 passed (4 in the first class), or 54·4 per cent. These results are very much better than those of last year.

Rajahmundry College.

75. There has been a falling off in attendance from 87 to 78, but the decrease was confined to the F.A. classes, the B.A. classes showing an increase of 7 pupils. The decrease in the F.A. classes has since been partly made good, as in July the number was 67, only 4 less than on 31st March 1883. The following are my notes on the working of the year :—

Staff.—There was but one change in the staff, Mr. Sconce having been transferred to the Calicut College. His place was taken by Mr. C. Sundara Rau, B.A.

Proposed abolition of the Fifth Class.—One of the fifth-class masters having applied for leave, the two divisions of the class were amalgamated and placed in charge of Mr. B. Gavarrazu, B.A. Owing to the opening of cheaper classes in the town, the strength of the united divisions was reduced, and as Mr. Gavarrazu had given notice of resignation, it became a question whether the fifth class ought not to be abolished. Although upper secondary classes cannot be maintained at any recognized school in the town which does not levy fees at the prescribed rates, and consequently this cause for the reduction in strength could soon be removed, the Director has issued instructions for the abolition of this class, partly because he considers it preferable to expend the money now expended on the school department on the development of the college department, and partly because he believes it preferable to leave all precollegiate education in a town like Rajahmundry to Municipal and private agency, so soon as such agency is capable of doing the work efficiently. These classes have been abolished at Kumbakónam and will be closed this year in the Presidency College.

College examinations.—The classes not entering for the University examinations were examined by Mr. Metcalfe, his assistants, and certain native gentlemen. To the latter the Director expresses his obligations. The results were satisfactory. In the junior F.A. class 16 out of 25 succeeded, and in the junior B.A. 5 out of 7. These results must be considered good.

Public examinations.—The Matriculation results were not satisfactory, only 17 having passed out of 53. The failure is stated to be due to the unusual difficulty of the Sanskrit papers, some of the best pupils having failed in Sanskrit alone. Making allowance for this, the Director must regard the results as not creditable to the teachers concerned.

In the F.A. Examination 21 passed out of 38—a fair proportion considering that the class, according to Mr. Metcalfe, was the most unpromising the college ever had.

The B.A. Examination was a successful one, 5 out of 8 having passed, 4 obtaining good places in the second class and 1 gaining the Goday Vari prize for the highest marks in Sanskrit. This success is noted with much satisfaction.

Strength of classes.—Some of the classes had declined in strength, the senior B.A. and senior and junior F.A. included, although the figures, with the exception of the eighth and fifth classes, were all higher than the figures of 1881-82. The strength of the college department was nine more than in the preceding year, but twelve greater than that of 1881-82, although in the mean time college classes had been opened at Cocanada, but there was a decided increase in the junior B.A. class owing, the Director is glad to find, to encouragement given to graduates by the local revenue authorities and to the announcement restricting certain appointments to men of University qualifications.

Fees.—The new scale of fees for colleges and schools not in competition and the system of instalments were introduced without difficulty in April last. The melting away of the fifth class is probably due mainly to other causes, having, in truth, little connection with the fee question. The Director trusts with Mr. Metcalfe that boys and parents will soon become reconciled to the change.

Gymnastics.—A complete set of apparatus had been supplied and a shed had been erected. The Director is glad to find that considerable progress had been made by the students, and hopes that Mr. Metcalfe will see his way to the institution of annual contests for proficiency in gymnastics and games at a fixed time.

Play-ground.—The want of a sufficiently extensive play-ground is felt. Mr. Metcalfe is requested to make definite proposals regarding the ground which, he says, may be made available so soon as he ascertained the precise amount for which the site can be secured for Government. Possibly the Municipality might, in view of the benefit they derive from the presence of the Government college, make a grant-in-aid towards the purchase.

Agricultural instruction.—The Director trusts that before long, with the steps which have been taken, an effective scheme of agricultural instruction in connection with the science branch which it is proposed to constitute will be introduced.

New Buildings.—These are stated to be proceeding towards completion, and the Director trusts that sanction will be given for the construction of a suitable entrance to the main hall.

Library.—It is very satisfactory to find that the library was extensively used. Mr. Metcalfe's proposal to employ two senior students as assistant librarians, in consideration of their being exempted from the payment of fees, is approved experimentally for the current year.

Physical apparatus.—The apparatus is reported to be in good order. When submitting proposals for introducing science in the senior department, Mr. Metcalfe should consider the additions which will be immediately necessary.

Poor Scholars' Fund.—The Director is glad to find that the Poor Scholars' Fund is prospering, and hopes that ultimately it will be placed on a lasting basis.

Muhammadan Boarding-house.—The fund for the establishment of the boarding-house is said to be thriving, and the thanks of the department are due to His Highness the Maharajah of Vizianagrum, who, with his usual liberality, has promised a subscription which will enable the committee to open the establishment. Before the aid of Government can be sought, it will be necessary that the scheme of the institution be elaborated and rules regulating its conduct approved.

Districts to which students belong.—The proportion of the students belonging to the Godávari District has increased, whilst the number of ex-Godávari students has fallen from 32 to 23. Last year five districts were represented; this year the number had fallen to three, viz., the Ganjam, Vizagapatam and Kistna Districts. There were only three ex-Godávari students in the senior college classes—a number far below the number of students of the other districts of the Northern Circars studying in the same classes at the Presidency—a fact which shows that this college is materially still only taken advantage of by the people of Godávari.

Classes of population.—No information is given regarding the classes of the population represented, nor the respective wealth of the students. Information should invariably be given on these points. No mention is made of the annual distribution of prizes.

Mr. Metcalfe's remarks on agricultural instruction, buildings and library and poor scholars' fund were as follows :—

Agricultural instruction.—I addressed you some time ago on this subject, urging the great benefits which students of these two eminently agricultural districts—the Godávari and the Kistna—would derive from a course of agricultural instruction, and you were good enough to request the Local Fund Board to take the scheme into consideration and give it their support. I have lately received a communication from the President asking for a detailed scheme and an estimate of the probable outlay, which encourages me to hope that the proposal may in due time be carried into execution.

UNIVERSITY EDUCATION.

New buildings.—The additions to the college building are proceeding towards completion. I trust they will be ready soon after we re-assemble.

As I pointed out to you on your recent visit to this station, the appearance and convenience of the building will be greatly enhanced by the construction of a suitable entrance to the main hall. I have accordingly asked the Public Works Department for a plan and estimate of the proposed alteration, which has been submitted to Government and I hope will be sanctioned.

The library continues to be extensively used by the students, and when the books are transferred to the new room, the references to it will be greatly multiplied. With a view to throw it open to students out of regular school-hours, when we cannot expect the librarian, who is also the college writer, to attend to the supervision, I would suggest the appointment of two trustworthy senior students, who, in consideration of being excused their fees, should, in turn, act as librarians in the absence of the college writer, viz., during recess hours and on holidays.

The Poor Scholars' Fund.—With the object of encouraging a spirit of self-help among the students and to counteract the ill-effects of too much charity, we have established a Poor Scholars' Fund, in which you were good enough to take much interest. I am glad to say it is prospering. It has lately received a donation of Rs. 100 from a former student, now a merchant in Berhampore.

Madras Christian College.

76. There has been an increase of 20 pupils in the B.A. and a falling off of 9 pupils in the F.A. classes. Forty-nine pupils passed the B.A. and 67 the F.A. Examinations against 30 and 44 respectively in 1882-83. My remarks on the year's working were as follows :—

As the Inspector of the Third Division is no longer required to report on the college department of this important institution, it is necessary that the working of that department in the past year should be briefly noted on; that of the school departments has been already reviewed in Proceedings No. 8539, dated 20th December 1883.

Staff.—The college was placed at considerable disadvantage during the year by the absence for several months of the Principal, but his place was ably filled by Mr. Rae. Mr. Alexander, although no longer a member of the college staff, aided the college authorities during Mr. Miller's absence. It is noted with satisfaction that four college tutorships have been established—two in English, one in Philosophy, and one in History. "The duties," it is stated, "of the tutors have not yet been exactly defined, but at least exercises and essays will be more frequent and more carefully corrected than has been possible without such help in classes so large" as those of the college. The decision of the Council to establish a separate Professorship of Mathematics the Director has learnt with much pleasure.

Strength.—The number of pupils on the rolls has increased from 1,333 to 1,405, the college department containing 398 under-graduates against 348 in the preceding year. The strength of the junior and senior college divisions is not shown separately, nor are the students distributed under the great statistical heads of population, nor is it stated from what parts of the province the students chiefly come. No information is given as to the number of stipendiary and free scholars. In estimating fully the work of the college, information on all these points is desirable.

Examinations.—The number of students who went up for the several University examinations is not stated, but comparing the number passed in each with that of the preceding year, the result must be regarded as decidedly creditable, except in the Matriculation Examination, in which the percentage of passes admits of considerable improvement. It is noted that the college had the honor of obtaining the only first class given in the B.A. Examination.

Finance.—The income from fees, which has, however, not been distributed between the college and school departments, reached the large sum of Rs. 31,752 against Rs. 28,137 in 1882 and 25,773 in 1881; being an increase in two years of over 20 per cent. The Council reports that about 36 per cent. of the outlay in the college department is met from fees and 72 per cent. in the school, but, according to the official returns, the distribution should be 38 and 66 per cent. respectively. The income from fees, supplemented by provincial grant, sufficed to meet about two-thirds of the cost of the institution (Rs. 66,600), the balance being met by a grant from the Foreign Missions Committee of the Free Church of Scotland. The Director notes that the additions to the buildings, so long needed, have been begun, and that it is estimated that the total cost of building is not likely to fall short of Rs. 86,000. The grant-in-aid promised by Government for the building amounts to rather less than one-fourth of this sum.

Library.—This branch of the institution continues to work with marked success.

Physical education.—It is noted with much pleasure that regular classes for instruction in gymnastics have been opened, and the hope of the Council is shared that the next report will show "progress in this important part of a perfect training."

Prizes.—Six prizes were instituted during the year, one being in value Rs. 150, and having for its object the encouragement of graduates to prosecute their studies to the M.A., B.C.E., or M.B. and C.M. Examination. It is satisfactory to note that the second prize for the encouragement of students who have passed the F.A. Examination was gained by a Muhammadan, Ahmad Husain.

The establishment of a magazine in connection with the college is noteworthy in the history of education in South India, and it is hoped that it will continue to receive adequate support from all those who are laboring to make the increase of knowledge in India develope all that is good and noble in the people.

Doveton Protestant College.

77. The strength of the B.A. classes remained stationary, but that of the F.A. classes has fallen from 24 to 18. There was no tenth class in 1883, and hence no student appeared for the last B.A. degree. Only 1 pupil having succeeded in the last F.A. Examination, no junior B.A. class was formed in the current year. The results achieved by this college, which receives an annual grant of Rs. 4,850, is not all that can be desired.

Tanjore S.P.G. College.

78. This institution suffered in attendance in the F.A. classes as other institutions. In the B.A. Examination it passed 5 out of 16 against 5 out of 7 in the previous year. In the F.A. Examination, however, 28 passed out of 49 against 9 out of 36 in 1882.

Trichinopoly St. Joseph's College.

79. The attendance has risen from 94 to 173, the F.A. classes having more than doubled. Only 4 pupils passed the last B.A. Degree Examination out of 17 examinees. Out of 30 pupils for the F.A. Examination, 19 passed.

Trichinopoly S.P.G. College.

80. There has been an improvement in attendance, 136 against 111, in spite of the existence of another college in the town. In the F.A. Examination 29 candidates out of 63 met with success against 12 out of 31 in the preceding year.

His Highness the Maharajah's College, Vizianagrum.

81. The attendance of the F.A. classes has risen and 6 pupils were reading in the junior B.A. class. For the last F.A. Examination 20 candidates appeared, of whom only 6 succeeded.

Second-grade Colleges.

Berhampore College.

82. The numbers have declined. In the last F.A. Examination 5 pupils succeeded out of 10 sent up.

Bellary College.

83. The strength has risen to what it was in 1880-81, viz., 19. In the F.A. Examination 4 passed out of 8 against 2 out of 7 in 1882.

Cuddalore College.

84. There has been a slight fall in numbers. The results of the last F.A. Examination were fair, 6 boys out of 11 having been successful.

Salem College.

85. The strength has fallen slightly. The results of the last F.A. Examination were fair.

Madura College.

86. The attendance has risen from 61 to 68, and in the F.A. Examination 16 pupils passed out of 25 against 7 out of 13 in the previous year.

Calicut College.

87. The strength has fallen by a third. Only 13 pupils passed the last F.A. Examination though 42 were sent up.

Mangalore College.

88. There has been a rise of 50 per cent. in attendance. Only 10 candidates passed the last F.A. Examination.

Vizagapatam Hindu College.

89. There has been a slight falling off in attendance. Out of 11 appearances for the last F.A. Examination only 4 succeeded.

Cocanada Pithápuram Rajah's College.

90. The attendance was stationary. The institution has not yet commenced sending in pupils for the F.A. Examination.

Masulipatam Noble College.

91. There were 31 pupils at the close of the year against 30 at the beginning. For the last F.A. Examination 19 candidates were presented, of whom 4 were successful.

UNIVERSITY EDUCATION.

Pachaiyappa's College.

92. The attendance was stationary. The results of the F.A. Examination were fair, 17 pupils out of 34 entrances having succeeded.

St. Mary's Seminary.

93. There is an improvement in strength from 3 to 10 owing to the opening of the senior F.A. class early this year.

Cuddalore St. Joseph's Institution.

94. The college department opened in the beginning of this year contained 10 pupils.

Negapatam Wesleyan Mission College.

95. Owing to the opening of the senior F.A. class the strength has risen from 16 to 29.

Tranquebar Lutheran Mission College.

96. The junior F.A. class recently opened had 7 pupils on 31st March.

Tinnevelly C.M.S. College.

97. A slight falling off in attendance has taken place. Only a third of the candidates for the last F.A. Examination met with success.

Tuticorin Caldwell College.

98. The attendance has improved. The results of the F.A. Examination were creditable, 7 pupils out of 10 having succeeded.

Tinnevelly Hindu College.

99. There has been an improvement in the strength. Twenty-three went up for the last F.A. test, of whom 12 passed, 1 in the first class.

Coimbatore College.

100. The attendance has risen from 54 to 62; for the F.A. Examination 33 candidates appeared and 15 passed.

Mangalore St. Aloysius' College.

101. There were 28 pupils against 17 last year. Out of 10 entries for the F.A. there were 5 passes.

Calicut Kerala Vidyasala.

102. The numbers were stationary. The F.A. results were unsatisfactory, less than a third of the candidates sent up having met with success.

(*b.*) LAW.

General results.	1881-82.	1882-83.	1883-84.
Examined	48	68	60
Passed—			
First class ...	...	1	...
Second do. ...	1	...	12
Third do. ..	11	7	20
Total ...	12	8	32

Faculty of Law.

103. One candidate appeared for the M.L. Degree Examination, but he failed to pass. For the B.L. Degree Examination, the general results of which are given in the margin, 60 appeared and 32 passed, 12 being placed in the second class. The results contrast very favorably with those of the preceding years.

Law Class, Presidency College.

104. Radical changes in the working of the Law Class were sanctioned last year and an additional professor has been appointed. The work is divided between the two professors according to a scheme approved by the department, each professor giving tutorial class instruction in addition to instruction by lectures. The scheme as originally devised gave this tutorial work to a separate teacher, according to the mode of instruction laid down by the Law Society, but it was finally decided to entrust experimentally both branches to the same teacher. The strength has risen from 112 to 115 though the term fee has been raised from Rs. 30 to Rs. 50.

(*c.*) MEDICINE.

Faculty of Medicine.

105. The results of the several University examinations in medicine are given in the following table :—

Medical College, Madras.

106. The following extracts from my review show the working of the college.

Changes among Professors and Assistants.—The changes in the teaching staff of both professors and assistants were numerous; and the Director has to record, with much regret, the decease of Professor Rogers, Professor Harvey and Mr. Hamilton, and of the Librarian.

Dental Surgery.—Mr. Gould having joined the college, a course of Dental Surgery was delivered to the outgoing students of the second department, who were also taught practically at the General Hospital. The introduction of regular instruction in this branch of surgery under a competent professor is a new and satisfactory feature in the history of the college.

Midwifery.—The Principal points out that next year there will probably be one female student in the class qualifying for the Degree of Licentiate, and that, if so, arrangements will have to be made for a course of lectures for her, the Syndicate being unwilling to accept the certificate of the Apothecary of the Lying-in Hospital. The matter is receiving attention.

Professors' Reports.—In Hygiene the practical work done was of a limited character, and efforts towards improvement in this respect are contemplated when the additions to the college building are made. Until then it seems hardly necessary to take into consideration the professor's suggestion that the course of Practical Hygiene should be attended only by such students as seek to qualify specially in sanitary science.

The Director is glad to note that a good start was made with the class of Practical Physiology, there having been a timely arrival of twelve good microscopes. The class, though large, went through a tolerably good course of training, both in the construction of the microscope and in the mounting and examination of specimens. The following is a summary of the statement in the report showing the number of lectures and examinations during the winter and summer sessions :—

Total number of lectures	839
Total number of examinations	411

Strength of the institution.—The senior department shows an increase of 25. At the close of the last session there were 88 students including 3 females. At the commencement of the present session there were 113. 12 students withdrew during the year and 1 died. The second department also shows an increase, viz., 84 against 65 at the end of the preceding session. Thus the total strength of the institution, excluding the junior department, which was abolished, was 197 against 153, an increase of only 29 per cent. At the close of the session, 1882-83, there were 27 native medical pupils, all of whom were transferred to the Auxiliary Medical School at Ráyapuram. It is satisfactory to note that every class of the community was represented, Europeans and Eurasians forming three-fifths of the total attendance. The presence of so many Brahmans and Native Christians is noteworthy, the latter as indicating the energy of this branch of the community, the former as indicating the growing decline of the prejudice of the highest caste of Hindus to the exercise of the art of healing. The insignificant representation of Muhammadans indicates the low general educational attainments and the apathy of the Muhammadan population of South India, as there is amongst Muhammadans no prejudice against the adoption of the profession by men of their race.

Senior Department.—It is gratifying to note that most of the students have made good progress, and that, without exception, their conduct has been satisfactory. As observed, the results of the University examinations were very creditable. Of 19 candidates who presented themselves, only 2 failed. There is still much difference between the number in the senior department and the number which goes up for the University examinations, and this is due to the natural preference, as often explained, shown for British degrees. It is matter for regret that the Madras University has not been able to get its degrees recognized in England, such recognition being impracticable under the Medical Act of 1858, but it is probable that, with the local encouragement now given to students of the college who hold Madras degrees, there will be a rapid rise in the number of candidates seeking them. This, in fact, is exemplified by the number, 50, going up this year; and it is particularly gratifying to find that, among the

UNIVERSITY EDUCATION.

intending candidates, 22 are from the second department, who hope thus to add a University diploma to their Apothecary's certificate.

Lady students.—The professors' reports show that the class, consisting of 10 students, made progress. Mrs. VanIngen was to have appeared in a few days for the First L.M. and S. Examination. Miss D'Abreu and Miss Abala Das are to go up next year for their University examinations. Miss Ramsbotham of the second department appeared for her final examination and has been pronounced qualified for the work of a medical practitioner. Misses Yerbury, Smith and Stewart appeared for the first or primary examination and passed creditably. Misses Govindurajulu, Jacobsz and Gurdial Sing had just completed their first year of study. The entrance examination for female candidates is now the Higher Examination for Women. It is hoped that in time the University entrance examination may take its place as assuring a wider range of necessary general knowledge.

Former students in England.—Mr. Barefoot headed the list of successful candidates for the Army Medical Department in February last. Mr. Eades, Johnstone medallist, after a four years' course, went to Europe, and, without further training, obtained a diploma in Medicine and Surgery entitling him to register as a medical practitioner in Great Britain. Several other students also went to Europe to continue their studies. This migration to European schools is in every way to be commended, but it would be an advantage to the college if students postponed their departure until they had secured the degree of the local University.

Museum.—The museum received some valuable additions.

Library.—The professors' library contained 5,882 volumes, inclusive of 65 added during the year. Qualified medical practitioners have been permitted the use of the library, but not to remove the books from the reading room. The students' library contained 2,016 volumes, and the students appear to have made good use of the facilities afforded for reading and reference.

Students' sports clubs.—These are working satisfactorily. They continued to receive the liberal support of the professors.

Endowments.—It is very gratifying to note that His Highness the Maharajah of Travancore has generously given Rs. 6,000 for founding a scholarship tenable by women and to be called the "Bharati Lekshmi scholarship." His Highness also gives a gold medal yearly to the best female student in Midwifery. The Director joins in the hope that wealthy members of the community will be induced to found scholarships to assist in the course of study poor but talented youths, now that gratuitous education is to cease.

(*d.*) CIVIL ENGINEERING.

Faculty of Civil Engineering.

107. Nine candidates appeared for the B.C.E. Degree Examination, of whom 5 passed, one being placed in the first class.

Civil Engineering College.

108. The working of the institution is summarized in the following extracts from my review :—

Changes in establishment.—A sixth assistant master was appointed and took charge of the surveying class on the 30th July 1883, from which date the staff remained at its full strength.

On the 30th May last the numbers on the rolls were—

First Department	21
Second do.	46
Special do.	25
Total ...	92

The strength on the same date in 1883 was 70 and in 1882 it was 51, and, arranged according to classes of the community, there were—

	1882-83.	1883-84.
European and Eurasians	11	20
Brahmans	33	41
Hindus (not Brahmans)	15	19
Native Christians	7	9
Muhammadans	1	1
Others	3	2
Total ...	70	92

The preponderance of Brahmans is striking, the number being considerably more than double that of 1881-82. The proportionate increase is greater under Europeans. The almost total absence of Muhammadans is much regretted. SECONDARY EDUCATION.

First Department—Engineer Classes.—The results of the final examination were very satisfactory. Out of 8 students, 7 appeared and 6 obtained certificates as assistant engineers, while one obtained a certificate as overseer. The eighth student was unable to attend. The department is again under obligation to the gentlemen who set papers for the examination. The results of the B.C.E. Degree Examination, for which all the 8 students went up, were also very satisfactory, 5 having been successful and 1 gaining a place in the first class—a distinction reached only once previously. The Director notes that the students in the first and second classes of the B.C.E. Examination are the same as those who stood first and took honors at the final examination. It is also remarked that the student who could not attend the final examination succeeded in obtaining a degree.

The present senior division consists of 10 students and the junior of 11, and at a sessional examination the students are said to have shown satisfactory progress.

The Director is glad to hear that the popularity of the first department has increased in a very marked manner, upwards of 30 applications for admission having been received at the commencement of the session. The Principal, however, observes that, with reference to accommodation and teaching capacity as well as the prospects of employment, it is undesirable to admit more than 10 or 12 candidates per annum.

The two first may be valid reasons, but, in the opinion of the Director, it is not for this department to take into consideration the prospects of employment. This is a matter which concerns the student and his friends. The college should afford education to as many students as possible, and thus add, as rapidly as practicable, to the qualified engineering agency of the country. Moreover, the greater the number of paying students, the less the cost of the institution to Government. The Principal is further requested to explain the allegation that the accommodation and staff are only sufficient for two small divisions of 10 or 12 in this department. It must not be forgotten that the fee monthly in this department is Rs. 15, or Rs. 180 annually.

Employment—First Department.—All the students who had obtained college certificates as assistant engineers in 1883 or the degree of B.C.E. in 1884, it is gratifying to record, had obtained temporary employment in the Public Works Department with the view of enabling them to obtain practical qualification for superior appointments. If the Government guarantee of one appointment to the Engineer Establishment, which is to take effect in 1885, is given annually, it appears to the Principal that the present large number of applicants for the first department will further increase, and the time may come to consider whether the standard of admission should not be raised to the B.A. degree. The effect, however, of this measure would probably be to limit admission to the first department of the institution almost wholly to Hindus to the exclusion of Europeans and Eurasians. But for this objection, the proposal might probably soon be adopted with advantage.

Library.—The catalogue was revised and improved by Conductor Cames and reprinted, and the library, which had been added to, had been made good use of.

IV.—SECONDARY EDUCATION.

(*a.*) *High Schools for Boys.*

Matriculation Examination.

109. The general results of the Matriculation Examination are summarized in the following table:—

General results.		Public institutions under the Madras Government.	Public institutions in Native States.	Public institutions receiving aid.	Other public institutions.	Private students.	Total.
Examined	1882-83 ..	532	287	1,768	1,115	932	4,634
	1883-84 ..	601	343	2,148	1,093	1,105	5,290
Passed—							
First class	1882-83 ..	58	17	75	53	5	208
	1883-84 ..	38	16	86	49	4	193
Second class ..	1882-83 ..	234	121	601	311	159	1,426
	1883-84 ..	223	129	702	335	157	1,546
Total ..	1882-83 ..	292	138	676	364	164	1,634
	1883-84 ..	261	145	788	384	161	1,739

SECONDARY EDUCATION.

There has been an increase of 14 per cent. in the number of examinees, while the number of passes has risen by 6 per cent. only. The departmental schools have not on the whole done as well as in the previous year. They sent up a larger but passed a small number of candidates than in 1882. Public institutions in Native States as well as those under private management and receiving aid are credited with a larger number of examinees and passes. The total percentage of passes has fallen from 35 to 33.

The statement in the margin gives the percentages of passes to examinees in the different classes of institutions. The fall in the percentage of passes, although the percentage of success is still the highest in the departmental schools, is marked. These institutions, however, showed improvement; notably Madura. Among those in which the decline is decided are the Presidency and Rajahmundry Colleges. The causes of decline are not evident, but are probably in a measure due to the excessive attention paid to the college classes. The year was, also, to some extent a period of transition, owing to the projected transfer of Government schools to local bodies, and this fact may have to some extent unsettled the minds of some of the masters concerned. Public institutions under private management and receiving no aid have done comparatively better.

Institutions.	1882-83.	1883-84.
Departmental institutions	55	43
Public institutions in Native States.	48	42
Public institutions under private management receiving aid ..	38	37
Other public institutions	33	35
Private students	18	15

A table showing the number of passes in the different subjects is given in the margin. There has been an improvement under English, the percentage of passes having risen from 43 to 48. In Mathematics the percentage has fallen from 77 to 64, and in the Optional language from 90 to 84. The proportion of passes under General knowledge has not changed. The improvement in English is encouraging, whilst the fall in Optional language indicates, I think, a more satisfactory standard on the part of the examiners in some of the languages :—

Analysis of success.	1882-83.	1883-84.
Examined	4,634	5,290
Passed in—		
English	2,011	2,541
Optional language	4,195	4,416
Mathematics	3,572	3,372
General knowledge	2,972	3,362

Language.	Examined.			Passed.			Percentage of passes.		
	1881.	1882.	1883.	1881.	1882.	1883.	1881.	1882.	1883.
Sanskrit	301	419	542	266	340	313	88	81	58
Latin	184	209	209	138	145	176	75	69	84
Persian	30	33	33	26	27	29	87	81	88
Arabic	2	..	..	2	..	..	100	..	..
Tamil	1,834	2,299	2,496	1,357	2,116	2,156	73	94	86
Telugu	689	850	1,073	665	817	963	97	96	90
Canarese	289	410	415	242	374	322	84	91	78
Malayalam	348	368	460	271	334	395	78	91	86
Hindustani (Urdu)	22	42	57	20	38	57	91	90	100
Uriya	6	4	5	6	4	5	100	100	100
Total ..	3,725	4,634	5,290	2,993	4,195	4,416	80	90	84

This table is interesting, not merely as showing the attention each of the ten languages in which the University examines receives, but also as indicating the educational advance of the great sections of the population. Each Dravidian language shows advance, and also the classical language of Dravidians—Sanskrit. Uriya, however, is stationary, but Hindustani shows marked advance in keeping with the general advance of Muhammadan education. All the candidates in Hindustani and Uriya met with success in the vernacular portion of the examination. Latin and Persian show improvement, but the percentages of success under Sanskrit and all the Dravidian languages have fallen. This is probably due to a judicious raising of the standard rather than to improvement in the candidates.

The classes of the community represented at the Matriculation Examination are given in the margin. Brahmans and Muhammadans have maintained their position, and the latter secured a higher percentage of passes, while other Hindus and Native Christians have not done as well as in the previous year. Under "East Indians" there has been a decrease in the examinees and passes, but under "Europeans" in the number of passes only. Fifty-eight per cent. of the examinees and 62 per cent. of the passes were Brahmans. It is, however, very creditable to the Native Christian community to observe that they head the list in the order of merit and also that the Muhammadans have risen from the lowest to the second place in the list. Pupils of these classes usually attend good schools whilst many of the Hindus have not the same advantage.

Classes.	1882-83.			1883-84.		
	Examined.	Passed.	Percentage.	Examined.	Passed.	Percentage.

Comparative Examination of the Fifth Classes.

110. The number of institutions that presented pupils for the examination rose from 35 to 41 (26 per cent.), the number of examinees from 912 to 1,278 (40 per cent.), and that of passes from 598 to 674 (13 per cent.). The rise in the number of passes, however, did not keep pace with that of examinees.

Of the 35 institutions in the previous year's list, 4 disappeared, the Government School at Tiruvádi, which was closed, the Hindu College, Vizagapatam, the American Mission High School, Dindigul, and the Samasthanam School, Bobbili. These latter three institutions apparently kept aloof from the examination with a view to

SECONDARY EDUCATION.

remain unfettered as regards promotions—a matter for regret. On the other hand, the Government schools at Anakápalle and Wálajápet, in which fifth classes were tentatively formed in 1883, nine aided schools, the Rajah's School, Kolangód, and the Ernakulam High School in Cochin entered the examination in 1883. This increase seems to bear testimony to improvement in the soundness of the upper secondary education imparted, as otherwise the teachers and managers of schools would fear the application of a test calculated to bring out defects and affect promotions from one class to another, nor is it to be forgotten that the appearance of non-Government schools at the examination is purely voluntary.

Fifty-three per cent. of the pupils examined were successful against 46 and 66 per cent. in the two previous years. The fall in 1883, compared with 1882, is accounted for by the difficulty of some of the papers, and possibly some of the new institutions were affected by the fact that this was the first experience their pupils had had of the examination.

A detailed list of average marks gained by each institution in each subject is appended, arranged according to the total average secured by each school. The Government High School, Kurnool, heads the list, though only 10 pupils appeared from the school. As this school stood at the bottom of the lists for the previous two years, the result is very creditable to the acting headmaster. The Government College, Calicut, the St. Aloysius' College, Mangalore, the Kerala Vidyasala, the S. P. G. High School, Vepery, the Government College, Cuddalore, the Government High Schools at Pálghat and Cannanore, the Ernakulam High School, the Brennen High School, Tellicherry, the Pachaiyappa's College, the Hindu High School, Masulipatam, the Coimbatore College, the Mangalore and Berhampore Colleges, the Chittoor and Cuddapah High Schools and the Basel German Mission High School, Calicut, are the important institutions that secured more than a third of the average marks. Twenty-four out of 44 schools, it is satisfactory to note, have passed more than 50 per cent. of their pupils, while only three institutions—the Government Middle School, Amalápuram, the Wardlaw Institution, Bellary, and the Rajah's High School, Kolangód—passed less than a third.

Fifth-class Comparative Examination held in November 1883.

SECONDARY EDUCATION.

Number and strength of upper secondary (high) schools for boys.

111. The statement below gives the number and strength of high schools for boys, including middle (lower secondary) and primary departments thereto attached, which are now treated as parts of one school and not as distinct schools as in the past few years. There has been slight increase on the whole, although the fifth and seventh divisions show a slight decrease in consequence of the abolition of the middle classes in the Government colleges.

Division.	1882-83.				1883-84.			
	Number of schools.	Strength, 31st March.			Number of schools.	Strength, 31st March.		
		High school.	Middle school.	Primary school.		High school.	Middle school.	Primary school.
First division	13	620	1,482	566	17	624	1,470	846
Second do.	9	350	962	347	8	311	814	335
Third do.	22	1,619	2,979	2,188	26	1,723	3,013	2,082
Fourth do.	8	458	1,037	555	10	475	857	514
Fifth do.	26	1,715	2,704	1,961	33	1,553	2,847	2,164
Sixth do.	14	1,057	1,917	1,039	14	1,100	2,025	1,059
Seventh do.	2	226	148	..	2	163	109	..
Total ..	94	6,045	11,229	6,656	110	5,949	11,135	7,000

There has been a net increase of sixteen schools resulting from—

(i) the opening of high school classes in connection with 18 middle schools;
(ii) the inclusion in the returns of the Ongole Baptist Mission and Salem London Mission high schools;
(iii) the abolition of the Kumbakónam Hindu Union high school, Tirumangalam Independent high school and Palamcottah Hindu high school;
(iv) the non-submission of returns by the Guntúr American Mission high school.

The strength of the upper secondary classes has fallen from 6,045 to 5,949, notwithstanding the increase in the number of schools. Four divisions show advance, three decline, chiefly however in the fifth division, and in this division the decrease is almost exclusively confined to the town of Kumbakónam. The attendance of the new schools alone was 498, and the strength on the 31st March 1883 of the four schools which ceased to be borne on the departmental returns in 1883-84 was 181. Omitting these figures, it will be observed that the attendance of the high departments of schools existing in both the years has fallen from 5,864 to 5,451, that is, by 413. This diminution may be accounted for by the facts (1) that fewer pupils (265) passed the Middle School Examination than in the preceding year, thus reducing the number of possible candidates for admission to this department; (2) that the Matriculation results were not published until the middle of March—so many failed candidates had not rejoined the high school; (3) that the fee for the high school had been considerably raised for first admissions, and that many persons hoped the new rate fixed by Government would be relaxed; (4) and, lastly and chiefly, by the collapse of the unhealthy rivalry which had been existing in the town of Kumbakónam in consequence of the stringent rules regarding school fees and recognition. The monthly returns received since the beginning of the present term show an increased attendance in most large schools, so that I have no reason to doubt that at the close of this year the figures will show decided improvement on the figures for 1882-83.

Besides the above, there were three private high schools furnishing returns—the Cuddapah Patasala, in which Sanskrit alone is taught, the Chingleput Hindu high school, an adventure Anglo-vernacular school and the Sanskrit College, Tiruvádi.

Distribution of high schools.

112. The high schools are distributed as below, according to agency:

Division.	1882-83.				1883-84.			
	Government schools.	Board schools.	Aided schools.	Unaided schools.	Government schools.	Board schools.	Aided schools.	Unaided schools.
First division	3	..	8	2	5	..	10	2
Second do.	4	..	4	1	4	..	4	..
Third do.	2	..	19	1	2	..	22	2
Fourth do.	3	1	4	..	3	1	5	1
Fifth do.	2	1	18	5	2	1	23	7
Sixth do.	5	..	8	1	5	..	8	1
Seventh do.	1	..	..	1	1	..	1	..
Total ..	20	2	61	11	22	2	73	13

Owing to the formation of a fifth class in connection with the Amalápuram and Anakápalle schools, the number of Government and Board schools has risen by two. The increase in aided and unaided schools was the result of the opening of high school classes in middle schools.

High schools, first division.

113. There has been an advance both in the number and strength of high schools for boys. Three hundred and seven pupils appeared for the Matriculation, of whom 126 were successful, against 130 out of 259 candidates in the preceding year. In the Comparative Examination of the Fifth Classes also the number of passes has been fewer, while that of candidates was larger.

The Berhampore and Chicacole Government schools did not do well, only a third of the pupils presented for the Matriculation Examination having succeeded.

The Parlákimedi Zemindari school has not commenced to send up pupils for that examination.

A small fifth class was opened in connection with the Anakápalle Municipal school. The London Mission school, Vizagapatam, declined in numbers, but passed two-thirds of its pupils in the last Matriculation, while the rival Hindu school passed only 6 pupils out of 17 entrances. The Maharajah's school, Vizianagrum, shows improvement in all the departments and has passed more than 50 per cent. of the pupils in the entrance examination. The Samasthanam school, Bobbili, greatly needs a better staff of teachers.

The school department of the Rajahmundry College declined in numbers, and in the Matriculation Examination only 50 per cent. of the candidates met with success. The Amalápuram Government school sent up 10 pupils of whom 2 passed. The school bids fair to develope into a good high school. All the aided high schools show advance in the high department, the Church Mission Society's high school, Ellore, excepted, and have done fairly in the Matriculation, with the exception of the Native high school, Cocanada, in which only 1 boy passed out of 16 examinees.

High schools, second division.

114. The annexed statement gives particulars of the high schools in the second division. The attendance of the several departments, excepting the lower primary, has fallen more or less, mainly in consequence of the closing of certain classes and the withdrawal of the Mission school, Guntúr, from Government supervision. An increase will be

observed in the number of candidates and passes in the Matriculation and the Fifth Class Comparative Examinations :— SECONDARY EDUCATION.

The Government school, Guntúr, suffered in numbers owing to the rivalry apparently of the American Mission school, in which very low rates of fees are levied. The Hindu high school, Masulipatam, declined in numbers, but has fared better than the Noble school in the Matriculation Examination.

The C.M.S. school, Bezváda, passed but a single pupil.

The Government school, Bellary, shows larger attendance, but in the Matriculation only 8 passed out of 27 appearances. The same remarks apply to the Wardlaw Institution, Bellary.

The high school, Cuddapah, slightly advanced in numbers and passed one-half of its pupils for the Matriculation Examination.

The high school, Kurnool, presented no pupils for the University examination, the sixth class, which was very weak in numbers, having been closed about the middle of 1883.

High schools, third division.

115. An appreciable increase in the number of schools and scholars (lower primary excepted) will be noticed in this division. For the Matriculation, 917 candidates were sent up against 804 last year, but only 320 passed against 322. A larger number of pupils passed the Fifth Class Comparative Examination out of a larger percentage of pupils presented.

Both the aided high schools in Nellore suffered in numbers, and in the last Matriculation Examination acquitted themselves poorly. The Baptist Mission high school, Ongole, bids fair to improve.

The strength of the high school department of the Presidency College fell from 137 to 94, and only 50 per cent. of the candidates sent up for the Matriculation

passed. There were great fluctuations in the attendance of the aided and unaided high schools. In the Matriculation St. Mary's school passed one-half of its pupils, and the Free Church Mission Institution and Bishop Corrie's Grammar School passed nearly one-half of the pupils sent up. The other institutions cannot be said to have done satisfactorily, notably the Doveton Protestant School, from which only 3 pupils passed out of 29 presentations, and the St. Thomé Seminary, from which 3 passed out of 28 pupils. SECONDARY EDUCATION.

The high school, Saidápet, has not done as well as it should have done, having passed only 6 pupils in the Matriculation and 18 in the Fifth Comparative Examination out of 14 and 35 candidates respectively presented. With the exception of the Free Church Mission School, Chingleput, the other aided schools have done fairly in the Matriculation.

High schools, fourth division.

116. The following statement exhibits the high schools in the fourth division :—

High schools for boys.	On the rolls on the 31st March								Matriculation Examination.				Comparative Examination.				Middle School Examination.

Two new schools were added to the list—the Lutheran Mission School, Tirupati, in which a fifth class was formed, and the London Mission School, Salem, newly borne on the returns. For the Matriculation and Fifth Comparative Examinations, a larger number of pupils were presented and a larger number passed than in 1882-83.

The Government high school, Cuddalore, improved in numbers and passed more than one-half of the candidates sent up. The St. Joseph's Institution, Cuddalore, also

SECONDARY EDUCATION.

shows increased attendance and passed 18 pupils in the Matriculation out of 42 candidates. The Pachaiyappa's school, Chidambaram, has slightly fallen in strength, and in the Matriculation passed 10 pupils only out of 35 against 11 out of 25 last year.

The Chittoor high school fell slightly in numbers and in the Matriculation passed 50 per cent. of the pupils. The Wálajápet school decreased in strength in the high school department; in the Fifth Class Comparative Examination it passed 8 pupils out of 11 examined. The Church of Scotland Mission and Hindu high schools, Vellore, are making good progress.

The Government high school, Salem, declined in numbers considerably, and in the Matriculation passed 13 pupils only out of 37 appearances. The London Mission school, Salem, produced very poor results in the Matriculation Examination.

High schools, fifth division.

117. The high schools, fifth division, are exhibited in the annexed table:—

High schools for boys.	On the Rolls on the 31st March								Matriculation Examination.				Comparative Examination.				Middle School Examination.

The number of schools has increased, but the strength has fallen, which may chiefly be attributed to the abolition of the Hindu Union school, Kumbakónam, and the decline in the numbers of the Kumbakónam Town and Native high schools. The examinees for and passes in the Matriculation have risen, but the number of passes in the Fifth Comparative Examination has fallen from 101 to 95, though 182 went up against 137.

Owing to changes in the teaching staff, the Tiruválúr school declined in numbers and produced indifferent results in the Fifth Comparative Examination. The Máyavaram Municipal school has advanced satisfactorily. With two exceptions, the attendance of aided high schools has remained stationary or risen. The high schools in Kumbakónam have declined in numbers considerably. The cessation of the inflated condition of upper secondary education is to be welcomed, as, so long as it lasted, there was little hope of the condition of the schools, which in some respects was very unsatisfactory, improving. Two high schools are sufficient for the town, and there is reason to hope that they will in future depend for success not on numbers, but on the efficiency of the work done. The results of the Matriculation varied greatly.

SECONDARY EDUCATION.

The Madura high school has fallen in numbers, but in the Matriculation and Fifth Comparative Examinations more than one-half of the pupils examined were successful. The Ramnad S.P.G. school and Native school, Madura, show a falling off in attendance, and the results obtained at the Matriculation Examination were not quite satisfactory. The Dindigul American Mission and Hindu high schools improved in strength, but the former passed only one pupil in the Matriculation out of nine examined, while the latter school passed seven pupils out of nine examinees.

The Tinnevelly Mission and Hindu schools and the Tuticorin Caldwell school have fallen in numbers and passed but moderately in the Matriculation.

High schools, sixth division.

118. The high schools in the sixth division are :—

The number of schools remained unchanged and there has been an improvement in the strength. There has been an increase in the number of examinees and passes in the Matriculation and Fifth Comparative Examinations.

The S. P. G. high school, Trichinopoly, has fallen in numbers, but this was made good by an increase in the attendance of the St. Joseph's Institution. Both the schools have done fairly in the Matriculation Examination.

The three high schools in Coimbatore have all advanced in numbers, and the results obtained at Matriculation were good, except in the case of the Native high school.

The Breeks Memorial school sent up two pupils for Matriculation, but passed none.

Cannanore excepted, the other Government schools show diminished attendance. The results of the Matriculation Examination were indifferent. The aided and unaided high schools have passed about a third of the candidates for that examination.

High schools, seventh division.

119. The particulars of the two high schools in the seventh division, the Mangalore college and St. Aloysius' Institution, are given in the table appended. Both of the schools fell off temporarily in numbers, but they passed more than 50 per cent. of the pupils in the Matriculation and Fifth Comparative Examinations :—

Middle School Examination.

120. No important changes were made during the year in the scheme of the examination. The following extracts are taken from my proceedings as Commissioner for the U.C.S. Examinations, reviewing the results of the last Middle School Examination :—

8,281 candidates registered their names, 8,055 underwent examination, and 3,959 passed against 7,203, 7,032, and 4,422 respectively in 1882-83. Although there was thus an increase of over a thousand in the number registered and examined, the number of successful candidates was smaller than in the previous year, and the decrease is confined to the first and second classes. This result seems chiefly due to the rapid increase of petty middle schools with inefficient teachers, though some more important schools also failed to meet with the measure of success that might reasonably have been demanded of them.

—	December 1883.					December 1882.

The following table gives the classes of institutions from which the examinees appeared, with particulars as to the amount of success each class of institution met with in the examination. 6,495 male pupils and 243 female pupils underwent examination; about 46 per cent. of

SECONDARY EDUCATION.

the former and 69 of the latter were successful against 64 and 77 respectively in 1882-83. For private candidates the percentage was 56 for males and 59 for females. The total number of females examined was 275 and the number passed was 188 against 200 and 157 respectively last year. This is so far satisfactory.

The following tables show the optional subjects and the optional languages brought up by the candidates. Mathematics was not optional in the case of male pupils. Next to Mathematics, English History and Physical Geography were the principal optional subjects selected by private candidates. The number of candidates in each optional language was greater than last year, and the increase in the oriental classics, Sanskrit and Persian, is particularly satisfactory.

Total ...	131	2,662	250	1,268	1,518	159	3,162	519	1,549	2,068

SECONDARY EDUCATION.

Every division shows increase as regards examinees and passes, the seventh division excepted, in which the numbers have fallen owing to the abolition of the lower fourth class attached to the Mangalore college and to the non-appearance of the German Mission town school, Mangalore.

The number of institutions on the whole rose by 21 per cent., the number of examinees by 19 per cent., and the number of passes by 36 per cent. Sixty-five per cent. of the examinees were successful against 57 per cent. in the previous year, and the number of first-class passes more than doubled. This shows improvement in the lower secondary education imparted in the schools concerned.

The next table gives the classes of institutions from which the pupils were presented.

Divisions.	Departmental schools.			Board schools			Salary-grant schools.			Results schools			Unaided schools.

The number of departmental schools has fallen, but that of Board schools has risen, chiefly owing to the transfer of certain Government schools to Municipalities on the 1st October 1883. The number of salary-grant schools remained stationary, while results and unaided schools have nearly doubled in number. The percentage of success in the different classes of institutions ranged from 48 to 78 against 32 to 77 in the previous year.

	Percentage.
Board schools	78
Departmental schools	74
Salary-grant schools	62
Unaided schools	62
Results schools	48

There has been improvement as regards every class of institution, especially results schools. The Board schools have again secured the highest percentage of passes.

Comparative Examination of the Third Classes.

122. A comparative examination of the third classes in Government, Board, and salary-grant schools and fifth standard classes in results schools was held in the sixth and seventh divisions. It was attended by 1,033 pupils and 52 schools.

Number and strength of middle schools for boys.

123. The annexed table exhibits the number and strength of the lower secondary schools (excluding departments of this standard) for boys, English and vernacular. English schools have fallen in number from 505 to 494, and vernacular schools from 136 to 99, due chiefly in both cases to the closing of weakly-attended and ill-managed middle departments of results schools. The attendance in the same class of English schools has risen from 10,844 to 10,900, but that of vernacular schools has fallen from 619 to 426. All the vernacular schools are results schools. In both cases the attendance in the primary department is excluded.

The total number of pupils attending English lower secondary schools (including departments of this standard) for boys on the 31st March 1883 was 20,584. The number rose to 22,088 on the 31st March last.

Viewing divisions separately, the first, third, fifth, and sixth divisions show a falling off in the number of middle English schools, notably the fifth division, while as regards attendance in the middle department, the first and fifth divisions only show a diminution. The fluctuations in the number and attendance of vernacular schools were very great. The decrease in the fifth division was the result of the closing of a good many petty schools in the Tinnevelly District as already explained.

Distribution of middle schools according to agency.

The number of Government schools has fallen from 54 to 38, due to the transfer of schools in Municipalities to the commissioners. The Board schools, English and vernacular, have risen from 85 to 136, or by more than 50 per cent., while the attendance has advanced by 80 per cent. There was an increase of 40 per cent. in the number and 9 per cent. in the attendance of aided middle schools, the result of the gradual rise in the standard of elementary schools and of the schools to the aided list. In consequence of such transfer, and also of the causes already explained for the closing of middle results schools, the number of unaided schools has fallen from 248 to 65, and the strength from 2,787 to 1,457. The total number of middle schools at the close of the year was 593 against 641 in the preceding year, the attendance being 11,326 and 11,463 respectively.

Middle schools, first division.

125. A summary of middle schools in the first division will be found in the annexed statement:—

Middle schools for boys.		1882-83.		1883-84.

There were 5 English schools less and 10 vernacular schools more than in the previous year, but the total attendance in the lower secondary classes has fallen slightly.

For the Middle School Examination 671 candidates went up, of whom 335 were successful. The figures of the preceding year were 612 examinees and 415 passes.

SECONDARY EDUCATION.

The number of examinees in the Lower Fourth Comparative Examination rose from 442 to 512 and that of passes from 232 to 293.

Ganjam.—There has been an advance in the attendance of secondary schools proper from 371 to 494, though the number of schools has fallen from 27 to 26. The decrease was in vernacular schools.

The middle department of the Berhampore college, which was 66 strong last year, was abolished in December 1883, and, on the other hand, the strength of the Municipal town school rose from 40 to 153. The Chicacole middle school declined in numbers in consequence of the transfer of the third class to the Municipal town school. The strength of the Government middle schools at Tekkali and Russellkonda, as also that of the Local Fund middle school, Ichápur, suffered, while the reverse was the case in the salary-grant schools of the district.

Vizagapatam.—There was, on the whole, a decrease of 1 school and 1 pupil. Gunupur school excepted, all the Government and Board schools improved in attendance, and at Anakapalle a tentative fifth class, attended by 5 pupils, was also formed, but in the Middle School Examination 3 pupils only were successful out of 11 examinees. The Yellamanchili and Bimlipatam schools passed 7 and 6 pupils respectively out of 10 and 6 candidates, which is satisfactory, considering that these institutions are doing the work of a first-grade middle school with the establishment of a second-grade or of a third-grade school. The Srungavarapukota and Merangi schools had an attendance of 3 and 5 pupils in the middle department. These weak middle departments should not be retained. To the list of unaided schools a fresh accession was made—the Kalyánasingapur Zemindari school in Jeypore territory—a sign of the advance of education in the hill tracts.

Godávari.—There were great variations in schools and scholars. English schools have fallen from 33 to 29, while vernacular schools have risen from 23 to 34. The entire attendance, however, fell from 960 to 758. The strength of the middle department of the Bhadráchalam school has doubled, a noteworthy indication of the advance of education in this remote tract. This tract is now under the Deputy Inspector of Schools, Ellore Range, but owing to the extent of his range he is not able to visit it as frequently as is desirable. The Víravásaram school shows slight increase in numbers and passed 8 out of 11 pupils in the Middle School Examination.

The Rajahmundry Municipal school, with which the town school, under private management, was incorporated, sent up 22 pupils for the Middle School Examination, of whom 15 were successful.

The Innespetah school declined in attendance. It sent up 27 pupils for the Middle School Examination and passed 16 boys, a fair outturn. The progress of the results schools was varied.

Middle schools, second division.

126. The annexed table of middle schools in the second division shows that English schools have risen in number and attendance, while the vernacular schools declined in both, mainly in consequence of the closing of the fifth standard class in primary schools not capable of teaching children up to this standard.

Middle schools for boys.		1882-83.		1883-84.

The number of candidates for the Middle School Examination rose from 355 to 437, but the number of passes fell from 235 to 187. The percentage of passes was below the general average.

The results of the Lower Fourth Comparative Examination were good, 200 candidates having passed out of 329 examined.

Kistna.—There was a decrease of 2 English and 14 vernacular schools. The strength of the middle school classes has fallen on the whole from 450 to 424, the falling, however, being confined to the vernacular schools. The Masulipatam Muhammadan school, transferred to the Municipality, was reduced to a primary school. The number of Board schools has nearly doubled and the attendance in lower secondary classes nearly trebled. Two of the Board schools have already commenced to send in pupils for the Middle School Examination—the Gudiváda and Répalle schools.

Bellary.—The Ádóni Government middle school, transferred to the Municipality, slightly declined in numbers. The attendance of the Board schools has doubled, mainly in consequence of the opening of higher classes in the Bellary

SECONDARY EDUCATION.

town school on the abolition of the middle department of the Bellary college in December last.

Anantapur.—The Anantapur middle school has risen in numbers since its transfer to the Municipality. It sent up 6 pupils for the Middle School Examination, of whom 5 were successful, which is creditable to the headmaster. The Tadpatri and Penukonda schools have both suffered seriously in numbers. Three aided and 2 unaided schools were added to the list of middle schools in the district.

Cuddapah.—It is satisfactory to record an increase both in the number and strength of middle schools. The Madanapalle Government middle school improved in numbers, and in the Middle School Examination passed two-thirds of its pupils. There was a slight decrease in the attendance of the Badvél and the Proddutur Local Fund schools.

Kurnool.—The number of schools remained stationary, but the attendance has fallen slightly. The Nandyál school had only 12 boys in the lower secondary classes. The progress of aided schools also has not been as satisfactory as could be wished.

Middle schools, third division.

127. English middle schools have fallen from 77 to 74, but in middle classes the attendance has risen from 1,949 to 1,992. The vernacular results middle schools of the previous year, 44 in number, have all been abolished with the exception of a single school attended by 2 boys in its middle department.

For the Middle School Examination, 815 candidates were sent up, of whom 391 or 48 per cent. were successful. The number of examinees and passes in the previous year were 1,132 and 701. The decrease in the numbers is due to a smaller number of pupils sent in by certain institutions.

For the Lower Fourth Comparative Examination, 408 pupils were presented, of whom 196 passed. The percentage was but moderate. The Vepery S.P.G. high school excepted, none of the high schools in the division under private management have joined the examination.

Nellore.—There were 11 middle schools with 174 pupils against 13 schools attended by 200 pupils. The number of Board schools increased by 1, but that of aided schools fell from 3 to 1, while the only unaided school of last year disappeared. The Board schools have fallen in numbers, but they are making fair progress. Three of these schools appeared for and obtained fair results in the Middle School Examination, but more joined the Lower Fourth Comparative Examination.

Madras.—The number of middle schools proper in Madras has fallen from 46 to 42, but the attendance has improved, being 1,676 against 1,551. The increase is satisfactory.

Chingleput.—There has been a very great fall in the number and strength of middle schools in this district—schools from 62 to 22, scholars from 363 to 144—due, as explained elsewhere, to the closing of the so-called middle departments of results schools, mostly vernacular. It will be noticed that the attendance of even the existing schools has considerably fallen.

Middle schools, fourth division.

128. The annexed table of middle schools in the fourth division shows that the number of schools has risen from 66 to 85, and that of pupils in middle school classes from 1,375 to 1,807. Every district of the division shows increase both in schools and in scholars, notably the South Arcot District.

SECONDARY EDUCATION.

There appeared for the Middle School Examination 538 pupils, of whom 296 or 55 per cent. were successful. For the Lower Fourth Comparative Examination, 492 pupils went up and 382 passed. These results are very fair, especially those of the Comparative Examination.

South Arcot.—Three English and 4 vernacular schools have been added to the list of middle schools in the district, and the attendance has risen from 347 to 640. The attendance of the 7 Government middle schools increased on the whole from 183 to 213. The Villupuram, Tirukoilúr and Vriddháchalam schools show marked advance in numbers, and these institutions have done creditably in the Lower Fourth Comparative Examination and formed materials for the formation of an upper fourth class. The Municipal school, Chidambaram, is improving, and the Local Fund school, Bhuvangiri, has developed into a middle school. The number of aided schools increased by 1 and the attendance by 151, owing to the establishment of a middle results school with 102 pupils in New Town, on the abolition of the middle department of the Government college. The establishment of a branch school at Tirupádiripuliyur as a feeder to St. Joseph's College, Cuddalore, raised the number and strength of unaided schools.

North Arcot.—The increase in the number and attendance of middle schools is confined to vernacular schools, English schools having fallen from 26 to 24, and the strength from 527 to 484. The Tirupati school declined slightly in numbers, but the Palmanér, Arcot, and Árni schools have improved in strength. The Árni, Arcot, and Tirupati schools sent up 13, 6, and 9 pupils and passed 7, 5, and 8 candidates in the Middle School Examination. The results obtained by the last two institutions were good. These institutions have also fared well in the Lower Fourth Comparative Examination. The attendance of the Vellore Muhammadan school, transferred to the Municipality, remained stationary: the school passed 4 out of 11 pupils in the Middle School Examination. The increase in the number and attendance of Board schools is an indication of the progress of Local Fund schools, in which higher standard classes are formed. There has been much fluctuation in the number of results schools, aided and unaided.

Salem.—There has been no change in the number of Government schools, but the attendance has risen slightly. The Board schools have risen from 5 to 9 and their strength from 88 to 210, consequent on the abolition of the middle school department of the Salem college.

Middle schools, fifth division.

129. The statistics of middle schools in the fifth division are summarized below. They show a decrease of 14 English and 9 vernacular schools and 1,105 pupils, which has been mainly brought about by the closing of the so-termed middle departments of results schools on the introduction of the new scheme of fees and the constitution of certain English middle schools as high schools.

The number of candidates for the Middle School Examination rose from 1,318 to 1,428, but that of passes has fallen from 790 to 639.

For the Lower Fourth Comparative Examination 530 candidates appeared against 424, and 241 passed against 181. The comparatively poor outturn of results schools was the chief reason for the moderate percentage of passes.

Tanjore.—The Muhammadan school, Nagore, having become a primary school, the number of Government schools was reduced from 2 to 1. The increase in the number of aided schools was brought about by the transfer of some of the results schools from the unaided to the aided list. Some of the unaided schools were reduced to primary schools.

Madura.—The only Government middle school in the district, that at Periyakulam, was abolished during the year. The number of Board schools remained unchanged and their attendance fell. There has been much fluctuation in the number and strength of middle results schools.

Tinnevelly.—Owing to the transfer of a large number of unaided results schools to the aided list, aided schools have risen from 22 to 51 and the attendance therein from 550 to 727 and unaided schools have fallen from 39 to 4.

Middle schools, sixth division.

130. The next statement exhibits middle schools in the sixth division. The number of schools rose from 90 to 93, English schools having fallen by 1 and vernacular schools risen by 4. The strength of the middle departments increased from 1,728 to 2,215. the improvement extending to all districts, Malabar in particular.

For the Middle School Examination, 908 pupils were presented, of whom 455, or one-half of the candidates, met with success.

The results of the Lower Fourth Comparative Examination were very satisfactory. Out of 689 candidates sent up, Pudukóta college being omitted, no less than 604 or 87·6 per cent. of the examinees succeeded.

Trichinopoly.—The Government middle school, Srírangam, and the Muhammadan school, Trichinopoly, having been transferred to the Municipalities, the Government schools fell from 3 to 1, but the Board schools rose from 1 to 3. No material change took place in the number of aided and unaided schools.

Coimbatore.—Owing to the transfer of the Erode and Karúr schools to the Municipalities concerned, and the Polláchi school to the Local Fund Board, the number of Government schools fell from 4 to 1, while there were 3 Board schools against none in the previous year. There were variations in the number of aided and unaided results schools, resulting in an increase of 18 aided and a decrease of 14 unaided schools.

Nílgiri.—There was an increase of 1 school and 1 pupil on the whole. The 3 aided schools of the previous year are returned as unaided schools, having received no grant during the year.

Malabar.—The number of middle schools proper fell from 26 to 24, but great improvement took place in the attendance of the middle departments. The number of Government schools remained unchanged, but the strength slightly declined. The Board schools greatly improved in numbers, though the number of schools fell from 12 to 11 owing to the closing of the Ponáni and Kolangód Local Fund middle schools and the opening of a branch Municipal school at Pálghat. The unaided schools were transferred to the aided list, and 1 school under private management disappeared.

Middle schools, seventh division.

131. The middle schools in the seventh division are shown in the table appended to this paragraph. There was an increase of 1 vernacular and 2 English schools, and also of 144 pupils, the bulk of the increase in schools and pupils appertaining to aided schools. One hundred and fifty-two pupils appeared for the Middle School Examination, of whom 87 were successful. For the Lower Fourth Comparative Examination, 139 pupils were sent up against 183, and 107 passed against 108.

(c.) *High Schools for Girls.*

Number and strength of high schools for girls.

132. The number of high schools for girls rose from 16 to 19, although the upper secondary department attached to the Bellary Convent girls' school, St. Thomas' girls' school, St. Thomé, and the Lawrence Asylum, Ootacamund, ceased to exist. The present system, by which a school is entitled to rank as a high school so soon as it constitutes a fifth class, is open to objection as such classes are not unfrequently formed when it is clear that the places of the girls on promotion to the sixth class will not be taken by fresh promotions from the middle school; but on the whole it is preferable to continuing to treat such schools as middle institutions. The schools added to the list were: (1) The Nellore Christ Church girls' school; (2) the S. P. G. boarding school, Vepery; (3) the Free Church Medical Mission school, Ráyapuram; (4) the Baptist girls' day school, Madras; (5) All Souls' results school, Coimbatore; (6) St. Ann's Convent girls' school, Mangalore. Five of these schools appeared as middle schools in the previous year's returns. The S. P. G. boarding school at Vepery was brought on the returns for the first time. The institution is new, and as it aims at imparting instruction in some subjects outside the ordinary curriculum, its progress will be watched with interest.

The advance in the standard and quality of female education is evidenced by the considerable improvement which has taken place in the attendance of the high schools, and also in the results obtained at the public examinations. Ninety-four pupils were reading in high departments at the close of the year against 76 in 1882-83, and the entrances for, and passes in, the Higher Examination for Women

SECONDARY EDUCATION.

and Middle School Examination were respectively 52 and 84 and 21 and 66 against 34 and 53 and 14 and 47 in the previous year. The noticeable advance in the number and strength of middle schools for girls attached to high schools, 366 against 277, is encouraging. A detailed list of female high schools is appended.

(d.) *Middle Schools for Girls.*

Number and strength of middle schools for girls.

133. The number of middle schools proper for girls rose from 88 to 114 and the attendance in the middle departments of such schools from 623 to 873. If the middle departments attached to high schools be taken into account, it will be observed that the total number of pupils receiving lower secondary education rose from 900 to 1,239, or by nearly 40 per cent. Four years ago the total number was only 286. The development of secondary education among women will in due course increase very materially the supply of female teachers and thus remove the necessity for employing male teachers in the education of women. I am glad to report that the objection to the employment of Eurasian and Native Christian mistresses in caste schools is decreasing, whilst there are indications that caste women will gradually come forward to take a share in the work.

Annexed is a list showing the number of middle schools, English and vernacular, in each division, together with the attendance in middle departments. Every division shows increase in schools or scholars, or both. More than a third of the pupils belonged to the third division, which includes the Presidency town, where secondary education has made considerable progress. The first, second, and fourth divisions are backward in this respect.

Mrs. Brander makes the following remarks regarding girls' schools :—

"Reading aloud and recitation continue fair, but pronunciation is often very defective. The subjects which I noted last year—language, composition, arithmetic, history, spelling and writing—are still the most defective. Geography and hygiene are better and more intelligently known than the other subjects. Needle-work continues to be proportionately better in the middle than in the high departments. Maps are fairly drawn and are improving; but map-drawing from memory is seldom or never attempted, and mental arithmetic is too much neglected.

"The majority of the pupils of the middle departments are Europeans and Eurasians and Native Christians, but a few caste Hindu girls now enter these departments and remain for a year, and sometimes for two, and study for the Special Upper Primary Examination. In a very few instances caste girls have passed the Middle School Examination, but this is very rare."

Home education classes.

134. Regarding the zenana education, Mrs. Brander writes :—

"The Madras Branch of the National Indian Association has continued to provide education in Hindu homes throughout the year. Three trained teachers are employed against 2 in 1882, and the number of pupils has risen from 15 to 25. One pupil passed the Special Upper Primary Examination and, at the inspection, 5 obtained Upper Primary certificates and 1 a Lower Primary certificate. With the exception of this association, no societies have as yet availed themselves of Government aid for home education, probably for the reason that the rules were somewhat difficult to carry out. These rules have now been revised and made easier."

Zenana education is being imparted to certain ladies of respectable families in Rajahmundry through the exertions of the District Múnsif, M.R.Ry. A. Lakshminarasimham Chetti Garu. The want of a competent mistress is felt, but it is trusted that the defect will soon be remedied.

(e.) *Private Schools.*

Private secondary schools.

135. Four private secondary schools are borne on the departmental returns: the Sanskrit Pátasála at Cuddapah, the Kúrdappa's Chowky Sanskrit Pátasála at Bellary, the Tiruvádi Sanskrit college, and the Chingleput Hindu high school. The following extracts from the Inspectors' reports relate to the first three institutions :—

"The *Sanskrit Pátasála* at *Cuddapah*," as reported by the Deputy Inspector of Cuddapah, "was established in July 1882 by some of the native gentlemen in the town, with a view to facilitate the study of that language by the pupils who study in the Government high school here, and who have a desire to take up Sanskrit as the second language in the several examinations for which they appear. The school is entirely supported by subscriptions and donations, and no fees are levied from the pupils. During the year 1883-84, 13 pupils appeared for the Lower Fourth Comparative Examination, and 12 of them passed. Three went up for the Middle School Examination and 2 passed. Two students appeared in Sanskrit for the Fifth-class Comparative Examination, and both of them passed. The teaching staff consists at present of one headmaster on Rs. 15, and a second master on Rs. 12 a month. There is a peon for the school on Rs. 5, whose duty it is to collect subscriptions, which are given both in kind and money. The school is held in a house situated in a convenient locality, rented at Rs. 3 per mensem. The total expenditure during 1883-84 was Rs. 228. Besides the pupils of the high school, there are others who attend the school for the purpose of reading Sanskrit dramas and poems. The hours of attendance are from 6 to 7-30 A.M. in the case of the former, and from 2 to 5 P.M. in the case of other students."

"*Unaided schools.*—There is only one such school reported to be in existence in the division, viz., *Kúrdappa's Chowky Sanskrit Pátasála* at Bellary, which was attended by 23 pupils at the close of 1883-84. Of this school the Bellary Deputy reports :—'This school has been in existence for many years. It is named after its patron, a Lingayat called Lakri Kúrdappa, who died about nine years ago. It is mostly attended by Lingayats, and Sanskrit is the language taught. The attainments of the pupils are so varied that the school comprises several separate classes. The teaching staff consists of only one pandit.'"

There is a slight increase in the strength of the Tiruvadi Sanskrit College, and the results of the examination of the classes by the Sanskrit pandit of the Kumbakónam college are reported very fair. A new head pandit was appointed in the place of the old headmaster, who became unfit for his work owing to weak sight.

SECONDARY EDUCATION.

Number of schools and pupils represented at the fifth, sixth and seventh results standard examinations.

136. The following summary gives information as to the number of schools and pupils represented at the fifth, sixth, and seventh standards under the results rules. For the three standards, 367, 124 and 76 schools respectively sent in pupils, but only 336, 107 and 72 schools passed pupils. The percentage of passes under girls is very creditable. The failure in mathematics is marked. No comparison can be made with the previous year's results, as the figures of that year are not available.

Standards.	Schools.		Pupils presented.		Pupils passed.		Passed in vernaculars.	Passed in English.	Passed in Mathematics.	Passed in History and Geography.	Passed in Needle-work.
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.

Seventh	76	72	829	28	318	22	...	...	...	...	....

General remarks on secondary education.

137. The following extracts are taken from Mr. Garthwaite's report relating to high and middle schools generally:

General remarks on the teaching in high and middle schools.—In a previous section I have drawn attention to the fact that the majority of the pupils at schools in this Presidency leave school without having attained the object for which they may be supposed to have joined it. The cause is most probably to be found in the defects that characterize the system of instruction, or, perhaps, it might be more exactly said, that it is to be found in the want of system, that is, the prevalent defect in the instruction. In the first place, while there is a great deal of teaching, or what passes for such, there is very little being learned; the majority of the masters ignore the first maxim of the art of teaching: that a lesson is not "given" until it is received, and that nothing is "explained" as long as the explanation is not taken in. The masters hear their own voices; they understand themselves what they say, and take for granted that their pupils also understand and will remember; and as that is much easier than testing the progress made and going over again and simplifying where necessary, they omit to a great extent that troublesome portion, with the consequence that their pupils do not learn and that the master might just as well have never tried to teach. Boys thus imperfectly prepared either fail at the examination, or pass it on just the minimum of marks; in either case they are not properly prepared to study the more difficult subjects of the next higher class. Yet as that class must be filled, perhaps they get promoted. If they get promoted, next year they are plucked and drop off and so join the great army of *majores* who never pass at all: if not promoted they join it a year earlier. It is in this way that there is a preponderating proportion of failures. If every teacher was made to understand that it was incumbent on him that his teaching should be received and that his boys should pass, this state of things would soon alter.

Another thing that has struck me, more particularly in the Madras schools, is the rather general want of aim and system in many branches of instruction. Take, for example, the instruction in the English language. I have not met with any teacher in any class who can tell me what knowledge of English he expects his boys to have when they enter his class, or what he intends them to have mastered when they leave it, except that it is so many pages of such and such books. Now, in the daily English lesson, the teacher, when he enters the class, should have before his mind's eye some particular constructions, idioms, etc., which he is determined the class shall, before he is done with the day's lesson, obtain a clear insight into and mastery over. If this were done in each day's lesson, and if each lesson were made a stepping-stone to the next, each springing from the other in systematic and progressive arrangement, it is obvious that after a year of such lessons a boy's mind would have been built up in a defined portion of knowledge, a certain storey of the building, so to speak, would have been formed, capable of being a solid foundation for a similar course higher up. No matter what the English reading book or the portion thereof, the syllabus to be taught therefrom of English constructions, idioms, and usage generally should for any one class be pretty much the same, being in fact adapted to the standard of the class. But unfortunately there is not in any school, nor for any class, any such syllabus of English. Neither is it written and hung up in the class, as it is desirable it should be, nor in the teacher's mind, where it is still more desirable. The consequence is that each teacher goes blindly on, not able at all to tell what might represent a syllabus of what the teacher taught in the class below him, nor what in turn the teacher above will expect him to prepare the boys in. Each stumbles on, teaching just what occurs to him at the moment; for of preparation of lessons, such as is implied in the preparation of a course, there is little or none. In almost every inspection I have asked to see the teacher's notes of his lessons; but seldom, if ever, have any been shown me. Here lies the explanation of the whole. An organized course of instruction in English and a written syllabus of what is to be taught in each class would involve the systematic preparation of notes of lessons by the

assistant masters, and a general plan, revision and supervision by the principal. This means a great capacity for taking trouble, and as this is as rare as genius, and, in fact, has been confounded with it, what is desirable is not done. But the task that may daunt individuals should not be too much for a department, and I humbly submit that the organization of instruction is the task that lies next before this department. The want of organization and aim and method that I have endeavoured to show in connection with the instruction in English is still more strikingly exemplified in the vernacular instruction, and exists also in other subjects. In every subject it may be said that very little is ever thoroughly taught, for "Never ending, still beginning," and "Always learning and never coming to the knowledge of the truth" are mottos that apply to every portion of every subject until it ends in even B.As. being still ignorant of what they should have mastered in the primary and middle schools, of the correct use of the relative pronoun, say, or of the Tamil future tense, or of practice, or something just as simple and useful. Indeed the want of intelligence and of practical application in the teaching may be mentioned separately as another distinctive defect in the Madras schools.

V.—PRIMARY EDUCATION.

Classification of primary schools.

138. The primary departments of colleges and of secondary schools for boys and girls as well as primary schools proper were reckoned as primary schools in the returns of the past few years under the Government of India Resolution of 1879. In the returns of 1883-84, the system of treating departments of schools as separate schools has been abandoned as already explained, and primary schools proper alone are reckoned as primary schools. The distinction between English and vernacular schools has also been discontinued.

Number and strength of primary schools.

139. The number and strength of primary schools, public and private, are exhibited in the following table. The departments of schools have been eliminated from the figures of 1882-83, but all the pupils belonging to primary schools and primary classes of superior schools are shown under 1882-83 as well as under 1883-84, as the number of pupils studying in middle results schools at the close of 1882-83 were not distinguished in the returns of that year.

Schools.	Number of schools.		Number of pupils.	
	1882-83.	1883-84.	1882-83.	1883-84.
Primary schools for boys	15,152	14,692	387,329	386,028
Do. for girls	526	508	26,670	27,262
Total ...	15,678	15,200	413,999	413,290

The number of schools for boys and also for girls has declined, and the causes that led to this reduction have been fully explained in the first section. The attendance in boys' schools slightly fell owing to the closing of certain petty schools. The number of girls has risen. Of the pupils, 32,976, or 8·5 per cent. of boys, and 8,366, or 30 per cent. of girls, were reading in 1883-84 in the primary classes attached to secondary schools, and although the figures of 1882-83 are not available for comparison, there can be little doubt, speaking generally, that the primary classes of well-established secondary schools are stronger than they were in the preceding year. The average strength of primary boys' schools proper was 24, of girls' schools 37·2.

Primary schools in the hill tracts of Ganjam.

140. The number of hill schools in Ganjam, viz., 17, remained unchanged during the year. The total attendance rose from 790 to 982 —boys, from 692 to 868, and girls, from 98 to 114—which is very satisfactory, more especially considering that no less than 45 pupils were reading in the upper primary division on the 31st March last against 9 in the previous year. Eleven new schools on the combined system have been recently established. This encouraging advance is in a great measure due to the enthusiastic support which education in these barbarous tracts receives from Mr. Mounsey, the Special Assistant Agent, who has charge of the schools. The schools were not visited by the Inspector during the year, owing to ill-health and press of

PRIMARY EDUCATION.

work. They were, however, visited by Mr. Monro in the preceding year. The Special Assistant Agent has the following remarks regarding the Ganjam schools:

"I now have to report what perhaps is a more hopeful and pleasing condition than that there is general improvement in the schools themselves. The result of the scheme in force for education in these mahahs is beginning to bear good fruit. The people are anxious to have more schools, and to some slight extent have helped themselves in getting them. They now appreciate the results of education. I have on all occasions, where possible, given employments of a temporary and permanent nature to those who have learnt to read and write in the schools; many, including several Khonds, have been so employed, especially this year, on road work, and this has largely stimulated the people to come forward—the Uriyas in the hope of employment, the Khonds with the same hope and also with the desire of learning Uriya. The difference a few years' schooling makes in the Khond children is easily noticeable. At first they come dirty and naked, and shy and ignorant even of Uriya. Afterwards the intercourse with the Uriyas—and for this a mixed school is better than a pure Khond one—makes them more cleanly in their persons, less shy and timid, and instead of being naked they wear cloths—often good muslin ones tied in the Uriya fashion. So I have seen them come to my tent with their fathers, the latter dressed in the Pano woven coarse cloth with its gaudy ends hanging nearly to the ground."

Primary schools in the hill tracts of Vizagapatam.

141. The only Government school established (1882) in the Vizagapatam Agency tracts, viz., that at Rayaghada, contained 30 pupils, all reading in the lower primary classes. The schools established in the Jeypore territory were improving in numbers and standard, one of the schools having actually been constituted a middle school. The condition, however, of some of the schools is no doubt uncertain. For the same reasons as in the case of the Khond hills, Mr. Moss was unable to visit the Jeypore country during the year. He writes:—

The schools established by Mr. Monro in 1882-83 do not appear to have worked satisfactorily. They are under the immediate supervision of the Superintendent of Hill Schools, an officer whose movements are very difficult to check and with whom it is difficult to correspond. Hitherto he had not been under the control of any resident officer. But just lately the Special Assistant Agent has been interesting himself in the schools, and they would no doubt be very much better looked after if he would kindly take charge of them and assume control over the Superintendent of Hill Schools. From the Superintendent's report it is hardly possible to make out how the schools are getting on. The report is chiefly taken up with a description of the district and the hardships and difficulties of living and travelling in it. Very little is said of the state of the schools. He says that he visited and examined the following schools—Kottapadu, Jeypore, Nandapore, Bissamkattack, Rayaghada, Singapore—and that the boys in general did well. Of the number and nature of the schools in this district he reports as follows:—"I have got 10 primary schools, Jeypore and Singapore schools exceeding the Government middle school, Gunupur, in strength and being equal to it in quality, and 62 results schools in my division, and will start some more schools by and by."

Primary schools in the Upper Godávari District.

142. The town school, Bhadráchalam, improved in numbers, and an upper fourth class was formed last year. The elementary schools have risen from 8 to 12, due to the establishment of five new schools and the closing of the Chódavaram school last year. The attendance has risen from 196 to 252. The progress is so far satisfactory, but the spread of education in these remote taluks must be slow until natives of the tract have been trained and employed as teachers. The normal class will, it is hoped, in time effect this object.

Government Muhammadan schools.

143. Of the 4 Muhammadan primary schools mentioned in the last report, 2, those at Rajahmundry and Adóni, were handed over to the Municipalities of those towns under G.O., No. 1768 of 1883, and the Arcot Muhammadan school was abolished on the 31st March last on the resuscitation of the Yeomiah school under the management of the North Arcot Local Fund Board. The practising school attached to the Muhammadan elementary normal school, Madras, contained 64 pupils against 74 at the close of the preceding year.

With a view of encouraging the elementary education of Muhammadans in the town of Madras, trained pupils of the Muhammadan normal school were induced to start schools in the different suburbs on promise of a small fixed stipend from Government, supplemented by results grants. Seven such schools were at work at the close of the year with 220 pupils.

Local Fund schools.

144. The following statement is a summary of the Local Fund primary schools. The number of schools has fallen from 1,042 to 973 and the attendance from 35,770 to 30,825. In the district of Godávari alone there was a decrease of 76 schools, and 4,589 pupils, which was chiefly the result of the reduction of the provision for education in the Cocanada and Ellore circle budgets for 1883-84, and the consequent abolition of the weaker schools. Many of the schools were maintained on an unnecessarily expensive basis, and consequently the action of the Board will ultimately probably be beneficial on the whole, the pupils being gradually absorbed by results schools at a less cost to the Board. In Kistna, Nellore, North Arcot and Tanjore also there was a diminution in the number of schools and scholars, due to the abolition of unpromising schools, which is not a matter for regret. The increases noticeable against some districts are slight save in Trichinopoly. In this district 58 schools have been added to the list. In the previous year's report these schools were returned as private combined schools aided from Local funds, but as fees are now credited to Local funds, they have been returned as Board schools proper. The single school entered in each case against Madura and Coimbatore is the practising school attached to the Local Fund normal school, and the Tirukurangudi chattram school is entered against Tinnevelly. The number of girls in Local Fund schools for boys has risen from 2,640 to 2,765.

Municipal schools.

145. The annexed statement, giving a summary of the Municipal primary schools, shows that the total number of schools remained unchanged though there were slight fluctuations among the districts. The attendance rose from 4,453 to 4,662, and the number of girls from 60 to 132.

The first, second, and sixth divisions show improvement in schools and scholars. The third division shows diminished attendance, and the fourth and fifth divisions a falling off in schools and scholars. Some of the combined schools in the Trichinopoly Municipality were closed, while 8 Municipal combined schools were opened in Coimbatore and 4 in Malabar.

Schools aided on the combined system by Local Fund Boards.

146. Combined schools aided from Local funds have fallen in number from 727 to 663 and the attendance from 25,608 to 24,076. This is chiefly due to the transfer of combined schools in the Trichinopoly District from the aided to the Board list. Nellore and Tanjore appear in the list for the first time. The Local Fund combined schools in these districts were converted into aided combined schools. The arrangement may, for the present, be an economical one, and it will probably stimulate the teachers to the display of greater energy; at the same time, it is matter for consideration whether in the long run it would not be quite as economical if the Boards retained the schools under their own management, as the levy of fees at moderate rates tends to make this class of schools gradually self-supporting. In Ganjam, Coimbatore, and Malabar there was a fall in the number of schools owing to the closing of petty schools.

Malabar	30	68	1,599	3,477
South Canara	5	1	253	41
Total ...	49	81	2,623	4,230

There was considerable increase in the number of schools and scholars, chiefly owing to the Municipalities in Malabar having aided a larger number of schools on the combined system. The 5 schools in Madras entered in the last report do not appear in the above list, the schools having been correctly classed as Government schools, the masters being in receipt of fixed stipends from Provincial funds.

General remarks on combined schools.

148. Of the combined schools in the fifth division Mr. Logan writes :—

At the close of 1882-83 there were 14 schools of this class under the management of the Local Fund Board, Tanjore, which paid the masters partly in the shape of fixed salary and partly in results grant, and also bore all other charges, such as furniture, house-rent, contingencies, &c., relating to these schools; the fees collected in them were credited to Local funds. Besides these, there was a Muhammadan school under the same management, but, unlike them, entirely on the fixed salary system, the pupils being free scholars. Under the notification for the admission of masters for training in the elementary normal school, Tanjore, schools under trained masters were to get fixed salaries ranging between Rs. 3 and 7 and results grant at half rates in addition to any fees that might be collected, the charges on account of house-rent, furniture, &c., being borne by the masters themselves. To introduce uniformity in all the combined system schools of the circle, the Local Fund Board, at the suggestion of the Deputy Inspector of Schools, Northern Range, Tanjore, resolved to place all the schools above mentioned on the same footing as schools opened by trained masters, and accordingly they were, by the notification of the 23rd February 1883, declared to be "aided combined system schools" with effect from the commencement of the official year under review. Thus, on the 1st April 1883 there were 15 aided combined system schools working under the rules of the 23rd February 1883 quoted above. Twenty-five trained masters became eligible for aid on the combined system under the rules, and they were admitted as teachers, and so the number of combined system schools increased to 40, 29 in the northern range and 11 in the southern.

Mr. Marsden writes as follows on the combined schools in his division :—

There were 71 schools of this class, attended by 2,923 pupils. The average number of pupils in each school was therefore 41. The average cost of each institution was Rs. 171 and the cost to Government funds was Rs. 117. Similarly, each pupil cost Rs. 4-2-6, the cost to Government being Rs. 2-13-10. The average cost of a school being the average income of the masters, it follows that this income was Rs. 171 per annum or Rs. 14-4-0 per mensem. On the other hand (the schools being *aided* and not Government institutions), there are several items of expenditure which must be met from the income. There is the rent of a school-house, the first cost and subsequent upkeep of furniture and maps and contingencies. Putting these at Rs. 2 per mensem, there remains Rs. 12-4-0, which would no doubt support a master. But some schools are too large for one master to manage. Thirty-two schools have assistants recognized by the Boards and aided with salary grants varying from Rs. 4 to Rs. 3. Such men are entitled to the fees paid by the pupils whom they teach and the results grants earned by them. In other schools (not many, however) the master engages a pupil teacher and pays him himself, usually 2 or 3 rupees, but allows him no share in the fees or results grants. Taking into account the various items of expenditure noted, the average income of the headmaster of a combined system school, calculated on the data given, would amount to about Rs. 8, and that of an assistant to about Rs. 4, these amounts including the salary grants paid monthly and the results grants paid annually. The cost of these schools will be considerably reduced next year as the Board has resolved to cut down all results grants 50 per cent. Several masters will find it hard to make a living unless they contrive to make their boys pay higher fees. Six of the 71 schools on the *combined system are in the Municipality of Mangalore.* They are attended by

PRIMARY EDUCATION.

297 pupils, including 281 boys and 16 girls. The higher rate of fees lately introduced in secondary schools will probably have the effect of strengthening these schools at the expense of the primary departments of superior schools. They are pretty well distributed over the town, and are under the direct inspection of the headmaster of the Municipal middle school, who receives an allowance of Rs. 10 per mensem for this duty. The plan is new, and will, I think, work well. Formerly the schools were directly under an Inspecting Schoolmaster, a man infinitely inferior to the headmaster of the Municipal school, who is a graduate of the University, and who is directly interested in most of these institutions as the main feeders of his own school.

Aided and unaided elementary results schools.

149. The annexed table gives a list of elementary results schools, aided and unaided, in each district at the close of the year, boys' schools being distinguished from girls' schools. The total number of aided and unaided schools was 8,279 and 4,837, against 9,830 and 5,993 in the previous year. But the figures of that year included primary classes of secondary results schools, and also Municipal and Local Fund schools that received aid from Provincial funds. Schools which did not conform to the departmental standards were classed as unaided schools in 1882-83. These have also been excluded from the above list. The Local Fund and Municipal schools referred to have been excluded as regards 1883-84, as they have appeared once under the appropriate heads in the preceding portion of this section of the report. If allowance be made for this change and also for the fact that primary departments of secondary schools are no more reckoned as separate institutions, the decrease will be found comparatively small, being attributable to the abolition of insignificant schools in out-of-the-way places.

General remarks on the working of results rules.

150. Mr. Moss remarks as follows on the primary schools in the first division :—

On the whole there has been a decrease of 134 schools and 5,964 pupils. This diminution in the number of schools and scholars has been confined to the Ganjam and Godávari Districts, the Vizagapatam District having shown an increase both in the number of schools and scholars attending them. In the Ganjam District the decrease in schools and pupils has taken place chiefly in the present Russellkonda range. The Deputy Inspector offers the following explanation of this diminution in the number of schools and pupils :—"Some teachers being dissatisfied with their work, a few finding the inhabitants unwilling to send their children to schools unless they were set up on the old system ; many teachers being unable to provide for them ; some schools being ineligible for grants inspection, the teachers having presented pupils whose education had been neglected for months together." In addition to these remarks of the deputy, it should be noted that there has been an over-eagerness on the part of the Deputy Inspectors and Inspecting Schoolmasters to show on paper an increase in the number of schools and the

number of pupils attending them. Hence many schools have been started which had no chance of permanent success and which have been closed almost immediately, and others have been purely nominal, *i.e.*, in making applications to the President, a manager has given the name of a school and the number of pupils attending it, whereas it has been found by the Deputy Inspector, on going to examine the school for results grants, that the school had never been opened at all. How far these remarks may apply to Russellkonda I do not know. But it is probable that they partly furnish an explanation of decrease in schools and scholars. I have endeavoured myself to impress upon the deputies that a mere sham increase in schools, such as I have alluded to, is to be discouraged.

There can be little question, as already stated, that in this division as elsewhere the decline in the number of schools was in a measure due to greater accuracy in the return of schools actually existing.

Regarding night schools in the division Mr. Moss writes :—

The following table shows the number of night schools of the year under report as compared with those of the preceding year :—

District.	Number of schools on the 31st March 1883.	Number of schools on the 31st March 1884.	Increase.	Decrease.
Ganjam	144	120	...	24
Vizagapatam...	36	34	...	2
Godávari	28	11	...	17
Total ...	208	165	...	43

The total number has fallen off from 208 to 165, and chiefly in the Ganjam and Godávari Districts, the number in the Vizagapatam District having remained almost stationary. Respecting the decrease in the Ganjam District, the Deputy Inspector writes :—"During my inspection in course of the last year, I found that many schools were nominally so called. In many places the teachers held the schools during the daytime, the schools being never held at night, and the pupils reading in them were such as could conveniently attend the day schools, while some of those schools that really deserved the name were abolished, the teachers having found it difficult to keep them in existence."

In the Godávari District the Local Fund Board refused to make provision for grants to night schools during the past year, and the consequence was that 17 schools were closed.

Mr. Bickle has the following interesting remarks on the condition of elementary education in the second division :—

As the number of children in results grant schools amounts to only 64 per cent. of the total number of pupils attending village schools, there is ample work for the Inspecting Schoolmasters and Deputy Inspectors to do in bringing new schools under the results system in every range, particularly in the Madanapalle range, where only a little over one-fourth the number of school children are reading in aided schools. The total number of children in all classes of village schools seems to have increased during the year by 6·5 per cent., the number of pupils in results schools by 2·2 per cent., the number that earned a grant by 9·3, and the amount of grant earned by 9 per cent., so that the average amount of grant earned by each pupil during the year was rather less than in the year before, the respective amounts being Rs. 3-5-3 and Rs. 3-7-8.

The total number of pupils who earned a grant this year exceeded the number last year by about 6 per cent., but the increased amount of grant earned was only about 2 per cent., and thus the average grant earned by each pupil was 2 annas 3 pies less than last year. The first and seventh standard successful pupils were fewer than the year before, but the remaining standards were more numerously represented.

With a view to increasing the regularity of the administration of the result system, nearly three months before the commencement of the official year I issued certain instructions to the Deputy Inspectors, the principal objects of which were to ensure the submission of complete lists of schools which they would recommend for admission to examination for results grants in time for their publication in the district gazettes by the 31st March, as required by Article 51 of the Grant-in-aid Code; the inclusion in those lists of only such schools as were likely, when examined on the fixed dates, to earn a grant; and the completion of their examinations for grants sufficiently long before the close of the official year to admit of the certifying memoranda being paid before the 31st March, fixing for this purpose the 10th March as the latest date on which a school should be examined. I had also very frequent occasion to point out to them that the common practice of applying for the postponement of examinations

PRIMARY EDUCATION.

for grant, often for the most trifling reasons, should be restricted within legitimate limits, or, if possible, avoided altogether. To what extent my endeavours proved successful I will now state. (1) All the lists of schools were submitted by the Deputy Inspectors either in January or February, and they were despatched to the Presidents of Local Fund and Municipal Boards in the same months, with the exception of those relating to the Anantapur Local Fund Circle and Municipality, which were sent on the 3rd March, and a supplemental list of schools in the Bezvada range, which was forwarded on the 15th of the same month. The only list, however, that was published before the end of March was that containing the schools to be aided from the funds of the Anantapur circle. The lists of the Kurnool Local Fund Circle and Municipality appeared in the district gazette on the 7th April, and the remaining lists were published in May, June, July or October. (2) With regard to the number of registered schools which were found to be closed or ineligible for a grant on the dates fixed for their examination, an improvement took place in all the ranges except those of Bellary, Anantapur (Anantapur and Gooty) and Koilkuntla. Last year the percentage of such schools varied between 15·3 in the Bellary range and 44·7 in the Madanapalle range, the average of all the ranges being 27·4, while this year the lowest is 13·8 in the Vinukonda range and the highest, 38, in the former Anantapur range, the average being 22·3. (3) Excluding the Koilkuntla range, in which, owing to the fact that it was without a Deputy Inspector for more than six months it was necessary to postpone the examination of 84 schools, the number of postponements was only 19 in six ranges, viz., 8 in Madanapalle, 4 in Bellary owing to an outbreak of cholera, 3 in Penukonda, 2 in Siddhavattam, and 1 each in Masulipatam and Bezvada, so that there was not a single postponement in the Hospet, Anantapur, Gooty, Cuddapah, Kurnool, Nandyál, Cumbum, Guntúr and Vinukonda ranges. These postponements do not include the Muhammadan schools, which are examined by the Deputy Inspector of Muhammadan Schools, who was able to examine only 5 schools in the Guntúr circle at the proper time, all the other examinations having had to be postponed for periods varying from 10 to 150 days. (4) 29 schools were admitted to examination under the results system after the regular lists were published, 14 of them being in the Madanapalle range, 7 in the Masulipatam range, including 6 opened by trained normal students who were not available for employment until some time after the commencement of the calendar year, 3 in the Bezvada range, and 1 each in the Hospet, Anantapur, Cumbum, Guntúr and Vinukonda ranges. (5) All the certifying memoranda issued by the Deputy Inspectors of the Hospet, Anantapur, Penukonda, Siddhavattam, Kurnool, Nandyál, Cumbum and Masulipatam ranges were paid before the close of the year. In the other ranges 21 remained unpaid, besides 3 on account of Muhammadan schools, 14 were not paid in proper time because of the delay of the managers in presenting them for payment, the issue of 6 was delayed by the necessity of a reference to this office, 3 were delayed in transit through the post, and the amount of 1, though paid just before the close of the year, had to be refunded by the order of the taluk sheristadar. The amount remaining unpaid was—

	RS.	A.	P.
Payable from Municipal funds	160	8	0
Do. Local do.	206	14	8
Do. Provincial do.	158	5	10
Total ...	525	12	6

On the whole I consider the results stated above to be a considerable improvement on those of last year, and that the Deputy Inspectors did their best to carry out my views. In the performance of their other multifarious duties they also, in the main, gave me satisfaction, and some of them did their work in the most praiseworthy manner.

Dr. Bradshaw's report contains the following extracts from the deputies' reports on the working of results schools in the division :—

"*Salem Results school.*—There were at the commencement some 260 schools submitting E forms of application, but the Local Fund Board having rejected a few schools for want of conformity with the Grant-in-aid Code, the remaining 212 schools were recognized and published in the district gazette.

"It is to be noticed that out of 212 schools recognized by the Board, only 165 were actually examined for grant. The Local Fund Board having issued instructions for restricting the amount of grant passable to a teacher, making it dependent on his qualifications, several teachers who were not prepared for such a ruling at that part of the year (seven months after the official year had commenced) grew disappointed, and rather submitting to receive three-quarter and half grants after a year's trouble, some closed their schools and others discontinued marking registers. This accounts mainly for the difference between the schools registered and those examined for grant. The restrictions have since been removed, and I believe that, during the course of the current year, there will be a larger number under inspection.

"*Results schools, Salem Municipality.*—There were 11 aided results schools in the Salem Municipality and 7 under improvement for boys and 3 for girls at the commencement of the year. But some of the schools being rejected as ineligible, only 17 schools were recognized for examination.

"*Night schools.*—Night schools have not succeeded in this range. There were at the commencement of the year 2 schools—one in the Municipality and the other at Madavalam, a village in the Tirupatúr Taluk—and both were recognized for examination. During the year, however, the latter had to be closed by the manager—a trained and passed teacher—owing to short income and bad attendance. The other, with an attendance of 21 pupils, still exists. It presented 12 of them for two standards and both did well. All the pupils were of the weaver caste. They spent the day at the loom and devoted a couple of hours during night to study. Their ages were between 18 and 23."

"*Tiruchengod Result-system schools.*—There has been a general falling off. This is mainly owing to the reduction of grant, selection of schools for admission, and also to some extent to the prevalence of cholera and small-pox in the range, which have greatly affected the strength of the schools. Out of 163 schools registered for examination, 125 received grants, while in the previous year 131 out of 166 schools were aided. But I have to state with satisfaction that the proportion of passed pupils to those presented has been greater than in the last year, exceeding it by more than half. Hygiene and the Agricultural Class-book, which are optional subjects for the fourth standard class, were not brought up in any school, and no attempt seems to have been made to teach the same, inasmuch as the teachers look upon them as they would foreign languages."

"*Hosur.*—The Local Fund Board sanctioned 113 schools in all for examination for grant during the past official year. Of these, 81 schools were actually examined, 3 Hindustani schools were not examined by the Deputy Inspector of Muhammadan Schools, 29 schools were closed before they were examined. These figures disclose a very unsatisfactory state of affairs in regard to results schools. That 29 of the 113 registered, or a little above one-fourth of the number sanctioned, should be closed before they were examined, is a fact which is sufficient to prove that primary education is not voluntary and eagerly sought for by the people. The cause is not far to seek. In most of the villages in this circle, there being no pial schools, the Inspecting Schoolmasters have to go to village after village and see the headman, through him convene meetings of the villagers, and give lectures to them on the benefits of education. The Inspecting Schoolmasters do not succeed in starting schools in all cases. In several villages they meet with a stout refusal. If, in any village, a school is opened with the consent of the people, the Inspecting Schoolmasters then begin to bargain as regards the payment to be made to the teacher, who, with great difficulty, is prevailed upon to take up the post. Some time afterwards the payment of fees falls in arrears, and the teacher, finding nothing to live upon, deserts the village. This takes place before the Inspecting Schoolmaster visits the village next.

"But this is not the case with other circles. In Trichinopoly, where I was for some time an Acting Deputy Inspector of Schools, I found that there was scarcely a village without a pial school. The Inspecting Schoolmaster's duty is simply to induce the teachers to place their schools under Government inspection. There the services of an Inspecting Schoolmaster, I am of opinion, are not so important as in this, where primary education is still in a backward state. Of the 29 schools closed, 5 schools had been deserted owing to the irregular payment of fees due to the teachers, 10 schools were temporarily closed because their masters left the villages and no person could be procured to succeed them, 2 were abolished owing to the dispute between the teachers and villagers, 8 schools were shut up on account of very poor attendance of boys, 1 was closed from the parents' dislike to education, 1 had been abandoned on account of the teacher's illness, 1 was closed because the teacher joined the normal school and nobody was willing to take up the post, and the teacher of 1 school became a vakil. Again, from the closure of 18 schools or nearly one-fifth of the number examined for grant, it is evident that the results system is not without defects. Many teachers start schools two or three months prior to the date of submission of applications for aid, and, continuing in them until after the examination, pocket whatever grant they get, close them, and run away. Of course the Grant-in-aid Rules lay down some conditions for the selection of a school for aid, but contain no provision for checking the closing of a school after it has been examined.

"I am inclined to attribute the instability of the schools to the non-payment of school fees by pupils, and the payment of a lump grant which is the root of the evil. In considering over this matter, it has suggested itself to me that the payment of the grant in four instalments, after it has been earned, would be a wholesome check. The Inspecting Schoolmaster's work will then be better effectual and the grants spent will not be a waste as they are at present in some cases.

"*Night schools.*—There was one school of this kind at Laligam in the Dharmapuri Taluk, started chiefly for the education of agricultural classes. The pupils were above 25 years of age, and as they were engaged in cultivation, they could not possibly attend to studies during the day. They showed an eager desire for reading, and attended the school regularly during the nights from 7 to 10 P.M. I visited the school in August, and found that the pupils were well up in the subjects taught. It was recommended to the Board for sanction, but they did not accept the proposal. The teacher closed it and joined the normal school, Salem."

"*Chittoor East—Results schools.*—240 schools, inclusive of 4 night schools and 4 girls' schools, were sanctioned in Chittoor East for examination for grant in the year under report. Of that number, 186 were examined and passed grant for; but only 172 schools actually drew grant during the year, the payments to the remaining 14 being held over to the current year:

PRIMARY EDUCATION.

4 schools besides were paid during the year under report the grants due to them for the previous year.....Of the 54 schools left unexamined, some were found closed and others unqualified for grant. But in most of those villages the schools were either revived or new ones started. Many private schools besides were brought under inspection.

"In my last report I stated that there were 4 trained and passed men in the range keeping results schools of their own, and I have since persuaded some more to follow their course, and there are now 12 passed and trained men that keep their own schools. This is satisfactory, and in course of time I hope there will be many more doing so.

"*Night schools.*—There are 5 night schools in the Wálajáh Taluk conducted under the results system under the management of the American Mission. These are held in parcherries of the villages Ekambaranellur, Thagarakuppam, Basur, Maniambat and Kumalanthangal, and are intended for the Paraya children, many of whom are Christian converts. The boys all belonging to the agricultural laborer class, they hardly find time to spare during the day to attend to their studies.

"In each of these villages there is a church of the Mission in charge of a native pastor, who devotes a few hours at night to educating them and is paid half the results grant earned by his pupils."

"*Vellore West.*—The number of schools (aided and unaided taken together) has declined from 159 to 112, while the number of scholars shows a decrease of 1,139, or 27 per cent. nearly. The total amount of grants paid during the year is only a little over half of what was expended under the head the previous year, and the enormous difference, notwithstanding the increase in the number of pupils presented and passed under the different standards, is due to the reduction in the scale of grants from two-thirds to a moiety of the maximum rates. The number of schools originally recommended for aid from Local funds was 163 against 103 the year before. But the Local Fund Board required a revised list to be submitted, reducing the number of schools on account of the inadequacy of the allotment for results grant. Most of the schools brought under inspection during the previous year, and some of the old schools examined for grant, were accordingly disallowed and only 101 institutions were registered. Notwithstanding the reduction in the number of schools, no more than a moiety of the grant earned was sanctioned. In the report submitted for 1882-83, when only two-thirds of the grant were allowed, I made the following observations:—'I have here to point out that the reduction made in the scale of grant in the case of results schools during the year under review has created a feeling of discontent and distrustfulness in the schoolmasters, which cannot but operate injuriously on the progress of elementary education. Two of the schools closed collapsed from the reduction made in consequence of insufficiency of funds. The assurance made to the teachers that they will be allowed the maximum rates during the current year enabled me to organize and bring under inspection so many as 70 schools; but if the assurance is not maintained by the restoration of the original rate of grant, I apprehend that many of the schools, the organization of which entailed no small amount of labor and difficulty, will cease to exist, or will be withdrawn from inspection, or will deteriorate both in point of number and efficiency. It is therefore highly essential that the scale of grant sanctioned in the Grant-in-aid Code should be allowed in full, which will considerably contribute towards the development of these schools and the spread of primary education among the masses in rural tracts.' I regret to state that the prediction I have made has come to pass. The number of schools on behalf of which E form applications were received was only 109, and 9 of them were recommended for rejection for non-compliance with the requisitions of the Grant-in-aid Code, so that no more than 100 schools will be registered for examination during the current year. I was unable to bring more than 18 schools under inspection, and no amount of persuasion could induce the pial schoolmasters to place their institutions under the superintendence of the inspecting officers and to apply for aid, which they state is not worth the restriction they will be subjected to. They have little confidence in the assurance we make, and apprehend they will be eventually refused aid altogether. I am of opinion that unless the maximum rates are allowed, the development of primary education will be hampered and all the labor and time bestowed for the spread of it will be wasted.

"*Vellore East.*—The number of primary schools recognized for examination during the year was 67, while the number actually examined for grant was 66. The one school at Namaudy in the Wandiwash Taluk was not examined for grant, as the teacher had entered in his attendance register the attendance of the boys for the complete month, a few days before its close, not with the object of cheating, but through sheer ignorance. He was, however, withheld grant. The results of my examination of results schools are very satisfactory. The general complaint of the schoolmasters is that their income from fees is almost *nil*, and that they are made to depend entirely on the grants they earn for their maintenance and support. There is not the least falsehood in their statement, for in many cases I have met with villagers who questioned me as to the propriety of teachers demanding fees for their children when they are paid grant only in consideration of their poverty.

"It is owing to this that several passed normal students are unwilling to start schools in villages, for how are they to live till they earn their grants, which will not be before a year, or at least before six months, after which alone their schools become eligible for grant, if they do not get the support which they ought from the villagers. To add to their misfortune is the reduction in the scale of grant from full to two-thirds in 1882-83 and to half in 1883-84.

"*Cuddalore Results schools.*—During the year 1883-84, 145 schools were registered for examination, of which 26 were closed before the date of examination, so that 119 were examined for grant. The number of schools actually aided during the year was 117. These 117 schools drew a grant of Rs. 3,329-9-4 from Local funds and Rs. 189-9-2 from Provincial funds. The passes in the first and second standards are satisfactory, but in the case of third and fourth standards, the passes in Tamil Grammar, Geography and English are far from being satisfactory. Several schools have not attempted to teach English for the fourth standard on account of the difficulty teachers experienced in teaching Garthwaite's Second Book. Besides these, there are 44 unaided day schools and 1 night school with a strength of 894 pupils unaided in the course of improvement; most of them have applied for aid during the year and sent up E forms.

"*Night school.*—The night school, Tiruvendipuram, which was recognized by the Director of Public Instruction in his Proceedings No. 48-O, of the 25th April last, was visited by me twice. It had a strength of 38 pupils, of whom 20 were preparing for the first standard. The maximum age of the pupil was 38 and minimum 9, and average age is 18. They are coolies, peasants and shepherd boys, who, on account of their day labor, are unable to attend the day school in the village and attend the school at night for two hours.

"*Vriddhâchalam Results schools.*—There are 176 aided results schools with 2,884 pupils against 117 schools and 2,592 pupils of the preceding year, and 85 unaided results schools with an attendance of 1,598 pupils, while for the preceding year we had 145 schools and 2,059 pupils. Of the 4,482 pupils in results schools, aided and unaided, 101 are Brahmans, 4,094 are Sudras, 27 are Muhammadans, 74 are Native Christians, and 86 are others. Again, of these pupils 42 read English and 4,482 read Tamil. As for the occupation of the parents, 2 are officials, 239 are petty officials, 599 are traders, 3,236 are landholders, 167 are artizans, 224 are coolies, and 18 are others. Out of 2,021 pupils examined for grant, 5 appeared for the fifth standard, 18 for the fourth, 192 for the third, 565 for the second, and 1,241 for the first. The miserably small number presented under the higher standards bespeaks not only the incapacity of the teachers generally to teach for the higher standards, but also the general tendency of the people to withdraw their children as early as possible to work for them. It is also to be noted that passes in English, Arithmetic of the higher standards, Geography, Tamil Grammar, History and Hygiene fell below 30 per cent. and furnish further proof of most of the results school teachers being unequal to the requirements of the higher standards. For raising the status of the indigenous results school teachers, I think it necessary that provision should be made in normal schools not to confine itself to preparing select teachers for examinations, but also to make schoolmasters of middling quality to learn and teach, though they may be past the hope of passing. In that case there must be two sections in normal schools—one to pass the Special Upper Primary Examination and the other to improve the stock of knowledge and to learn the art of teaching. This seems to be the only way of reaching most of the results school teachers who are capable of making improvement, but not to the extent of passing a public examination.

"*Tindivanam Results-system schools.*—There were on the 31st March 1883, 109 schools with 2,422 pupils. 38 schools, with 841 pupils, were since taken under inspection, and 27 schools, with 655 pupils, were during the same period withdrawn from inspection, thus leaving a net total of 118 schools with 2,608 pupils on the 31st March 1884. During the year under review a few but important additions to, and alterations in, the Grant-in-aid Code have been made. The increased grant sanctioned to Muhammadan pupils has induced schoolmasters to get as many Muhammadan children into their schools as is possible for them to do. This has already resulted in increased attendance of this class of children in results schools. The concession made to Malayalis and such other rude tribes will, in the long run, be productive of much good by spreading elementary education among these people. There are few villages in my range in which results schools have continually been maintained for five years together. In some thriving villages the schoolmaster gets good grant in two or three years. The villagers begin to envy him, for he, in their eyes, has grown rich. The first feeling of this sort is cherished by village officials. The envy of this class of people proceeds from two sources: first, because of the grant which the village schoolmaster earns and from which he would not pay anything to secure the good-will of the village headman; secondly, all the tricks of these officials begin to be exposed. This not only touches their pockets, but also reduces them in the estimation of their fellow-villagers. These, therefore, try their best to close the school and eventually succeed in their endeavours. Irregular payment of fees is another cause that tells upon the stability of these schools.

"Almost all the masters in these schools are neither passed nor trained men. Advantage is now beginning to be taken of the establishment of two normal schools in the district. A few only of the students that may be trained hereafter will find employment in Local Fund schools. The rest have no option but to start and maintain results schools. This will, in course of time, lead to the larger employment of such men in these schools, and the character of results school education will then be found to have much improved."

The following extracts are taken from Mr. Logan's report:—

Under the head of general remarks on primary education the Deputy Inspector of Schools, Northern Range, Tanjore, remarks: "As in previous years, no schools presented

PRIMARY EDUCATION.

pupils in History, Hygiene or Agriculture, these subjects not being understood or appreciated by the majority of masters. Geography and Grammar also were not brought up in all the schools for the third and fourth standards, and, even in cases where they were brought up, the answering was bad, especially in the last-named subject."

The Deputy Inspector of Schools, Negapatam Circle, is much of the same opinion.

The Deputy Inspector of Schools, Eastern Range, Tinnevelly, says: "The results of the examination of the lowest standards were on the whole fair. Even in those classes the system of teaching Arithmetic was very defective. In the third standard the pupils did rather unsatisfactorily, and only a few Mission schools taught pupils for the fourth standard and the boys were presented for examination under three or four heads only. Of course these remarks do not apply to primary Anglo-vernacular schools connected with the middle schools."

The Deputy Inspector of Schools, Western Range, Tinnevelly, remarks: "During the past two years I have very frequently noticed that in Mission schools generally only a very small proportion of the number of pupils on rolls were presented for examination, and it may be seen that 149 schools of this class with 168 teachers, half of whom are passed men, 44 of them having undergone normal training or obtained ordinary certificates, have been able to earn very little more than a moiety of the grant earned by an equal number of non-Mission institutions, with 194 teachers, all unpassed men. The explanation of this is manifestly *not* that the teachers in the latter are abler than those in the former. A non-Mission teacher, depending as he does for his livelihood upon the fee revenue and the annual results grant, has a direct interest in the well-being of his school and in its success at the examinations: whereas the Mission teacher is generally paid at so much per mensem for the combined offices of village schoolmaster and preacher, and need not, consequently, care very much whether his school is well attended or ill attended, and whether it succeeds or fails in the examinations; and, besides, as a Mission agent he is led to subordinate secular to religious teaching. But it must be admitted that the children that attend these schools belong to the very poorest classes, such as Shanars, Pariahs, &c., who are destitute of all desire and aptitude for learning. Their parents neither care nor are in a position to pay for their schooling, and, indeed, from the smallness of the amount realized from fees, it is clear that they make but a nominal contribution towards the upkeep of the schools and cannot therefore be expected to be anxious as to whether their children pick up anything at all at school. Further, during the greater part of the year they can ill spare their children from their own work, and hence the children, in most cases, find it difficult to put in the minimum qualifying attendance required by the code. Still the state of things, in my humble opinion, could be greatly improved if the Mission authorities concerned would pay the teachers by the month, say, for the religious portion of their teaching a small subsistence allowance, allowing them a liberal percentage of the annual results grant earned for their labors in secular teaching, and thus, in effect, place their schools on something like the combined system.

"In this connection I beg to draw your attention to a serious drawback in the results schools in this range. It will be seen that, out of 419 teachers employed in the schools in this range, no fewer than 300 are unpassed men. In my report for last year I have dwelt at some length on the ignorance which these men show in the conduct of their schools. I need hardly, therefore, say anything more than that, so long as these men are not specially taught and trained for their work, the quality of elementary education in the range, which has been, for some time past, at a standstill, can admit of very little improvement in the future. I presume that things are no whit better in this respect in the other educational ranges of the district. I therefore think it of primary importance that an elementary normal school for the training of pial schoolmasters should be established in this district as has been done in several others."

Mr. Monro remarks as follows on primary schools for boys, in the sixth division:—

"*Trichinopoly.*—The change of classification accounts for an apparent decrease in the district of 21 schools and 1,045 scholars, 27 primary schools with 1,615 scholars attached to colleges and secondary schools having in the returns for 1883-84 been merged in these institutions. Adding these for the sake of comparison to the returns of primary schools for that year, the figures are: 1883-84, schools 488, scholars 13,277; 1882-83, schools 482, scholars 12,707. There is thus an increase of 6 schools and 570 scholars. The increase is small. The Deputy Inspectors report that the prevalence of cholera in the district tended to check education. It is noticeable that the Local Fund combined system schools in the district are Board schools, fees being levied by the Board, paid into the treasury, and returned to the teachers concerned. This seems to me to be the most effectual method of solving the vexed question of the levying of fees. The teachers are paid 50 per cent. of the amount of grant earned. 426 combined system and results schools were registered for examination at the beginning of the year and 344 were examined, earning grants amounting to Rs. 9,713 as compared with Rs. 10,306 in the previous year. From the annual returns it is gathered that in the Local Fund Circle there were 9,322 pupils under instruction, viz., 8,936 boys and 386 girls. The number of children of school-going age being 166,621, the proportion which the latter bears to the former is 5·6 per cent. or 11·1 per cent. under boys and ·4 per cent. under girls.

"*Coimbatore.*—The same reason as that given in the case of Trichinopoly accounts for an apparent decrease of 59 schools and 1,222 scholars. 40 primary schools attached to colleges

and secondary schools with 1,731 pupils are in the returns for 1883-84 transferred to secondary schools. Adding, for the sake of comparison, these schools to the returns for 1883-84 the figures will be: 1883-84, schools 657, scholars 14,605; 1882-83, schools 676, scholars 14,096. There is thus a decrease in the district of 19 primary schools and an increase of 509 scholars. The smallness of the increase is to be accounted for, *inter alia*, partly by the prevalence of cholera and partly by the fact that the grants to combined system schools were not paid. In the North Coimbatore and Nílgiri range there is a falling off of 31 schools. This is attributed by the Deputy Inspector partly to want of proper supervision owing to changes in the staff of Inspecting Schoolmasters, and partly to the indifference of the inhabitants to education in the very backward taluks of Satyamangalam and Kollegal. During the year 1883-84 a new deputy inspectorate was created—three taluks from the old *North Coimbatore* range and one taluk (Palladam) from the *South Coimbatore* range were constituted the *Central range* —whilst the Nílgiris were added to the Satyamangalam and Kollegal Taluks and formed into the *North Coimbatore and Nílgiri* range. 599 combined and results system schools were registered for examination and 441 schools were examined, earning grants amounting to Rs. 14,642 as compared with Rs. 14,946 in the previous year. According to the annual returns of the Local Fund Circle there were 10,801 children under instruction (10,272 boys and 529 girls). The number of children of school-going age being 239,948, the proportion which the latter bears to the former is 4·5 per cent., or 8·8 per cent. under boys and ·4 per cent. under girls.

"*Malabar District.*—There is an increase in this district of 8 schools and 1,386 scholars, but 26 primary schools attached to the college and high schools with 1,651 scholars have in the returns for the past year been transferred to secondary schools. These for the sake of comparison should be added to the returns of that year. The figures will then be: 1883-84, schools 888, scholars 38,519; 1882-83, schools 854, scholars 35,842. There is thus an increase in the district of 34 schools and 2,677 pupils. This is most satisfactory having regard to the fact that the Local Fund Board were for financial reasons obliged to carry out certain retrenchments. No new grants to combined system schools were sanctioned, and in the case of combined system schools being closed, the President refused to transfer the grants to other schools. Consequently education received a check. It is probable that with additional funds the number of schools in the district could be quadrupled. The number of combined system and results schools examined for results grants during the year was 561, and the amount of grants earned by them was Rs. 37,704 as compared with Rs. 27,102 in the previous year. The number of children under instruction being 31,433 and the number of children of school-going age being 330,468, the proportion which the former bears to the latter is 9·5 per cent. or 16·7 per cent. under boys and 2·4 per cent. under girls.

"*Nilgiris.*—7 primary schools attached to secondary schools have, according to the new classification, been merged in the latter institutions. Adding these for the purpose of comparison to the returns of the past year, the figures will be: 1883-84, schools 24, scholars 1,139; 1882-83, schools 24, scholars 1,234. The number of schools therefore remains the same, whilst there is a decrease of 95 pupils. The probable cause of this I have given above. The education of the Badagas is almost entirely in the hands of the German Mission, who support 12 schools with the aid of small salary or strictly lump grants from the Local Fund Board. Two new schools at Kalhatti and Sholur were opened by the Mission during the year under review. The attendance in the Mission schools rose by 21 pupils, the attendance being 246 on the 31st March 1883 as compared with 277 on the corresponding date in 1884. The schools are well looked after by the Missionaries and are doing good work, the utmost being made of not very promising material. I am glad to say that Government have sanctioned a small sum for the purchase of maps and diagrams for these schools. The main obstacle to their progress is the difficulty of obtaining competent teachers to serve on the hills. This will be to a great extent met by the establishment of the normal school for Badagas at Wellington. From the annual returns it is gathered that in the Local Fund Circle the number of children under instruction was 353, whilst the number of children of school-going age is 11,088. The proportion which the former bears to the latter is therefore 3·1 per cent."

The same officer remarks as follows on the *night schools* in the division:—

The night school movement has extended largely during the year, as will be seen from the following figures, which show these schools as they stood on the 31st March 1884.

—	Schools.	Pupils.
Trichinopoly	6	105
Coimbatore	38	644
Malabar	55	1,750
	99	2,499

There were no night schools in existence on the same date of the previous year. Mr. Matthai reports that in Pálghat the students of the night schools that have been opened by the

PRIMARY EDUCATION.

Municipality are most regular in their attendance, few of them failing to come to school after the day's work is over.

Muhammadan education.

151. The statistics regarding the number of Muhammadan pupils in the different districts and classes of institutions have been given in Section I. The following extracts are taken from the report of the Deputy Inspector of Muhammadan Schools:—

Masulipatam range.—7 schools were examined in this range, viz., the Government Muhammadan school of Masulipatam, the 2 Muhammadan girls' schools in the Masulipatam Municipality under the management of Miss Brandon and Mrs. Ratnam respectively, and Muhammadan schools in the villages of Peddaparru, Chandole, and Addepalle, aided on the results system. Of these, the Government Muhammadan school of Masulipatam, which has since been transferred to the Municipality, passed a tolerably satisfactory examination. The Muhammadan girls' school under the management of Miss Brandon did fairly, but that under the management of Mrs. Ratnam fared rather poorly. The results of examination of the Muhammadan results schools of Peddaparru and of the 2 Muhammadan schools of Chandole were satisfactory, but the Muhammadan school of Addepalle did badly.

Bezvada range.—In this range 6 schools were examined, viz., the Muhammadan department of the C.M. high school of Bezvada, the C.M. girls' school of Bezvada, the Local Fund combined system school of Kondapalle, and the Muhammadan schools of Bezvada, Valluru and Pendala. Of these, the Muhammadan department of the C.M. high school of Bezvada passed an indifferent examination. The C.M. girls' school of Bezvada and the Muhammadan results school of Bezvada did fairly, but the results of examination of the Muhammadan schools of Pendala and Valluru were extremely unsatisfactory. The Local Fund combined system Muhammadan school of Kondapalle passed a creditable examination and earned a pretty large amount of grant.

Guntúr circle.—7 schools were examined in this circle, viz., the Municipal Muhammadan school of Guntúr, the 5 Muhammadan results schools in the Guntúr Municipality, and the Muhammadan result school of Varagani in the Sattenapalle Taluk. The Municipal Muhammadan school of Guntúr passed a satisfactory examination, as also the results grant school of Varagani; but the results of examination of the results grant schools in the Guntúr Municipality were, excepting in the case of one, unsatisfactory.

Cuddapah circle.—Only 1 Muhammadan school, in Kamalapur, on the results system, was examined in this circle and that did very unsatisfactorily.

Kurnool range.—In this range 4 schools were examined, viz., the Muhammadan department of the Government high school, Kurnool, and 3 Muhammadan results schools in the Kurnool Municipality. The result of the examination of the Muhammadan department of the Government high school, Kurnool, was hardly satisfactory, and those of the other schools in the Municipality more or less the same.

Bellary range.—In this range 12 schools were examined, viz., the Municipal (late Government) Anglo-Vernacular Muhammadan school of Adóni, the Municipal Hindustani schools of Adóni and those of Brucepetta and Cowle Bazaar in the Bellary Municipality, and results grant schools—2 in Adóni and 6 in Bellary. Of these, the 2 Municipal schools of Adóni passed a tolerably satisfactory examination. The Municipal Hindustani school of Brucepetta did rather poorly, but that in Cowle Bazaar passed a more satisfactory examination. The results grant schools both of Adóni and Bellary fared but poorly at my inspection.

The Third or Presidency division.—The schools examined in this division were the Government Madrasa-i-Azam, the Government Muhammadan middle school, Mailapur, the Government Muhammadan normal school, Madras, the Muhammadan department Church of Scotland Mission school, Madras, the 5 combined system Muhammadan schools in Madras, and the 17 results grant schools in Madras—15 poor and 2 non-poor. I also assisted the Inspector in the inspection of the practising department of the Government normal school, Madras, and the inspection of the F.C.M. high school, Trivellore, besides examining 3 Telugu schools in Madras for results grants during the temporary absence on leave of Mr. Velu Pillai, Acting Deputy Inspector of Schools, Madras. The results of my examination of the Madrasa-i-Azam were not what could be called satisfactory. The Government middle school, Mailapur, passed on the whole a fair examination in the Hindustani and Persian subjects, though the results in the non-vernacular subjects were unsatisfactory. The practising department of the Government Muhammadan normal school, Triplicane, did fairly at my inspection, but the results of the normal department were pronounced unsatisfactory by the Inspector. I was not satisfied with the results of the Church of Scotland Mission school, Madras. The classification was bad, the text-books ill chosen, and the teaching after the old method.

The combined system schools in Madras did better than they had done in the previous years, but are yet capable of much improvement. The Muhammadan poor schools of Madras passed with but a few exceptions more or less unsatisfactory examinations. The teachers need being taught some of the subjects themselves, and stick to the old method of teaching besides, and hence the schools remain in the same unsatisfactory condition year after year.

Of the Mappila schools in Malabar Mr. Monro writes :—

The following table exhibits the state of education among the Mappilas of Malabar during the past ten years :—

Years.	Schools.	Number of pupils, whether boys or girls, &c.		Results grants and stipends.		
				RS.	A.	P.
1874-75	156	Boys and girls ...	6,017	9,608	0	0
1875-76	210	Do. ...	7,212	15,555	0	0
1876-77	201	Do. ..	6,445	10,195	0	5
1877-78	166	Do. ...	5,274	8,650	0	0
1878-79	183	Do. ...	4,963	7,922	1	8
1879-80	251	Do. ...	5,648	10,317	9	9
1880-81	210	Boys	5,961	9,584	8	0
		Girls	392			
1881-82	205	Boys	5,131	11,750	2	0
		Girls	435			
1882-83	158	Boys	4,415	8,873	14	10
		Girls	559			
1883-84	213	Boys	6,551	10,533	8	4
		Girls	1,014			

It will be seen from the above table that there has been a marked improvement over last year's figures. The number of schools has increased by 35 per cent. and of pupils by 52 per cent. It is gratifying to see that the number of Mappila girls under instruction nearly doubled during the year. This large increase is mainly due to the favorable rates of results grants allowed for Muhammadans in Section 77 of the Grant-in-aid Code. During the year under report all proposals for the extension of Mappila education generally met with a favorable reception from the President, Local Fund Board, Malabar. This fact, doubtless, accounts for the general improvement of Mappila schools. There was at the close of the year 1883-84 an increase of 55 schools and 2,591 pupils, the total number of schools and pupils being 213 and 7,565 respectively as against 158 schools and 4,974 pupils in the previous year. Most of these schools are under unpassed and untrained teachers. As there is only one normal school for Mappilas in the district, it will take years to supply all the schools with trained teachers. In the present financial state of the circle Board it will be impossible to open another normal school for Mappilas, but I would suggest that the scholarship allotment for the Mappila normal school be enhanced by 50 per cent. with a view to a greater number of Mappila boys being admitted into the school every year. A large number of Mappila indigenous schools still remain unaided, and if their permanency and efficiency are to be secured, early steps should be taken to place them on the combined system. The Board, however, are at present unable to spare further funds for the purpose.

Number of schools that presented and passed pupils under the first four standards.

152. Eleven thousand eight hundred and eighty-four schools presented pupils under one or more of the first four result standards, of which 11,556 passed pupils against 10,794 in the preceding year and 8,581 in 1881-82. Nearly 3 per cent. (328) of the schools failed to pass pupils under any standard. These failures are distributed as follows among the divisions, viz., 15 in the first, 65 in the second, 4 in the third, 30 in the fourth, 145 in the fifth, 61 in the sixth, and 8 in the seventh. The variations indicate generally the relative care which was exercised by Deputy Inspectors in revising the lists of schools applying for results grants, although, over and above the schools that failed, many did not appear for examination at all. Differences of standard followed by deputies may in some small measure account for failure, but such differences, if they exist, would have a more marked effect on the number of passes in the higher standards than in simply passing pupils under the first standard. The increase of 7 per cent. in the schools passing candidates, more especially when viewed in connection with the fact that the total number of primary schools decreased, is an indisputable proof of the improvement that is steadily going on in primary schools. It need not be said that the mere passing of pupils is no indication of marked efficiency, but it shows beyond doubt that the great majority of village teachers have been keeping to their work, and have gradually been improving their powers as teachers or widening their knowledge.

Number of pupils presented and passed under the first four standards.

153. The annexed table gives the number of pupils presented and passed under the first four standards during 1883-84, boys and girls being distinguished from each other.

PRIMARY EDUCATION.

Districts.	Pupils presented for Standard								Pupils passed under Standard							
	I.		II.		III.		IV.		I.		II.		III.		IV.	
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.

Malabar	6.568	1,023	3,849	441	2,067	216	776	64	4,073	678	2,555	321	1,322	181	544	55
South Canara	1,497	199	1,437	129	882	45	407	5	1,239	159	1,120	103	509	32	218	5
Girls' schools in the third and fifth divisions and South Arcot and Trichinopoly ...	20	1,544	8	1,211	10	823	1	406	19	1,227	7	1,032	10	694	...	347
Total ...	70,663	6,114	50,012	3,613	28,608	1,958	10,726	828	51,630	4,528	37,369	2,909	19,683	1,584	7,055	680

The aggregate number of boys presented for the first four standards rose from 149,125 to 160,009, and the number of girls from 11,009 to 12,513. The total increase approximates 8 per cent. Of the pupils presented, 115,737 boys and 9,701 girls succeeded in passing and in securing a grant. The percentages of passes under "boys" and "girls" were thus 72 and 77 respectively. The exact percentages of passes in the previous years are not available. Viewing standards separately, it will be seen that while the percentages of passes under boys in the first four standards were 73, 74, 69, and 66 respectively, those under girls were 74, 80, 81, and 82. The very favorable results noticeable in the case of girls were probably due to the fact that in most cases girls attend schools that have efficient teachers, whilst a large proportion of the boys are taught in village schools, the teachers of which are often very ignorant.

Number of pupils passed in different heads under the first four standards.

154. A summary of passes under each standard and head in each district is given in the appendix. An abstract is appended, from which it will be observed, as an additional indication of the improvement in village schools, that the total number of passes has improved except under the first standard.

Standards.	Vernacular.									English.			Needle-work.
	Reading.	Writing.	Arithmetic.	Poetry.	Grammar.	Geography.	History.	Hygiene.	Agriculture.	Reading.	Writing.	Grammar.	
First ...	50,167	51,441	49,126	...	...	...	...	...	...	...	...	...	1,731
Second ...	35,708	36,978	33,410	33,379	...	...	...	...	...	...	...	...	1,252
Third ...	18,420	19,473	16,485	17,735	8,121	10,443	1,752	8	4	3,260	3,514	...	770
Fourth ...	7,036	7,489	4,484	6,575	3,651	4,166	1,022	1,123	123	2,164	2,461	1,359	352

There has also been an increase in the number of girls that passed in needle-work under each standard and in the number of passes in Hygiene and Agriculture.

Percentages of passes in Reading, Writing, and Arithmetic.

155. The percentages of passes in Reading, Writing and Arithmetic are compared below :—

Standards.	Reading.		Writing.		Arithmetic.	
	1882-83.	1883-84.	1882-83.	1883-84.	1882-83.	1883-84.
First	68	65	71	67	67	64
Second	70	67	73	69	66	62
Third	66	60	69	64	58	54
Fourth	66	61	70	65	37	39

There was a decrease under every head and standard, except in the Arithmetic of the fourth standard. The fall in the percentage indicates, I do not doubt, increased stringency in applying the tests rather than retrogression in the efficiency of the schools concerned.

Extracts from the inspecting officers' reports on the passes for each standard.

156. Mr. Moss observes as regards passes under the several standards :—

It is satisfactory to notice that there has been a very considerable increase, both in the number presented and in the number passed, during the year under report, though the percentage of passed candidates is very nearly the same as in the previous year. The number of pupils presented for examination for grants was 28,897 against 23,916 in the preceding year, and the number passed 21,144 against 17,876 of last year, the percentage of passed being 73 this year against 75 last year. The number of girls presented was 1,522 against 1,291 of 1882-83, and the number passed was 1,192 against 1,023 in the preceding year, the percentage of passed being 78 this year against 80 last year. In the Ganjam District there was a slight

PRIMARY EDUCATION.

falling off in the percentage of boys passed, and a much larger one in the percentage of girls. This is perhaps owing to the fact that there was a change in the Deputy Inspectors in the Russellkonda and Chicacole ranges, and thus the standard for a pass must have been changed to some extent.

In the Vizagapatam District the percentage of boys passed is slightly lower than in the preceding year, while that of girls remained the same.

In the Godávari District there has been an increase in the percentage of passed candidates, both in the case of boys and girls.

Mr. Monro remarks :—

I regret that in consequence of the returns of last year being incomplete, I am unable to compare the figures of 1883-84 with those of that year. It will be seen from the above that out of a total of 25,552 boys presented in all the standards, 11,659 or nearly 50 per cent. were from the first standard, whilst 7,504 or 29 per cent. were from the second standard, 4,248 or 16 per cent. from the third standard, 1,525 or 5 per cent. from the fourth standard, whilst in the standards above the fourth the proportion dwindled from 1 down to a fraction per cent. It is to be regretted that so few pupils pass beyond that very elementary stage, the third standard, the amount of knowledge therein gained being probably of little use to them in after life. As regards percentage of passed to presented pupils, the average for the whole division is 70·9 under boys and 69·9 under girls. The Trichinopoly District has the highest percentage, viz., 76·6 under boys and 80·6 under girls. The Coimbatore District comes next with 70·2 under boys and 76·5 under girls. In the Malabar District the figures are 69·2 under boys and 68 under girls.

Mr. Marsden writes :—

In the *first standard* there is an increase under all heads but *Writing* (vernacular).

In the *second standard* the increase is considerable under all heads but *Needle-work.*

The *third standard* exhibits a falling off in *Arithmetic, Grammar,* and *Needle-work,* and an increase under all the other heads.

In the *fourth standard* there are fewer passes under all heads in the vernacular but *History* and *Hygiene,* and in English an increase in *Reading,* but a decrease in *Writing* and *Grammar.*

Generally there has been an increase of passes in the first three standards, but a falling off under the fourth standard. This will be seen more clearly from the following statement, in which the difference between the number of passes under the "Three Rs."—the most important subjects—is shown. *One* reason of the decrease in the fourth standard was the severity of the examination papers, particularly that in Arithmetic.

Standards.	—	Pupils passed in 1882-83.	Pupils passed in 1883-84.	Difference.
First ...	Reading	1,246	1,261	+ 15
	Writing	1,328	1,289	− 39
	Arithmetic	1,298	1,300	+ 2
Second ...	Reading	891	1,055	+ 164
	Writing	979	1,122	+ 143
	Arithmetic	964	1,102	+ 138
Third ...	Reading	455	490	+ 35
	Writing	411	469	+ 58
	Arithmetic	416	395	− 21
Fourth ...	Reading	232	203	− 29
	Writing	227	199	− 28
	Arithmetic	152	128	− 24

There are, lastly, *the unaided schools,* 102 in number : 84 of these were opened during the year, but too late to be examined for grants. The 18 remaining schools were on the list and were duly examined, but, the examination having been made shortly before the close of the year, the grants were not drawn before the 31st of March, and the schools not having actually received aid during the year, are classed as "unaided." Of the new schools, 47 were opened in the northern and 37 in the southern range. Most of these will next year appear in the list of schools aided on the results system.

Government girls' schools.

157. There were 15 primary Government girls' schools at the close of the year against 19 at the close of 1882-83. This is due to the transfer of 9 schools in the last year's list to the middle-school grade and to the opening of 5 new schools at Chittoor, Pálkonda, Párvatipur, Anantapur and Poraiyar. The attendance in the 15 schools was 866 against 623 on the 31st March.

Schools.	On the 31st March 1883.	On the 31st March 1884.
Chicacole girls' school	137	127
Russellkonda do.	62	76
Tekkali do.	49	48
Pálkonda do. ... ... }	...	85
Párvatipur do. ... ... }		
Bhadráchalam do.	27	30
Anantapur do.	..	46
Ongole do.	52	80
Venkatagiri do.	49	50
Cuddalore do.	62	80
Vriddháchalam do.	47	46
Chittoor do.	..	50
Krishnagiri do.	75	52
Karantatangudi do.	63	67
Poraiyar do.	...	29
Total ...	623	866

Four of the schools show diminished attendance, notably the Krishnagiri and Chicacole schools. Of the 243 additional pupils in primary girls' schools, no less than 210 appertained to new schools in the list.

Municipal girls' schools.

158. There were 17 Municipal primary girls' schools with 736 pupils against 15 schools with 739 pupils; the particulars are :—

Schools.	On the 31st March 1883.	On the 31st March 1884.
Berhampore Hindu girls' school	40	62
Do. Muhammadan girls' school ...	46	43
Adóni girls' school	22	22
Anantapur do.	31	...
Nellore (1 school) schools	120	37
Conjeeveram girls' schools (2)	72	43
Chidambaram girls' school	43	42
Salem girls' schools (5)	...	170
Mayavaram girls' school	66	70
Srirangam do.	57	52
Negapatam do.	59	...
Coimbatore do.	95	100
Erode do.	...	35
Calicut Tamil girls' school	74	60
Do. girls' school	14	...
Total ...	739	736

The Anantapur school was transferred to the provincial list, the Negapatam school transferred to the Wesleyan Mission, one of the Nellore schools had developed into a middle school, and one of the Calicut schools was closed. On the other hand, 6 schools were added to the list, 5 in Salem and 1 in Erode. The attendance in 6 schools shows diminution in numbers. Some of the schools in the list have since the close of the year been taken over by Government.

Local Fund girls' schools.

159. The number of Local Fund primary girls' schools rose from 22 to 29 and the attendance from 871 to 1,022.

Circles.	Schools.		Pupils.	
	1882-83.	1883-84.	1882-83.	1883-84.

Salem	4	4	96	125
Tanjore (Chattram school)	1	...	93	...
Total ...	22	29	871	1,022

The decrease under Godávari and Tanjore is nominal, owing to the transfer of the Narsápur and Nídámangalam schools to the list of secondary schools. The schools in North Arcot and Salem have improved in strength. Nine new schools

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING

were opened by the Bellary and South Arcot Local Fund Boards although they are not responsible for female education.

Aided and unaided salary schools for girls.

160. Annexed is a list of aided and unaided salary schools for girls. There was a decrease compared with the figures of the previous year. This is due partly to the transfer of certain schools to the list of secondary schools and partly to some of the schools having been brought on the results system.

Divisions.	Schools.		Pupils.

Total ...	105	44	7,093	2,835

161. *General remarks on girls' schools.*—Mr. Monro has the following remarks regarding female education :—

"It will appear * * * that there has been an increase of 628 girls over the figures of the previous year. This is arrived at as follows :—

Increase of girls in boys' schools	868
Decrease of girls in pure girls' schools	240
Net Increase ..	628

"The increase is therefore of *girls in boys' schools*. I do not regard this as a favorable sign. The attendance of girls in boys' schools is almost entirely from the lower castes and is mainly due to the persuasion of results school masters animated by the desire to earn the larger grants offered for girls. Parents have a very natural objection to send their girls to boys' schools. A case recently occurred of misconduct on the part of the teacher of a boys' school towards one of his female pupils. Besides this, I have frequently noticed myself the rough and brutal treatment to which girls are subjected at the hands of their teachers. It is absurd to expect female education to make any progress under such unfavorable circumstances. Until girls' schools can be supplied with female teachers, I see no prospect of any progress in female education. The female normal school at Calicut promises well, but has been too short a time in existence to produce any marked results. I have no doubt, however, that, in process of time, female education in Malabar will make rapid progress. The proposed normal school at Coimbatore will also doubtless bring about a better state of things in that district."

I only partially endorse Mr. Monro's views as regards the inexpediency of encouraging girls to read in boys' schools, but I am wholly with him in thinking that, whenever the advance of education renders it practicable, separate schools for girls should be established.

VI.—SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Number and strength of schools for special or technical training.

162. In the subjoined table the number and attendance of schools for special or technical education for the last two years are compared :—.

Classes of schools.	1882-83.		1883-84.	
	Schools.	Pupils.	Schools.	Pupils
Schools of Art	1	106	1	147
Medical schools	2	180	5	225
Civil Engineering schools ...	1	49	1	73
Normal schools for masters .. .	36	978	42	1,044
Do for mistresses	4	197	8	263
Industrial schools	4	122	4	138
Ordnance Artificers' school	1	70	1	72
School of Agriculture	1	70	1	87
Total	50	1,772	63	2,049

There was an increase of 3 medical schools, 6 normal schools for masters, and 4 normal schools for mistresses. The attendance improved in every class of institution. Four years ago there were only 30 institutions with 1,285 students, so that the number of institutions has nearly doubled, and that of pupils risen by 60 per cent. in this short period. Detailed explanation will be found below under the appropriate heads.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

(a.)—*Schools of Art.*

School of Arts, Madras.

163. There was a noteworthy advance in the numbers attending this school. The following extracts from my review of the annual report of the superintendent show the working of the institution during the year :—

Attendance.—There were 147 pupils on rolls at the close of the year against 106 on the 31st March 1883. The increase, which is nearly 40 per cent., is a certain sign of the growing popularity of the school. Of the pupils, 30 were girls—all of European or Eurasian parentage. A revised scale of establishment for the school was sanctioned by Government in their order dated 19th August 1884, No. 485.

Nationality of the pupils.—Sudras (78) and Europeans and East Indians (55) formed the bulk of the attendance. Native Christians and Muhammadans were represented by 4 pupils each, while the Brahman and Vaisya element was not represented at all. The absence of Brahmans, who are pressing into the other professional and technical institutions, is worthy of note. It can hardly be doubted that so soon as the Brahmans are assured, from experience, that decorative art promises a good *modus vivendi*, they too will claim admittance—a consummation much to be wished.

The distribution of pupils according to social condition places a third of the pupils under the poorer classes having an income of less than Rs. 200 a year. This is significant, showing that the school is resorted to by the poorer classes with the ultimate view of securing a living by practising the arts now taught. The branches of art taught will, it is hoped, be gradually extended, so that the institution may be made to serve the development of all the industrial arts having for their end the construction and decoration of the chief articles, whether of metal, wood, stone or clay, required by the exigencies of modern life in this country. This is, the Director thinks, the proper function of this school, whilst arts connected with the production of raw materials might perhaps be dealt with in the sister institution at Saidápet as well as those falling strictly under the head of "Agriculture."

Of the pupils, 89 were children of officials and 29 of traders, while 23 were of the artizan class.

Artistic department.—The average attendance was the same in the preceding year, viz., 96. The total number of apprentices holding scholarships has risen to 21, including 8 students who, on passing the examination in free hand, were admitted to scholarships. The superintendent has furnished no information regarding the number of examinations held during the year, or the number and nature of certificates awarded. He is requested to supply the omission. The principal work done during the year in this branch of the institution is given by the superintendent. The Government will be addressed separately on the superintendent's proposals to revise the course of instruction and the rules relating to fees and stipendiaryships. The scheme seems to demand being worked out in more detail.

Industrial branch.—The outturn of work in this branch was considerable and the demands of the Telegraph, Commissariat, Medical and Stationery Departments were met. The superintendent is of opinion that this branch of the school may be dispensed with when private enterprise is ready to step in. Whether this view is correct it is not necessary to discuss here, as the time is clearly far distant when private agency can be relied on, but the Director would observe that the tendency in Europe seems to be in an opposite direction to that suggested, if he understands Mr. Havell's remarks correctly. The great principle generally admitted seems to be that the industrial arts to be taught successfully must be taught by a constant combination of practice in details, with a more abstract and theoretical teaching after the manner pursued, for example, in the technical institutions in Saxony. It is, however, hardly necessary to add that manufactures should not be carried on on a larger scale than is necessary to give the pupils ample opportunities for practical work. The superintendent observes that there is little hope of producing porcelain or any very fine ware, unless felspar and quartz of a purer kind than those now obtained and used can be had. He points out that, judging from the specimens he has seen, if exact information of the localities from which they were obtained could be secured, good material might be obtained. It is advisable that he should address the Geological Department on the subject. Possibly an effective means of obtaining good materials would be to issue from time to time a notification in the *Fort St. George Gazette* calling for tenders with samples, or to offer rewards for good samples in quantity.

Finance.—The sale-proceeds of the manufactures of the school and fees realized from pupils amounted together to Rs. 33,166 against Rs. 33,022-12-4 in the preceding year. There has been a diminution in the amount of Government grant. It is satisfactory to note

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

that the amount of outstandings has fallen. The credit balance in favor of the school at the close of the year was Rs. 17,352-7-2 against Rs. 19,987-9-10 at its beginning, the decrease being accounted for by the Government contribution having been less than in the previous year owing to changes in staff and also by the fact that the selling rates have been reduced, to which is due the slight decrease in the receipts from sales, taking them separately from fees.

Buildings.—A sum of Rs. 1,055 was expended from the school funds on improvements to the school building. The Government have been addressed regarding the urgent repairs the school-house is in need of.

Library.—The condition of the library has not been noticed.

Museum.—The superintendent has not reported on the condition of the museum and the number of visitors during the year. The preparation of a catalogue of the present collection, if not already begun, might be taken in hand with advantage. Efforts should be made to secure good specimens of Indian art by purchase or otherwise.

The strengthening of the establishment will, I believe, have a very satisfactory effect on the development of the school, but the scope of the school might with advantage be still widened, so that most industrial artistic callings may have the advantage of superior instruction. It is also desirable at an early date to revise the scheme of study and the rules relating to fees and the award of scholarships.

(*b.*)—*Medical Schools.*

Number and strength of medical schools.

164. The number of medical schools rose by 3 and the attendance by 75 pupils, which is due to the provincial medical schools at Nellore, Tanjore, and Dindigul having been brought on the departmental returns.

Madras medical school.

165. The strength of the school department of the Medical College fell from 124 to 82, which is the result of the abolition of the junior department, adverted to in my last report. The following extracts from my review of the annual report show the progress of the school :—

Second department.—There were 82 students, including 7 females, 3 private and 4 colonial pupils. Ten were in their third year of study, 32 in their second, and 40 in their first. A portion of the last number joined under the rule abolishing the pre-collegiate course and extending the college course to four years. As a whole, the professors reported favorably on the department. Nine apprentices, 2 private students, and 1 female candidate appeared for their final examination, and all passed. Twenty-six students of the second year went up for the primary examination, and all passed and acquitted themselves creditably, 4 getting places in the first class. Three female candidates also went up for the examination and passed with credit. The Director endorses the Principal's remark that "the result of the examination, charactorized as it is by absence of failure, must be very gratifying alike to teachers and to pupils."

Lady students.—The professors' reports show that the class, consisting of 10 students, made progress. Mrs. VanIngen was to have appeared in a few days for the First L.M. and S. Examination. Miss D'Abreu and Miss Abala Das are to go up next year for their University examinations. Miss Ramsbotham of the second department appeared for her final examination and has been pronounced qualified for the work of a medical practitioner. Misses Yerbury, Smith and Stewart appeared for the first or primary examination and passed creditably. Misses Govindurajulu, Jacobsz and Gurdial Sing had just completed their first year of study. The entrance examination for female candidates is now the Higher Examination for Women. It is hoped that in time the University entrance examination may take its place as assuring a wider range of necessary general knowledge.

Pre-collegiate year of study.—The abandonment of the pre-collegiate year of study has enabled the College Council to divide the period of instruction into two equal parts, one ending with the primary and the other with the final examination.

Gratuitous education.—The gratuitous education of students for the grade of civil apothecary will soon cease, and with it the separate examination now held for this grade, so soon as those who entered the college under the old rules have passed out of the institution.

Assistantship to the Professor of Chemistry.—This appointment was abolished during the year, and the tutorial work was done by one of the students, who drew an allowance of Rs. 50 per mensem. It was, however, subsequently thought advisable to revive the appointment of assistant.

Additions to the college buildings.—The estimate amounts to Rs. 75,326, and when the additions are carried out, the building will afford ample accommodation for all its departments. Some additions made to the General Hospital give the students better opportunities of practical study.

Library.—The professors' library contained 5,882 volumes, inclusive of 65 added during the year. Qualified medical practitioners have been permitted the use of the library, but not

to remove the books from the reading room. The students' library contained 2,016 volumes, and the students appear to have made good use of the facilities afforded for reading and reference.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Endowments.—It is very gratifying to note that His Highness the Maharajah of Travancore has generously given Rs. 6,000 for founding a scholarship tenable by women and to be called the "Bharati Lekshmi Scholarship." His Highness also gives a gold medal yearly to the best female student in midwifery. The Director joins in the hope that wealthy members of the community will be induced to found scholarships to assist in the course of study poor but talented youths, now that gratuitous education is to cease.

Expenditure and receipts.—The expenditure was Rs. 67,191-7-11, or Rs. 8,400 less than in last year, due to changes in the staff of assistants and to the removal of the junior department. The receipts were Rs. 13,497 against Rs. 14,068 for the previous year, or Rs. 570 less. This was due mainly to diminution in the rates of fees as students advanced to higher classes, not to a fall in the admission of paying students, the admission of the two years being 21 and 34 respectively.

Auxiliary Medical School, Ráyapuram.

166. There was an advance in the strength of the Auxiliary School at Ráyapuram from 56 to 83. The annexed extracts from the review of the annual report sum up the facts regarding the progress of the school :—

The teaching staff was strengthened by 2 teachers, 1 of them transferred from the Medical College as additional subjects had to be taught; and as the staff was rendered complete, it was found possible to redistribute the work advantageously and to bring it up to the standard of the hospital assistant grade, the practical part of instruction being given at the Native Infirmary.

Of the 63 pupils on the rolls, 36 belonged to the school and 27 had been transferred from the Medical College. In October 1883, 10 pupils for the hospital assistant grade joined for their first year, and private students were admitted on payment.

Forty-three students were in their third year, 29 in their second, and 14 in their first. Of the total number, the Director regrets to find that 2 died. Two private students left.

At the close of the session 42 students appeared for final examination and 38 passed, a very creditable result.

Taking the 86 students on the roll according to race, there was a preponderance of Sudras, and of Native Christians in a less degree. The other races are very poorly represented indeed, and Vaisyas were not represented at all.

The establishment of servants and minor assistants had to be increased, at a cost of Rs. 38, in consequence of the transfer of students from the Medical College.

The following is a summary of the table in the report showing the work done :—

Lectures	411
Examinations...	176

The Director is glad to find that the teachers reported favorably of their classes, and that the conduct of the students had been uniformly good and their progress satisfactory. It is noted that the junior class, which passed the Middle School Examination prior to admission, showed greater intelligence and aptitude in acquiring a knowledge of its first year's professional course and ability in expressing itself at the written examination.

The third-year class was composed of the senior students in the school and the senior students sent from the Medical College. Its strength was 43. The arrangements made by Dr. Thompson tended to promote the harmonious working of the amalgamated classes. The school pupils appear to have achieved greater success at the final examination. Of the 4 failures, 3 were private students who are pronounced not to have been industrious. The fourth student who failed is said to be very hardworking and willing. His remand for one year will therefore be recommended for sanction.

The Government gold medal, competed for by the Dindigul and Nellore schools as well, was won by a pupil of the school—a Vizianagrum student and a matriculate. One student obtained five prizes and 15 others secured more than two-thirds of the maximum marks. These results are creditable.

The second-year class made satisfactory progress, and, with a few exceptions, the conduct of the students composing it was good. Five pupils had not done well, but as they are stated to be industrious and well-conducted, their remand will be recommended.

The first-year class made adequate progress and acquired a good knowledge of the subjects taught. The conduct of the students was good. Two pupils were somewhat deficient, but in the circumstances stated, their remand will be recommended.

The curriculum was framed to suit the junior department of the Medical College. It was carried out as far as practicable for a time, but was found not quite suitable. A revised curriculum, suited to all the schools in the Presidency, is promised, and it will be dealt with when submitted.

There was more sickness than in the previous year. The limited accommodation and great heat of the class-rooms appear to have been the cause of some of the illness that prevailed.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Seven volumes were added to the library, making a total of 15 volumes. The library should be extended.

The Director trusts with Dr. Thompson that the extension of the building will soon be completed.

He notes with much pleasure the testimony borne of the good work of the assistants.

The total expenditure of the school amounted to Rs. 15,326 against Rs. 12,666 in the previous year. A sum of Rs. 702 was realized in the shape of fees, of which Rs. 312 were for attendance at lectures, Rs. 180 fees for attending Native Infirmary hospital wards, and Rs. 210 fees for appearing for the final examination.

Nellore medical school.

167. The Nellore medical school was attended by 23 pupils, of whom 2 were Brahmans and 5 Muhammadans. Twelve students appeared from this institution for the final examination for hospital assistant certificates, but only 2 were successful. The failure was due, no doubt, to some extent to the fact that the students had had little experience of examinations.

Tanjore medical school.

168. His Royal Highness the Prince of Wales' medical school at Tanjore, established in 1883, was attended by 9 pupils on the 31st March last, and 3 of these were Native Christians and 6 Sudras. The institution has not yet commenced to send in pupils for any public examination.

Dindigul medical school.

169. Rev. Mr. Chester, superintendent of the school at Dindigul, has submitted the following report:—

The winter session terminated on the 31st March, and the summer session commenced on the 1st April 1884.

Medical school staff.—No changes have taken place in the staff of the school.

Lectures and examinations.—The medical school registers give the subject of each course, the number of meetings held, number of lectures delivered, and the number of examinations registered in each course during the winter and summer sessions.

At the commencement of the session the school consisted of 10 first-class students in their third year of study, 9 second-class students in their second year of study, and 9 third-class students in their first year of study. Ten lads constituting the first or senior class appeared before the final examination committee appointed by Government at the Madras Medical College on the 9th of June 1884. Nine passed successfully, and with more or less credit. Taken as a whole, the batch which leaves the school to join the civil hospitals at Madura, Tanjore, and Trichinopoly for further practical training, is a fair average one. These lads have had a good clinical training and are likely to prove intelligent, zealous, and useful subordinates. Their conduct in class has been satisfactory.

Assistants.—Their duties are important and arduous, and are performed both carefully and zealously.

Sickness.—There has been no sickness of any importance among the students. No casualty has occurred.

Text-books.—List of authorized text-books: Anatomy, Wilson's Anatomist's *Vade Mecum*; Materia Medica, Milne's; Physiology, Carpenter's; Medicine, Tanner's; Surgery, Clark's; Midwifery, Medow's; Medical Jurisprudence, Taylor's Manual; Hygiene, King's; Practical Pharmacy, Bidie's; Operative Surgery, Bell's; Minor Surgery, Heath's.

The superintendent desires to put on record his sense of the able and efficient help the assistants have rendered him during the past session.

Ten students, it will be seen, appeared for the final examination for hospital assistant certificates, of whom 9 were successful. This result is very encouraging.

(c.)—*Civil Engineering Schools.*

Civil Engineering School.

170. The strength of the school department of the Civil Engineering College rose from 49 to 73. The working of the school will be found in the following extracts from my review of the annual report:—

Second department—Subordinate classes.—The first class consisted of 20 students, and 1 being ill, 19 underwent examination for certificates of qualification as supervisor and overseer. It is gratifying to note that the whole succeeded, 8 qualifying as supervisors and the remainder as overseers.

The remarks made by the examiners on the results in the various subjects are almost uniformly favorable; and it is to be noted that, compared with the average of the last five years, these results show a considerable rise. The Principal, however, admits that the average of the five years was somewhat low owing to the inclusion of a season of depression in the Public Works Department which rendered competition for the college less active. Accepting

this as qualifying the rise to a certain extent, the gratifying fact has to be recorded that such improvement as has taken place is due to a class of young men of better general attainments having come forward as candidates for the institution. A marked rise in the average under drawing is said, however, to be in great measure due to the special pains taken by Messrs. Hyde and Hamilton.

The second class of the second department, consisting of 26 students, underwent a satisfactory examination, and all were promoted to the first class.

Drawing class.—The first division of 9 students all passed and secured certificates as draftsmen and estimators. The certificates, however, were only of the second and third class. The second division consisted of only 4 students. Two produced good results and were awarded scholarships.

Fifty candidates, not college students, the majority being employés in the Public Works Department, underwent examination for certificates as draftsmen. The object, a creditable one, of those already in employment, was to obtain a higher class of certificates than those possessed by them.

Survey class.—The first division consisted of 4 students, who have all succeeded in obtaining certificates. Six independent candidates also underwent examination, but the results were not known. The second division consisted of 8 students, to 3 of whom scholarships were awarded.

Admission to the Junior department.—In April 72 candidates presented themselves for examination. Of these, 6 qualified for the second and 43 for the special department. In addition, 1 undergraduate and 67 matriculates, all eligible without examination, applied for admission to the second department. The accommodation and teaching capacity of the college permitted of only 28 being accepted. The remainder were offered admission to the special department and a few signified their willingness to join. The above figures testify to the increasing demand for men possessing engineering training.

Military students.—Two were about to pass out, 4 were in the second class, 5 were at Bangalore prepared to join after passing in a vernacular language, and 5 had passed the entrance examination and were to enter the vernacular class.

Photographic class.—The class consisted of 12 selected students from the second and special departments: good progress had been made.

Junior departments.—All the overseers who passed in 1883 have obtained employment in a professional capacity, and numerous recommendations on requisitions were made. Of several appointments of draftsmen and surveyors, the Principal necessarily had not heard. As already noted, the Principal considers that the supply of trained engineering subordinates is at present smaller than the demand, and that there are therefore excellent prospects before the men passing out.

(*d.*)—*Normal Schools for Masters.*

Number and strength of normal schools for masters.

171. The number of normal schools for masters rose from 36 to 42, which is accounted for by

(i) the opening of normal classes in connection with the Bhadráchalam and Yellamanchili schools;

(ii) the establishment of 2 Local Fund normal schools, namely, at Kandukúr in Nellore and at Chingleput;

(iii) the establishment of an elementary normal school in Madras by the Municipality as a tentative measure; and

(iv) the opening of a normal school by the American Mission at Chittoor.

There was an increase of 7 per cent. only in the number of normal pupils against an increase of 22 per cent. in the previous year. The increase would have been greater but for the care now taken in the selection of students, admission being almost exclusively limited to young men who are actually engaged in teaching work.

Seven hundred and fifty-seven normal pupils appeared for the Special Upper Primary Examination against 661 in the previous year. The number of passes, however, declined slightly from 499 to 472.

Of the normal pupils, 395 returned to their appointments or obtained employment during the year as per returns furnished by the Inspectors of Schools.

A special normal school intended for Badagas was sanctioned, but the school was not started during the year. The Madras Municipality opened an elementary normal school for the benefit of results school masters.

Normal schools, first division.

172. The normal schools in the first division are given in the annexed statement.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1882.			Special Upper Primary Examination, 1883.		
			Examined.	Passed.		Examined.	Passed.	
	1883.	1884.		First class.	Second class.		First class.	Second class.

Rajahmundry do. do. ...	28	42	...	...	...	30	19	4
Total ...	174	207	98	56	14	173	77	24

The attendance rose by 38, of whom 15 belong to the normal classes opened in connection with the Bhadráchalam and Yellamanchili schools. For the Special Upper Primary Examination 173 candidates went up against 98, but the number of passes did not rise proportionately, 58 per cent. of the candidates having passed against 71 per cent. in the previous year.

The Russellkonda normal school improved in strength, and in the Special Upper Primary Examination passed 7 pupils out of 12 against 3 out of 12 in the preceding year. The Vizagapatam normal school fell in strength slightly, as also the Narsápur normal school; but the former passed 18 pupils, all being placed in the first class, in the Special Upper Primary Examination out of 23 appearances, while the latter passed 14 pupils only out of 24 candidates sent up. It is to be regretted that only 1 pupil passed the examination from the Gunupur normal class. The Berhampore, Chicacole and Pálkonda normal schools did but fairly in the Special Upper Primary Examination. The Rajahmundry Local Fund normal school improved in numbers, and in the Special Upper Primary Examination it passed 23 pupils out of 30 sent up.

Normal schools, second division.

173. The normal schools in the second division are given below. The number of schools remain unchanged, viz., 7, but the attendance fell from 146 to 138, 4 out of 7 schools showing a decline in numbers. The number of candidates for the Special Upper Primary Examination, as well as the number of passes, fell.

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1882.			Special Upper Primary Examination, 1883.

Total ...	146	138	115	66	25	106	70	7

The Masulipatam Local Fund normal school fell seriously in attendance, and had only 12 pupils on rolls on the 31st March last. For the Special Upper Primary Examination 23 pupils were sent up, of whom 17 succeeded. The Guntúr normal school fared creditably in the Special Upper Primary Examination, having passed 28 pupils out of 30 examinees, all the successful candidates being placed in the first class. The Bellary and Anantapur schools improved in strength and passed about 50 per cent. of examinees. All the candidates sent up by the Cuddapah normal school were successful, though the number was small, viz., 6. The Nandyál

school did not meet with the proportionate success of last year, though the attendance improved. The Masulipatam Church Missionary Society's Training Institution declined in numbers, and for the last Special Upper Primary Examination it sent up 5 pupils only against 20 in the previous year; but all the examinees were successful.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Normal schools, third division.

174. The particulars regarding the normal schools in the Presidency division are given in the subjoined table.

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1882.			Special Upper Primary Examination, 1883.		
			Examined.	Passed.		Examined.	Passed.	
	1883.	1884.		First class.	Second class.		First class.	Second class.
Government normal school, Madras	38	35	...	...	...	...	...	...
Elementary normal school for Muhammadans ...	17	16	7	1	3	10	9	1
Nellore Local Fund normal school	19	25	15	6	4	22	15	1

Poonamallee do. do.	34	30	...	...	...	30	11	9
Chingleput do. do.	...	13	...	...	...	...	...	...
Madras Municipal normal school	...	28	...	...	...	...	..	...
Total ...	108	175	22	7	7	62	35	11

Three new normal schools were established in the division during the year, 2 by the Local Fund Boards of Nellore and of Chingleput and 1 by the Madras Municipality. The total number of normal pupils rose from 108 to 175, and the number of candidates for, and passes in, the Special Upper Primary Examination trebled.

In spite of the establishment of a second normal school in the district at Kandukúr, which contained 28 pupils at the close of the year, the Local Fund normal school at Nellore improved in attendance and passed 16 pupils, with 15 in the first class, in the Special Upper Primary Examination out of 22 candidates sent up. The figures of the previous year were 15 examinees and 10 passes.

The Madras normal school slightly fell in numbers. The following extracts from the Principal's letter relate to the working of the institution :—

Mr. Tambu Hensman, B.A., appointed to officiate as Vernacular Superintendent, entered upon his duties on the 14th May 1883, when Mr. H. M. Winfred reverted to his post in the Chittoor high school. Mr. Velu Pillai, who was absent on other duty, returned on the 9th January last and relieved Mr. Hensman. On the 4th February Mr. Hensman was again appointed to act for Mr. Velu Pillai, when the latter was transferred to officiate as Deputy Inspector of Schools, Presidency division. No other changes in the staff occurred during the year.

The following statement shows the changes which took place in the numbers on the rolls of this institution in the course of the year :—

Department.	Number on the rolls on 31st March 1883.	Admitted since.	Left since.	Number remaining on 31st March 1884.
Normal	38	56	59	35
Practising	166	74	107	133

From the above statement it will be seen that there were 35 students undergoing training at the close of the official year. Of these, 8 were not in receipt of scholarships from Government, namely, 5 military students, 1 paid by the Coorg State, 1 paid by the Calicut Municipality, and 1 free scholar. The remaining 27 were in receipt of Government stipends. Again, of these 35 students, 3 were graduates, 8 F.As., 19 matriculates, and 5 military students.

The practising school contained 133 boys at the close of the year as against 166 at its commencement, thus showing a decrease of 33 boys. I attribute this decrease partly to prevalent sickness, but mainly to much of the teaching to which the classes were subjected being below the average during the greater part of the year, and other causes.

Of the 59 students who left during the year, 36 completed their course of training; 12 others were military students who left after the usual short course prescribed for that class of teachers. One Kuppuswami Aiyangar, a graduate, resigned his stipend for an additional translatorship in the High Court. Two students from the Vizagapatam District were sent back to their

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

stations (on leave) on medical certificate; one of these, G. Dikshitulu Shastri, F.A., died shortly afterwards I regret to report, and the other, M. Venkanna Pantulu, was, on his recovery at the end of December, permitted to remain in Vizagapatam as he was too much alarmed to return to Madras. Another student also fell seriously ill just before the final examination and has not yet recovered. One resigned shortly after joining in consequence of severe domestic affliction, and two others—R. Srinivasachari and T. Kumarathatha Chari—after a month's stay were dismissed for declining to sign the required agreement.

* * * * *

Of the 36 students named in the list, one P. Thambachi Pillai, who had already passed the examination in school-management, was not required to appear for that test again. The remaining 35 appeared for the examination and 26 passed. Considering the amount of attention paid to the subject, no student should ordinarily fail to pass the test; but the examination of December last was unprecedentedly severe.

An unusual number of these students were men of several years' standing as teachers in the lower grades, sent here for training to satisfy the departmental rules. They were, for the most part, men of inferior ability and with less teaching-power than the generality of the young men who voluntarily join this institution for training. From this statement, however, I must except Mr. D. A. Hobday, B.A., and M. Chelvarayachari, a matriculate, both of whom proved to be superior teachers before their course ended. Mr. Hobday spent one month working in the Presidency College laboratory under Dr. Wilson, who kindly undertook to instruct him in the use of the apparatus required in teaching the more advanced parts of physics and chemistry. Mr. Hobday will some day, if he gets the opportunity, excel as a teacher of science. He holds the Arni gold medal.

Lectures on Agriculture.—Towards the close of the calendar year, Mr. Benson, F.A.S., delivered a short course of lectures on agriculture to the students. The course terminated with an examination, the results of which were creditable, the students gaining on an average 61 per cent. of the maximum marks.

Lectures on Psychology, &c.—A triple course of lectures on psychology, the history of education and school-management was delivered by Dr. Duncan, Rev. Mr. Alexander, and myself respectively. The results were separately reported in my letter, No. 26, dated 2nd February 1884. The lectures (which were also open to all teachers in Madras) were attended by all the normal students; but only the graduates, 3 in number, and the F.As., 7 in number, appeared for the final examination. All the ten passed, two of the graduates securing "Honors."

Drawing.—Drawing was continued as a subject of instruction to the normal students during the year. As it is highly desirable to continue the teaching of drawing, I have separately addressed you concerning the appointment of a permanent teacher for that subject.

Gymnastics.—Gymnastics were successfully taught by one of the students, P. Alagasingarachari, who has lately gained a first-class instructor's certificate from the Madras Physical Training Association. Some of the boys of the practising school made excellent progress, while all the classes of the school and all the students were taken through the elementary exercises on the horse and parallel bars. More recently exercises on the horizontal bar have been added. I have addressed you separately concerning the appointment of a first-class instructor as a permanent arrangement, so that the training in gymnastics may in future go on without interruption.

The conduct of all the students was exemplary. What defects were observed in them were due to want of mental and physical power, not want of will.

Mr. Garthwaite submitted an elaborate report on the working of the school and suggested several important changes in its constitution and work. This will be noticed in the report for 1884-85.

Reference was made in the last report to the weekly lectures delivered in the Madras normal school on the science and history of education and in school management. No less than 56 students took advantage of the lectures. Fifteen students appeared for the final examination held in December 1883; of these 6 obtained honors, 6 secured pass certificates, and 3 failed. The lectures are being continued during the current year. A movement is now on foot to induce the University to grant a diploma in the art and theory of teaching. The lectures are attended by 38 teachers and normal pupils—3 graduates, 12 undergraduates, and 23 matriculates.

The strength of the elementary normal school for Muhammadans remained almost stationary, and in the Special Upper Primary Examination all the 10 pupils that appeared met with success, 9 being placed in the first class.

The Poonamallee Local Fund normal school shows a slight decline in numbers, but this was probably partly due to the establishment of a second normal school

in the district. Thirty pupils proceeded for the Special Upper Primary Examination, of whom 20 passed, 11 being placed in the first class.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Normal schools, fourth division.

175. The normal schools in the fourth division are exhibited in the following statement :—

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1882.			Special Upper Primary Examination, 1883.		
			Examined.	Passed.		Examined.	Passed.	
	1883.	1884.		First class.	Second class.		First class.	Second class.
Villupuram (late Cuddalore) Local Fund normal school.	30	25	38	23	8	25	11	5
Tirukoilúr do. do. ...	30	29	11	3	5	24	15	3
Árni do. do. ...	30	28	31	19	1	24	16	3
Palmanér (late Chittoor) Local Fund normal school	24	17	22	13	4	24	14	4
Salem Local Fund normal school ...	34	33	28	15	5	28	11	3
Hosúr (late Krishnagiri) Local Fund normal school	30	26	31	22	2	27	13	1
Chittoor American Mission normal school	...	17	...	...	...	12	6	...
Total ...	178	175	161	95	25	164	86	19

Though 1 normal school—the American Mission normal school at Chittoor—was added to the list of schools in the division, the number of normal pupils has diminished by 3 and every school has fallen in numbers. The entrances for the Special Upper Primary Examination have increased, but fewer pupils passed than in the preceding year.

The Local Fund normal schools at Cuddalore, Chittoor and Krishnagiri were removed to Villupuram, Palmanér and Hosúr respectively for the benefit of the teachers of the outlying taluks. The Villupuram school passed only two-thirds of its pupils, and the Salem and Hosúr Local Fund schools and the Chittoor American Mission school one-half of their pupils, while the remaining 3 schools passed not less than three-fourths of their pupils in the Special Upper Primary Examination. In 1882-83 no institution passed less than two-thirds of its candidates.

Normal schools, fifth division.

176. From the list of normal schools in the fifth division appended to this paragraph, it will be observed that the number of pupils fell as in the fourth division, and that, while the number of candidates for the Special Upper Primary Examination rose, the proportion of passes fell considerably.

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1882.			Special Upper Primary Examination, 1883.		
			Examined.	Passed.		Examined.	Passed.	
	1883.	1884.		First class.	Second class.		First class.	Second class.
Tanjore Local Fund normal school ...	34	34	31	27	2	30	17	5
Madura do. do. ...	17	18	...	...	...	18	10	1
Dindigul C.V.E.S. Training Institution	50	40	20	18	...	24	10	4
Palamcottah C.M.S. Training Institution	75	73	44	23	11	34	12	6
Total ...	176	165	95	68	13	106	49	16

The Tanjore Local Fund normal school remained stationary as regards attendance, but in the Special Upper Primary Examination 22 pupils passed out of 30 sent up against 29 out of 31 candidates in the previous year.

The Madura normal school improved in attendance. Of the 18 pupils sent

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

up for the Special Upper Primary Examination for the first time in December last, 11 were successful, 10 being placed in the first class.

The strength of both the aided normal schools in the division—the Dindigul Christian Vernacular Education Society's Training Institution and the Palamcottah Church Missionary Society's Training Institution—fell. The number and proportion of passes also show decline.

One more normal school at least is required for each of the districts in the division. Sanction has been accorded to the establishment of a Local Fund normal school at Tiruválúr and another at Dindigul. Tinnevelly is in great need of an institution of the kind, but the Board consider it unnecessary on financial grounds.

Normal schools, sixth division.

177. No change took place in the number of normal schools in the sixth division. The attendance of 3 of the 6 normal schools rose, while that of the others fell, resulting, on the whole, in a net decrease of 6 pupils. For the Special Upper Primary Examination 135 pupils went up as in the preceding year, but only 70 passed against 97 in 1882.

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1882.			Special Upper Primary Examination, 1883.		
			Examined.	Passed.		Examined.	Passed.	
	1883.	1884.		First class.	Second class.		First class.	Second class.
Tellicherry Government normal school.	34	46	34	19	10	31	18	7
Pálghat do. do. ..	40	26	25	6	7	36	1	6
Calicut Local Fund normal school ...	19	20	13	6	4	15	9	1
Ponáni do. do. ...	27	22	10	7	3	9	3	4
Coimbatore do. do. ...	23	26	22	16	2	20	9	1
Kulitalai do. do. ...	29	26	31	9	8	24	10	1
Total ...	172	166	135	63	34	135	50	20

The Tellicherry normal school improved in numbers and passed a good number of examinees, but the Pálghat normal school declined in strength and passed but one-fifth of its pupils in the Special Upper Primary Examination, a disgraceful result. The school will be closed at the end of this year. The Calicut school improved in attendance and passed two-thirds of its pupils. The Mappila normal school passed a satisfactory proportion of pupils, though the strength declined slightly.

The Coimbatore and Kulitalai normal schools did not do as well as in the preceding year.

Normal schools, seventh division.

178. The figures relating to the only normal school in the seventh division, that at Mangalore, are given below. The attendance fell by a fourth. For the Special Upper Primary Examination 11 candidates were sent up, of whom 8 were successful against 10 out of 12 in the previous year:—

Normal school.	Number on rolls on 31st March		Special Upper Primary Examination, 1882.			Special Upper Primary Examination, 1883.		
			Examined.	Passed.		Examined.	Passed.	
	1883.	1884.		First class.	Second class.		First class.	Second class.
Mangalore Local Fund normal school.	24	18	12	4	6	11	5	3

General remarks on normal schools for masters.

179. From the returns furnished this year by the Inspectors of Schools, it is gathered that the total number of teachers employed in the elementary schools for boys (public and private) of the Presidency on the 31st March last was 16,497, and that 1,023 or

6 per cent. of these men, though they held general education certificates, were untrained, while no less than 13,609 or 82 per cent. of the number were unpassed men. Information is furnished in the margin regarding the number of untrained and unpassed men in each division. The divisions in which the proportion of uncertificated masters is high are the second, third, and sixth divisions. If the country is ever to be provided with an adequate supply of efficient elementary teachers, it is absolutely essential not only that the number of permanent elementary normal schools should be increased, but also that temporary special normal schools should be established to train all young teachers who are capable of being trained. These teachers should be selected and sent in turn to the nearest normal school, and if after due warning and due consideration of the circumstances of each case aid be refused to schools taught by men refusing to be trained, it will sooner or later have the desired effect. Pressure of this nature will not only create a class of qualified and professional village teachers, but the existence of such a class of men will give permanence to village schools, many of which are still of an ephemeral character.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

—	Number of teachers holding normal and ordinary certificates.	Teachers holding general education certificates, but untrained.	Unpassed teachers.	Percentage of unpassed to total teachers.
First division ...	454	285	2,341	71

Total ...	1,865	1,023	13,609	82

Regarding paucity of trained teachers in secondary schools Mr. Garthwaite remarks :—

It is startling to find that, after so many years' existence of more than one secondary normal school, secondary schools have so puny a proportion of trained teachers, and that even teachers with ordinary certificates are comparatively few, the men with "general education test" qualifications only, that is, men who have *not* passed a professional examination, far outnumbering those who have, while the wholly unpassed men form 19 (high schools) and 31 (middle schools) per cent. of the total number of secondary teachers. In primary schools the unpassed men form nearly the whole of the body of teachers, there being only 11 per cent. of passed men, consisting of trained and untrained in nearly equal proportions. These figures show a state of things that urgently calls for increased endeavours in the direction of normal school training. Funds now employed in keeping under inspection worthless schools—worthless because unimproved and unimprovable—and in providing Inspecting Schoolmasters to attempt to improve them, an attempt in which they never are successful, would, if devoted to a temporary increase in the number of normal schools, soon remedy the lamentable state of things shown in the above statistics regarding primary schools. The statistics regarding secondary schools show that more provision is required for secondary normal training also, I mean for training teachers for secondary schools. The managers of such schools repeatedly apply to me and to the Principal of the Government normal school for trained graduates and under-graduates, but there is no supply forthcoming to meet that demand. The advertisement columns of the newspapers even are sufficient to show that the demand for trained men for secondary schools is beginning to be greater than the supply.

On the subject of the class of men from which elementary normal schools are recruited, the same officer observes :—

My first inquiries into the working of the elementary normal schools in this division led me to the conclusion that in general they were not training the class of men whom it was most desirable to train, viz., long standing masters of existing indigenous schools actually registered for result grant examination. There is, of course, a difficulty in getting a man of that class to leave his village and to go to a strange place and rough it for a year on a bare subsistence allowance, leaving his school perhaps to go to pieces, and maintaining his family on credit. In fact, I think this difficulty has not perhaps been sufficiently considered in fixing the normal scholars' stipends at the present very low rates. Still the difficulty should be grappled with and not passively succumbed to pending its removal. To admit into the normal school not merely youths who were learners in the indigenous schools, but youths that had no connection with any indigenous school, and no idea of where, when their training was over, they would start a school—or to fill the school with assistant masters from Local Fund or Municipal primary schools—did not seem to me the right way of getting the indigenous schools under trained masters. In fact, it worked the other way; when these young men set up a school, it was never in conjunction with the indigenous schoolmaster, who knew nothing of him, but rather in

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

opposition. The parents, as usual, prefer their old friend's school to that of this new-comer. The new-comer, finding his school not paying him, closes it, and, after applying in vain for an educational appointment, naturally claims permission to try to get a living in some other department and is thus lost to that of education—in which case, of course, the money and labor spent in training him are thrown away, as far as concerns any direct benefit to this department. All this arose from there being no easy systematic check regularly in operation to test the nominations to scholarships in primary normal schools.

A gradual improvement is taking place in the selection of pupils, as grants from Provincial funds are generally refused to normal students who are not teachers or relatives of teachers, and who have no school to revert to on the completion of their training. The aiding of Local Fund normal institutions as well as other institutions is having a salutary effect, affording the teachers concerned the same stimulus to exertion as in aided private schools, whilst the managers are directly interested in carrying out the ideas of Government instead of moving on their own, often untried, lines.

(e.)—*Normal Schools for Mistresses.*

Number and strength of normal schools for mistresses.

180. In the last report it was anticipated that the number of normal schools for mistresses would double before the close of 1883-84. The anticipation was fully realized, though the proposal of the Coimbatore Board to open a female normal school was abandoned by them on financial grounds. Sanction has, however, been accorded during the current year for the establishment of a provincial female normal school at Coimbatore. The particulars of the 8 female normal schools or classes working at the close of the year are given in the statement appended.

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1882.			Special Upper Primary Examination, 1883.

Total ...	197	263	44	34	6	79	29	15

The number of pupils under training rose from 197 to 263, or by 66, 54 of whom belonged to the new schools. The number of examinees for, and passes in, the Special Upper Primary Examination increased proportionately.

Chicacole normal class.

181. A small female normal class was opened in 1883 experimentally in connection with the Government girls' school, Chicacole, and 8 scholarships of the value of Rs. 5 each were sanctioned by Government for the purpose. Four pupils were studying in the school at the close of the year.

Government female normal school.

182. The school was removed to Egmore towards the close of the year and a revised scale of establishment was sanctioned, based on the suggestions of the superintendent, Miss Carr. Mrs. Brander, who inspected the institution in December last, reported as follows :—

It will be seen that there were 24 normal students, divided thus: 5 Europeans and Eurasians, 11 Native Christians, and 8 Hindus. Of these, 11 had been presented for examination in method and school-management, and gave lessons, read, and performed black-board exercises before me in order to obtain their normal certificates. Seven of these had finished their training and will now pass out of the school; the other 4 will, unless urgently required as teachers, remain and qualify as first-grade mistresses. I was exceedingly pleased with the

eleven lessons given before me. Each had been carefully prepared, as the "notes" which each student gave me before she began her lesson proved. I beg to forward eight of these "notes of lessons" to show how well each was thought out and planned. These good plans were on the whole well carried out. In a few cases the teachers told what they should have educed, failed to keep accurately to the plan laid down in their notes, and exceeded the twenty minutes allowed for the lesson; but, generally speaking, the lessons were superior to any I have yet seen given in this country. Careful explanations were given in simple language, the children were questioned in such a manner as to lead them to think, the illustrations were sufficient and suitable, and in every case the lesson was interesting. The last, that on the silk-worm, formed the basis of a criticism lesson. During the lesson the normal pupils wrote their criticisms under certain heads. After the lesson was finished, the superintendent called upon them to read their opinions on the information, language, manner of the teacher, discipline, &c. The chief good points and defects of the lesson were carefully noted, and the superintendent pointed out how it might have been improved. The criticism was of a kind that should be very valuable to the students. Hard-and-fast rules were avoided; they were led to discuss the lesson intelligently and to give definite instances of the good points and defects mentioned.

The reading was very careful, distinct and audible, and most of the pupils read with expression.

The black-board exercises were very good, some of the maps and copies being excellent. A great deal of care and attention must have been bestowed on these very important exercises. The value of this was shown in the lessons, where the black-board was generally excellently used.

The recommendations for normal certificates will be made as soon as the marks for school-management are known.

Of the 13 normal pupils who did not teach at the inspection, 1 has left to become a home education teacher, 1 appeared at the Higher Examination and 5 at the Special Upper Primary Examination in December 1883, 1 will appear at the Middle School next year, 1 passed and 1 failed at the Upper and 1 passed and 1 failed at the Lower Primary Examinations in December. The last 4 are Hindu widows, who knew scarcely anything when they entered the school in 1882 and 1883. The superintendent hopes to be able to prepare them to be teachers for infant classes.

The superintendent writes:—"Of the 5 European and Eurasian normal pupils who have left during the present year 3 are at present engaged as teachers, 1 has been obliged to resign her appointment on account of ill-health, and the fifth is married. Four Native Christian students have obtained appointments, 2 as teachers in schools, 1 as a zenana teacher, and 1 as a home education teacher for the National Indian Association. Two Hindu students have also obtained employment, 1 at the central school of the Maharajah of Vizianagrum and 1 as a home education teacher.

"I regret to inform you that during my absence on other duty from 18th July to 18th October 1883, some branches of the work were neglected. The needle-work, especially of the Hindu pupils, had deteriorated considerably. The notes of lessons were, in many instances, marked, but not corrected, and no model lesson had been given."

The order and discipline and general arrangements of the school were excellent.

Calicut female normal school.

183. The female normal school established at Calicut and maintained from the proceeds of the Moyan endowment together with a grant from Provincial funds, contained 27 pupils. It sent up 4 candidates for the last Special Upper Primary Examination, 3 of whom passed, 2 being placed in the first class.

Madras Christian female normal school.

184. The Christian female normal school maintained by the Free Church of Scotland Mission sent up a larger number of candidates for the Special Upper Primary Examination, but passed a smaller number. In the Higher Examination for Women and the Middle School Examination it passed 3 and 7 pupils out of 7 and 11 candidates respectively sent up. In attendance it declined considerably.

Trichinopoly S.P.G. female normal school.

185. The attendance of this institution has risen by 50 per cent., and there is every prospect of further improvement in strength in consequence of the inducement offered by the department in the shape of additional scholarships. In the last Special Upper Primary Examination, however, the school acquitted itself unsatisfactorily, only 5 candidates having succeeded out of 17 examinees. But in the Middle School Examination it passed 10 pupils out of 11 examinees, a highly creditable result.

Palamcottah Sarah Tucker Female Training Institution.

186. This institution, than which few are doing better work in the country, had progressed considerably, and in the Special Upper Primary and Middle School Examinations 75 per cent. of the candidates were successful.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Cuddalore Roman Catholic normal school.

187. The Superior of the St. Joseph's College, Cuddalore, established a normal class in the beginning of the year to train Roman Catholic caste and other caste girls as teachers, and the school has been recognized by the department as a female normal school and a few scholarship grants have been sanctioned. Eight pupils were under training at the close of the year.

Vizianagrum Grant Duff female normal class.

188. This normal class, which was attached to the Maharajah of Vizianagrum's boarding girls' school, continues to work and had an attendance of 15 pupils on the 31st March last. But until there is a decided change in opinion in the Northern Circars as to the employment of women as teachers, the school has no definite object before it, because the teachers, when trained, have nothing to look forward to.

General remarks on female normal schools.

189. There has been a marked development of normal schools for mistresses, which is full of encouragement to the friends of female education, a development which is keeping and will keep pace, I trust, with the growing demand for the instruction of young girls. The schools are generally well managed, and in this respect, I think, superior to not a few of the elementary schools for masters. It is not a little remarkable that whilst there are still persons and even bodies interested in the education of the people who either disparage or ignore the usefulness of training schools for masters, I am not aware of any person entitled to hold an opinion on the subject, who does not freely admit the usefulness, or rather the absolute necessity, of training schools for mistresses. With this support, I think the time is not very far distant when every district will possess a normal school for training elementary mistresses.

(*f.*)—*Industrial Schools.*

School of Ordnance Artificers.

190. The following extracts are taken from the annual report of the Superintendent of the Gun Carriage Factory :—

There were 72 students on the rolls of the school on the 31st March 1884.

2 men were enlisted as Ordnance artificers, 2 others rejoined head-quarters from out-station arsenals, while 9 lads were entertained as pupils in the pupil establishment of the company, thereby making a total of 13 admissions. The withdrawals during the year have been 11, 5 being posted to do duty at out-station arsenals, 1 transferred to the pension establishment, 4 discharged, and 1 deserted.

As there have been no openings to enable any of the men being placed in a more favorable position, no transfers were made during the year under review.

The mode of instruction remains unaltered, while every endeavour is put forth to so train the men that, from the practical knowledge they acquire of the trades learnt, together with instruction in principles of steam, the steam engine and machinery, they may be fitted to do justice to positions of trust in the service of Government should they be called to occupy such. It may not be out of place to mention that one of the men, a foreman alluded to in the last report as being transferred to the pension establishment, was shortly after employed by a local firm in Madras on a salary of Rs. 150 per mensem, which serves as an evident proof of the benefits accruing from the instruction he had received during his effective service in the factory's school.

Industrial school, Black Town.

191. The attendance, which fell to 40 in 1883, rose to 54 at the close of 1883-84, but the figure was still less than that of March 1882. The following extracts from my review of the annual report for the year show the working of the institution :—

The establishment of the school consists of 1 superintendent, 1 clerk, 1 schoolmaster, 2 instructors in carpentry, 2 in book-binding, 1 in shoe-making, 1 in black-smithing, and 3 in rattan work.

There is a slight falling off in the attendance of the school, the number on the rolls being 52 against 58 in the preceding year. All are Eurasians, 4 of them being children of traders and 14 of artizans, while the remaining 34 are shown under "others." The number being large, it should be specified who these "others" are. There are six classes, three of the highest classes corresponding with the first three standards. In the second class, out of an attendance of 17 pupils, only 12 were present at the time of inspection, and in the third class only 5 out of 9. The absence of so many should have been explained.

At the Inspector's examination all the boys answered very satisfactorily.

Industrial.—Of the 52 boys, 10 are learning book-binding, 11 shoe-making, 10 carpentry, 10 rattan work, and the remaining 11 blacksmith's work including carriage work. Besides the above, the boys are taught painting, varnishing and tailoring. Mr. Garthwaite suggests that they should be taught to cook their food also, and his suggestion is endorsed. In addition to the instructors, 6 extra men work with the boys—5 in shoe-making, 2 in carpentry, 1 in book-binding and 2 in rattaning. The number of assistants in the shoe-making branch seems excessive. The work turned out in book-binding and rattan work is good, and in carpentry and shoe-making fair. The instructor in blacksmith's work does not know farriery, and Mr. Garthwaite very properly recommends the entertainment of a farrier as instructor in that branch, which is, in his opinion, likely to be more useful to the lads in after life. It is reported that the school is not at all well provided with the plant required for the various industries taught in it, and the articles which seem to be most urgently needed are given under each branch. Steps should be taken to meet requirements as soon as possible. The Director is prepared to advise the Government to aid.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Mr. Garthwaite recommends that a small library should be formed and instruction in music and drill introduced, and it is earnestly hoped that his suggestion will, if practicable, be complied with.

Of the 33 boys that left the school during the year, 18 found employment as artizans, 5 were removed by their parents, 2 were admitted into the Roman Catholic Orphanage, 1 went to sea, 1 proceeded up-country, 1 left for the Wynaad gold fields, 1 absconded, 1 was drowned, and only 3 are unaccounted for. It is not stated how many times the committee of management met during the year, and if any steps were taken by them to introduce a labor test under the inspection of professional men as suggested by the Director in his review of last year.

Ramnad industrial school.

192. The institution has improved in attendance from 10 to 18. Its progress, however, was not satisfactory. There were only 2 pupils present when the Inspector visited it.

Industrial school, Nazareth.

193. There has been a slight fall in attendance, but the progress made is reported to be satisfactory. Prizes were secured by the school for white lace at the Needle-work Exhibition held in Madras, and specimens were sent to the Calcutta Exhibition. More than 50 per cent. of the expenditure on the school last year was met from the sale-proceeds of work, which is very encouraging.

(*g.*)—*School of Agriculture.*

School of Agriculture, Saidápet.

194. The following extracts from my proceedings reviewing the annual report on the school for 1883-84 show the working of this institution.

The report embraces the 15 months ending 30th June last, but the financial portion refers only to the ordinary official year. At the beginning of the 15 months there were 60 students, 34 were subsequently admitted, and 7 having completed their training and left, the number on 30th June was 87. All classes of the population are represented, Brahmans forming the majority. Thirteen students only do not receive stipends. Of the stipendiaries, 29 are nominees of Collectors, whilst 21 have been sent by Native States and Local Boards. The institution is taken advantage of by the Cattle Disease Inspector's department and a few schoolmasters. The 7 students who left at the end of the summer session, 1883, obtained certificates, 6 of the first class and 1 of the second. This was creditable. Of the students at the end of the summer session, 1884, 15 gained first-class and 4 second-class certificates. Here also there was no failure, but in a later statement the certificates appear as 14 and 4 respectively. The statements given by Mr. Robertson on this occasion are very interesting. Not only is the nationality or caste of each student given, but the connexion of his parents with the land has been stated as far as possible; and it is very gratifying to see, from the point of view of the institution, that the cases in which land is not held are very few indeed. The statements give in addition the age and educational attainments of the students on entrance and the position of their parents. No student is above 26 or under 15½ years of age. The highest examination passed is that for the F.A. and the lowest that for the fifth-grade teacher's certificate. Some few students have not passed any examination. The position of parents presents much variety. The class marks as usual are high, but, as observed in former reviews, it would be more satisfactory if the students were examined by an independent body; but arrangements for such an examination, however, had to be deferred pending the reorganization of the school.

In 61 cases the subsequent career of the students has been traced. Since the establishment of the school the total number of students that have passed is 81. With about 9 exceptions they are connected directly or indirectly with agriculture, and the emoluments drawn are mostly good. The passed students seem to be in request, and at present two applications from Hyderabad and the Central Provinces are awaiting compliance. The increased applicants for admission this session and the higher educational standard of many of the candidates, although

SCHOLARSHIPS.

at present there is no assured prospect of employment, indicate unmistakably that the public are beginning to regard the school as an avenue to remunerative employment.

Mr. Benson lectured on agriculture and reports that in the lecture-room and out-classes the general conduct and attention of most of the students was very satisfactory. The work in the farm classes necessarily to a great extent supplemented the work done in the lecture-room. Mr. Benson considers that the size of the classes is far too great for out-door work. Mr. Benson's suggestion regarding the formation of a collection of native and other implements for use in the lecture-room is a good one and should gradually be given effect to.

Mr. Benson also lectured on physical geography, and geology, and observes that the students made fair progress, but that he found it difficult to make them grasp the numerous facts referred to in so short a time.

Mr. Mills, who lectured on veterinary, speaks in very high terms of the conduct and progress of the students. The Muhammadan students are, it appears, the most backward and the most difficult to teach, their educational capacities being far below those of the other students. This represents the generally unfortunate state of things with the community, but it is nevertheless gratifying to note that the Muhammadan students are far from wanting in power of application.

Mr. Mills lectured on veterinary and again speaks in very high terms of the students. He says:—"They without exception have done exceedingly well and have given me every assistance at the hospital and always have shown an eagerness to gain an insight into the practical part of their profession." Mr. Mills adds that "In teaching physiology some difficulty is felt in the want of a really good microscope. Steps should at once be taken to supply the want. A complete set of all the known patterns of horse-shoes had been added to the college museum together with other specimens for teaching purposes.

Mr. G. Krishna Prabhu gave instruction in hydrostatics and accounts to Class III and official correspondence. To Class II he taught book-keeping and mechanics. To Class I he taught arithmetic and physiography. The students are reported to have done well.

The reports of the lecturers and teachers show that the education of the students has been generally well attended to so far as the means at disposal admit, and that the students have in most cases profited by the instruction so far as their general educational qualifications admitted.

The library received an addition of 250 volumes in addition to a considerable number of pamphlets, reports and periodicals. The books taken out by the students were large in number, and they also used the library as a reading-room. Agriculture and horticulture seem to have most attraction, and next comes chemistry.

The veterinary hospital proved very useful.

The chemical laboratory was maintained in good order and additions were made to its equipment. Practical classes were held much more frequently than in previous years, especially for the senior class. The sudden death of the chemical lecturer prevented a report being submitted on the conduct and progress of his students.

The botanical gardens have been permanently attached to the college and are in good order and have been added to. Several small additions were made to the museum, and a valuable collection of grains and pulses was presented by Mr. N. H. Putuck, a late student, and now Superintendent of Agriculture in the Holkar State, Indore.

VII.—SCHOLARSHIPS.

Government scholarships on the results of the University examinations.

195. All the Government scholarships awardable on the results of the University examinations were taken up during the year. In the last report I pointed out how small was the outlay in this Presidency on this means of encouraging education compared with that in Bengal, and in my letter No. O-166, dated 17th May 1884, when commenting on the recommendations of the Education Commission, I stated my views at some length on the principles which should guide any change in the system prevalent in Madras. In paragraph 4 of their letter dated 22nd August last the Government expressed their readiness to consider proposals for a large and complete scheme of scholarships, and the matter will be taken up when final orders are received. I would, however, remark that the more liberal provision for free education in the colleges and upper secondary departments made in the new Fee notification has placed it in the power of managers and heads of schools to help forward promising lads who are too poor to pay for such education. The rule of award in Government institutions is marked ability coupled with good conduct.

Scholarships in girls' schools.

196. The number and amount of scholarships assignable under G.O., No. 243, dated 30th July 1881, to Government and other girls' schools have risen considerably, 52 girls having received scholarships during the year against 14 in the previous year. Moreover,

SCHOLARSHIPS.

the Local Fund Board, Godávari, following the lines laid down by the State, awarded scholarships to 4 girls in the Narsápur school, and the Nellore Municipality scholarships to 7 and 3 girls in the Nabobspet and Ranganayakspet schools respectively, while 3 girls in the Nidamangalam school received stipends from the chattram funds. It is very encouraging to find that the Local Boards are beginning to take an active interest in the progress of female education. It is to be noticed in this connection that the Vice-President of the Godávari Board, Mr. Power, spent Rs. 72 on scholarships in connection with the Narsápur girls' school besides the sum sanctioned from Local funds. Remarking on the scholarships established in Government girls' schools, Mrs. Brander writes :—

"The Government primary scholarships have proved of much value in inducing these elder girls to continue their studies, and if the system can be extended through grants-in-aid to all girls' schools, an impetus will, I think, be given to female education."

The question of extending to grant-in-aid schools the scholarship system in force in Government institutions will be considered along with the general revision of scholarship rules.

Expenditure on scholarships.

197. The annexed statement shows the expenditure incurred on scholarships from different sources, as far as the information can be compiled from the returns furnished to this office. It will be observed that the total expenditure on general colleges and schools was Rs. 11,388 against Rs. 12,908, on normal schools for masters Rs. 43,464 against Rs. 35,198, on normal schools for mistresses Rs. 17,411 against Rs. 7,998, and on special schools Rs. 2,335 against Rs. 2,408.

VIII.—EMPLOYMENT OF STUDENTS IN THE PUBLIC SERVICE.

General remarks.

198. Under this section of my last report I made reference to my views on the subject as embodied in the special report on European and Eurasian education. The Government had, as I mentioned, the question under their consideration, and quite recently they have directed me to submit my views in the form of a draft scheme as to the regulation of admissions to the public service. Since the close of the year the Government have notified that only graduates in arts and F. A. men will be admitted to the higher revenue test in future, men already in the service, however, of lower educational qualifications being permitted to appear for the test until 1889. Unquestionably the appreciation of men of education as employés has been rising in all branches of the service, and the conduct of graduates has justified the change of opinion in their favor. I must express a hope that the time will soon come when the leaders of commercial enterprise will learn to rate at their proper value men of University education, and employ such men in their offices instead of contenting themselves with people of comparatively low attainments.

Books.

IX.—BOOKS.

Registration of books.

199. The working of the office of the Registrar of Books not having been as satisfactory as could be wished, I suggested the following means of remedying the admitted defects:—

(*a*) Remunerating the Registrar by a salary of Rs. 150 monthly, the post having hitherto not been remunerated; the office to be non-pensionable.

(*b*) Granting the Registrar a fixed establishment of a clerk on Rs. 50, a muchi and a peon, in place of an office allowance of Rs. 65 to be expended at the Registrar's pleasure.

(*c*) The submission of the monthly contingent charges for audit to the Director of Public Instruction before payment.

The new arrangements have come into operation from the 1st April.

The following report has been submitted by the Registrar of Books on books registered in this Presidency during the year under report.

The number of works registered is 876 against 711 in the preceding year, and the following shows a comparison of the figures for the two years distributed under the heads of *Books* and *Periodicals*, this two-fold division having been prescribed by the Government of India for the annual analysis:—

—	1882-83.	1883-84.
Books, including pamphlets	670	817
Periodicals	41	59
Total ...	711	876

The publications may again be classified under three heads as shown in the margin. A comparison with last year's figures shows that there has been a marked increase, and 64 per cent. of this increase has fallen to the share of original works. There has, however, been a falling off under translations, while the small increase in the number of reprints may be taken as a slight recovery from the great depression in the previous year.

Original works ..	245
Translations	34
Republications ..	597
Total	876

The following abstract shows the number of publications received for registration from the different parts of the country during the year of report:—

Stations.	English.	Vernacular.	Total.
1. Madras	105	519	624
2. Mangalore	15	82	97
3. Tellicherry	...	61	61
4. Cochin	...	21	21
5. Palamcottah	2	19	21
6. Tranquebar	...	12	12
7. Trichinopoly	5	4	9
8. Coimbatore	...	7	7
9. Calicut	...	6	6
10. Nellore	1	4	5
11. Berhampore	...	4	4
12. Vizagapatam	...	4	4
13. Negapatam	2	1	3
14. Chicacole	...	1	1
15. Masulipatam	...	1	1
Total ...	130	746	876

The largest outturn of printing work in Madras is warranted by the experience of former years and the increasing number of native presses. Next in point of publishing activity come Mangalore and Tellicherry, while Calicut and Coimbatore show a falling off compared with the figures recorded in last year's report. The fluctuations in other localities are not considerable and call for no remark.

The result of a further classification of the registered works according to the languages in which they are printed is given below. Books.

Languages.	No. of works.
1. English	128
2. Do. and Tamil	20
3. Do. and Telugu	5
4. Do. and Malayalam	5

BOOKS. The undermentioned works in the several languages are perhaps worthy of notice :—

English.—Hints to the Amateur Gardeners of Southern India.
Ornamental Foliage Plants, Crotons, Palms and Cycads.
Cinerators and Sanitation, by Dr. J. Mills, V.S.
A History of India for Schools, by D. Sinclair, Esq.
A Brief Account of Saltpetre, its theory, origin, source of supply, by W. Kingston, Esq.
Jurisprudence with special reference to the Law of India, by R. B. Michell, Esq.
Digest containing the Acts constituting the Civil Courts of the Madras Presidency, by T. Weir, Esq.
A controversial pamphlet on the "Madras Bar and How to Improve It."
A Manual of Malabar Law, by a Sub-Judge of Calicut.
Plain Hints on Diseases of Cattle in India, by Dr. J. Mills, V.S.
Key to Professor Bock's Anatomical Models, by Dr. W. A. Lee.
The Indian Gold Mining Industry, its present condition and future prospects, &c., by D. E. W. Leighton.
A pamphlet against Kudikaval System.
The Fifth Report from the Select Committee on the Affairs of the East India Company in 2 volumes.
Chapters from the Report on the Indian Commission.
The Missionary Crusade against State Education in India.
A Hand-book of Logic for the use of F. A. Students.
Hill Ranges of Southern India, by John Shortt, Esq.
Shan Kshatrias Prachanda Martandam (Shanars not Kshatrias), English and Tamil.
Dictionarium Tamuluo-Latinum, Latin and Tamil.
A Select Collection of Moral Maxims and Proverbs, in English, Latin and French.
Grammaire Française Malialieme, in French and Malayalam.
Hand-book of Tamil Conversation in English and Tamil.
A Translation Guide in English and Tamil.
T. Sami's Annual for 1884 on Oils and Decoctions as used in Hindu Families.
A Catechism on Vaccination in English and Malayalam.
Review of M.R.Ry. R. Raghunadha Rao's Marriage Law and Reply to M.R.Ry. P. Ananda Charlu, English and Sanskrit.
English and Tamil Dialogues, together with forms of Letters, for the use of Schools.
English and Malayalam do. do. do.

Tamil.—Áradára Vilásam (serial publication).
Manuchola Chakravarti Charitrappa.
Household Stories for Young Readers.
Tutti Náma, a translation from Hindustani.
Hindu Désa Charitra Sára Sangraham.
The New Tamil Third Reader of the Madras Series.
Smiles' Self-help, published by the Madras Government.
A Table or an Ephemeris for 120 years from 1764 to 1884.
Jívaka Chintámani (Medicine).
An expurgated Edition of the Second Book of Kamban's Rámáyanam.
A Lecture on the Remarriage of Hindu Widows.
Tiru Pávai with Commentary (serial publication of a religious work).
A Catechism on Local Self-government.
Ayulvéda Sára Sangraham (Medicine).
Jálavinoda Tirettu (Legerdemain and Magic).

Telugu.—Remedial Measures to be adopted during the prevalence of Cholera, by Dr. S. Palni Ándi.
Vastuguna Dípika, a medical work on the good and bad qualities of Vegetable Food.
Simple Exercises in Telugu Translation.
Alankára Sára Sangraha, on ornate poetry and on a variety of similes and metaphors.

Malayalam.—A Manual of Malabar Law by a Sub-Judge of Calicut.
A Manual of Drill translated from the "Field and Rifle Exercise."

Hindustani.—Jama-ul-ashár, or selections in Hindustani Poetry for Schools.

Persian.—Char-Sharíf or Persian Grammar.

Sanskrit.—Málati Mádhava with Commentary.
Vikramorvasíya Nátakam with Commentary (Kalidasa's Play).
Sankalpa Suryodayam, a Philosophic Drama.
Srí Bhagavatgíta Bhashyam with Sankracharyar's comment.
Srímat Pánini Sútra Chandrika or Grammar.
Vidhavávivâha Khandanam, against Widow Marriage.
Apadudwâha Pundarika Marthanda, in defence of Widow Marriage.
Kanya Vivâha Swarúpa Nirúpana, in favor of Widow Marriage.

Books.

Védárta Sangraham with Commentary on Religious Philosophy.
Ashtakavarga with Commentary.
Sidhitrayam, on the Nature of the Human Soul and the Supreme Being and the Plan of Salvation.
Druvrutta Dhikruti, on Expiatory Ceremonies for those Brahmans who have taken a Sea-Voyage to Foreign Lands.
Vaidya Chintamani with Commentary (Medicine).

There has been a steady increase in the number of registrations of copyright, the number for the year of report being 119 (including 4 school books of the Educational Department) against 92 in 1882-83 and 84 in 1881-82.

During the official year under review, some clear cases of infringement of copyright of Government in its own publication by certain parties in Madras and in Native or Foreign States for sale in British territory, have come prominently to notice, and the question of instituting civil proceedings against such infringement has formed the subject of correspondence with the law officers of Government. A doubt has been raised, however, by the Advocate-General as to whether an action would be maintainable in a court of law; and he has also expressed an opinion that a distinct legislative enactment should be obtained to provide against the violation of Government copyright by printers and publishers in Native States. Accordingly the doubtful and defective state of the Indian Copyright Law has been brought to the notice of the Government of India, and the question of amending Act XX of 1847 is now under consideration.

Besides the above report, the Registrar has also submitted another report embodying the annual analysis of publications registered during the calendar year 1883, prepared in conformity with the instructions contained in the resolution of the Government of India dated 12th September 1882, No. 1-455. The following is my review of the above report:—

A glance at the totals given in the annexed statement, taken from the official reports, will show that the number of publications during the nine years ending 1881-82 has steadily increased, though somewhat more slowly than might have been expected considering the great advance which has unquestionably taken place in the same period in the number of persons able to read or under instruction. In one year only (1877-78) was the total of publications less than in 1873-74, and even in this year the number of English publications was greater. The low figures for 1877-78 may doubtless be attributed to the generally depressing effects of the great famine. It is further observed that while the average number of all publications during the above nine years was 772, the number for 1883 was 818, and that while the average number of works printed during the former period under the heads of original works, translations and republications was 160, 51·6, and 559·5 respectively, that for 1883 was 225, 37, and 556 as shown below:—

—	Original works.	Translations.	Republications.	Percentage of works. Educational.	Religious.	Miscellaneous.	Remarks.
1873-74	96	13	618	...	...	...	
1874-75	114	36	548	...	...	...	
1875-76	140	49	592	...	...	...	
1876-77	145	10	604	22	50	28

1878-79	203	52	567	23	48	29	
1879-80	167	116	538	20	70	10	
1880-81	209	56	633	20	80	...	
1881-82	168	83	548	20	70	10	
	* 160	* 51·6	* 559·5	† 20·7	† 61·3	† 18	* Average for 9 years. † Do. for 6 years.
Number for 1883	225	37	556	...	...	...	

BOOKS.

This indicates that the number of works under the first head for 1883 was much in advance of the average, while in that under the last the difference is inappreciable. As regards the diminished number of the remaining class (translations), it must be remembered that a book requires translation but once, any further demand being supplied by mere reprints. Seeing that there was considerable activity in this direction during the preceding five years, the number of versions being always greater than that for 1883, and sometimes double and treble the number, the lull for the year under report is not surprising.

It is also observed that more than 61 per cent. of all the publications were religious, while about 20 per cent. were educational. The educational works, though represented by about 20 per cent., have the widest circulation, most of them being counted by the thousand, and in one case (First Tamil Reader, Madras Government Series) even by a hundred thousand. In this connection it must be borne in mind that the demand for books, as shown by the number of publications, chiefly indicates the intensity of the desire for various kinds of reading. The intensity of desire for reading existing works can only be properly gauged when the number of copies of republications printed is ascertained as well as the number of republications. In many cases there is reason to think the fresh editions are very much larger than the older editions. In the next report the Registrar will give any information that may be available on this question.

As regards the publications under the heads of drama, epics, fiction, language, law and medicine, in English, Sanskrit and the vernaculars of the country, but chiefly in the last, there was ten years ago very nearly the same activity as now, judged by the number of publications. But the case is far different as regards language and miscellaneous works. The increase under the latter head is no doubt due to the increasing intelligence of the people and the interest displayed by them in the more important questions of the day, which do not fall strictly under either religion or politics. But as regards the former, and as regards science also, the increase is probably in a great measure due to the increase under school books, due not only to advance in the number of children under instruction, but also to the substitution of school books published in the Presidency for books imported from Europe. The old English Readers—all of which were published in Great Britain except the First and Second Lessons of the School Book Society—have been entirely superseded in all Government and most of the aided schools by works specially prepared and printed in this Presidency. Vernacular text-books, superior in language, matter, and plan, have taken the place of the old Readers in Tamil, and arrangements have been made to translate these into Telugu, Malayalam, and the other vernaculars of the country. The printing and publishing activity is now directed chiefly to supply the demand which has been greatly enhanced by the introduction of the new series. In order to meet this increased demand, most of the presses have made considerable extensions and improvements. But it is to be regretted that this publishing activity has induced the editing of keys, notes, analyses, compendiums, paraphrases and translations in connection with the several text-books in use, even the little manual of the District Geography and the Tamil First Reader having their explanatory notes and questions and answers. The tendency of these is to counteract the good that would otherwise follow from the use of the improved text-books.

The good effect of translation, in which considerable activity has been shown of late, as appears from the above table, cannot be too highly estimated. The vernacular versions of English works have, it would seem, roused the members of the Pandit class to come forward with translations from the Sanskrit. Thus, while Western knowledge and thought have been brought more within the reach of the masses, the vernaculars are at the same time being enriched. The translations from the Sanskrit in particular have, it is believed, done much to extend the vocabulary and give ease of expression to all the vernaculars.

Works on biography, though singularly rare in the vernaculars, show for 1883 a considerable advance on the average. The Registrar draws attention to the issue of a brief sketch of Froebel's life in Tamil. The publication of such a work in a vernacular is significant of a change in public feeling as regards the present system of elementary education in vernacular schools. This branch of literature, in which hitherto so little has been done, is capable of great extension to the great advantage of the public. If the subjects chosen are personages known to and honored by the reading classes, the demand for such works should be considerable.

While the study of classical and vernacular standard works of literature remains apparently the same now as it was some ten years ago, there appears to be, among the educated Hindus, a growing tendency to examine, discuss, and settle questions of Indian philosophy, religion and tradition. That the activity in this direction is slowly but surely advancing is manifest from some of the publications named in the analysis, viz., "Sankalpa Suryodaya," "Arádára Vilásam," "History and Philosophy of the Female Sex," "Tatva Muctaváli," pamphlets for and against the remarriage of Hindu widows and on "Expiatory ceremonies for Brahmans who have travelled by sea to foreign lands."

The growing interest in the education of women is evidenced by the issue of an edition of moral poems for the use of native girls, also by the work on the history of the female sex, which is, as remarked by the Registrar, "the first effort of its kind in Tamil."

The report of the Registrar of Books shows a steady advance in the number of books published, and so far, it is noted, as that officer is aware, no work of a seditious or unwholesome tendency was issued from the press during 1883-84.

Book Department.

200. In my report for 1882-83 I stated that the district depôts had been abolished on the 31st March 1883. At the close of the year under report the central depôt was abolished in accordance with G.O., Educational, No. 146, Miscellaneous, dated 22nd March 1884. The employés whose services were dispensed with in consequence of the abolition of the Central Book Depôt have been duly provided for, and Mr. Krishnamachariyar has since been given a pension of Rs. 4,000 a year besides the Registrarship with a salary of Rs. 150 per mensem, the appointment being non-pensionable. The following extracts from my letter submitting the report on the Book Depôt show the working of this agency during the year and the amount of stock handed over to the Madras School Book and Vernaculur Literature Society and the Basel Mission Book and Tract Depository. Since the submission of the report above referred to, the Accountant-General has reported that the balance of the Book Depôt Fund on the 31st March 1884 amounted to Rs. 30,293-12-3, and this has been adjusted to the credit of Provincial services.

The depôt having been abolished on the 1st April last, the present report is the last of its kind. The Curator premises his report by referring to the fact of the transactions of the depôt having been affected by the abolition of the district depôts and other incidental causes. In G.O., Educational, No. 317, of the 9th June 1884, the abolition of the central depôt and

Books. the transfer of the stock to the Madras School Book and Vernacular Literature Society and the Basel Mission Book and Tract Depository, Mangalore, was sanctioned. The result of the transfer and the important question of the supply of the demand for books outside the Presidency town will be carefully watched.

The value of the stock at the depôt stood at Rs. 1,35,909-6-1 on the 1st April 1883. Adding to this Rs. 46,771-10-9, the value of books printed and purchased during the year and the enhanced price of Hunter's History of India, the value of the depôt stock was raised to Rs. 1,82,681-0-10. Deducting from this sum Rs. 69,180-8-3, the value of the books sold at the central depôt, and by auction of obsolete and commercially valueless books, and the value of books used up by printers and consequently written off the accounts, as well as the loss incurred by the reduction of the price of certain books, maps, &c., by outright auction sale, the balance of stock on 31st March 1884 was Rs. 1,13,500-8-7. The reduction in stock was therefore Rs. 22,408-13-6 against Rs. 48,143-13-2. Of the balance of stock on 1st April last, viz., Rs. 1,13,500-8-7, books valued at Rs. 99,124-10-1 were transferred to the Madras School Book and Vernacular Literature Society, and the balance, consisting of the Malayalam and Canarese books, to the Basel Mission Depository, Mangalore. The former figure includes Rs. 9,893-9-9, the loss arising from the reduction in the price of books, and Rs. 8-12-0, being the value of books sold. The actual stock transferred to the School Book Society is therefore Rs. 89,222-4-4.

The number of books printed and published was 23 against 43 in 1882-83. The number of copies of these books struck off was 270,587 against 347,810; their value to the depôt Rs. 39,773-5-8 against Rs. 57,221-4-0. The prime cost was Rs. 23,854-1-3; the anticipated profit Rs. 15,850-1-9 or 66·4 per cent. against 74 per cent. in the previous year. Of the books printed, two were new—the Anglo-Telugu Second Book and the Anglo-Hindustani Fifth Reader.

As in the preceding year, the purchase of books and maps fell considerably, the number of copies purchased being 6,346, worth Rs. 1,998, against 34,472 worth Rs. 12,565. The falling off is satisfactorily accounted for by the Curator.

The supply of books through the agency of Messrs. Baker and Co. for the Government colleges and schools is reported to have been carried out successfully. The procuring of books through Messrs. Baker and Co. does not in any way appear to be an interference with local trade. That none of the local book-selling firms would compete for the agency of supplying books and periodicals to the several departments may be inferred from the papers recorded in G.O., Public, No. 1583 Mis., dated 15th July 1884. I purpose, therefore, continuing the practice of obtaining the books from the publishers at home through the agency of Messrs. Baker and Co., though the despatch of the Secretary of State, dated 24th January 1884, No. 1, paragraph 2, seems to require that books should be procured through local book-sellers.

The number of copies sold during the year was 373,724, and their value was Rs. 60,243, against 486,082 books worth Rs. 87,343 in 1882-83. Though the figures show a decrease, they are nearly identical with those of 1881-82, the issues of 1883-84 having been abnormally swollen by the issue of so many new school books. It is satisfactory to observe that there was a perceptible advance in the case of wholesale purchases in which 10 per cent. discount is allowed. The value of books thus sold was Rs. 45,068-6-2, or more than three times that realized during the preceding year.

Classified according to languages, the books sold showed an increase in the case of Telugu books, both in the number of copies and value, while the Tamil and Hindustani books show a decrease in the number of copies but an increase in their value. In the case of Malayalam books, the falling off was insignificant. In regard to the books in other languages, however, there was a decided falling off.

I am glad to observe that there was a satisfactory improvement in the case of sales to Local Fund Boards, there being a net increase of Rs. 2,422-3-5, or about 25 per cent. on the purchases for 1882-83. This result is noteworthy in view of the fact that the department had no district depôts to aid in vending its publications. The discount allowed was Rs. 839-11-9 against Rs. 495-13-9. No purchases were made by the Ganjam, Madura, Tanjore, Salem and South Canara Boards. The Local Fund Boards, Vizagapatam, Coimbatore and Chingleput, which were reported last year to have shown a perceptible decrease, have made large purchases. The Nellore Board, which made no purchase in 1882-83, made also large purchases during the year. The decrease in regard to purchase by Local Fund Boards, North and South Arcot, is probably due to the Boards having made large purchases during the preceding year. The decrease in the case of the other Boards does not appear to call for remark.

The statement of receipts and charges given by the Curator shows a balance in favor of the department of Rs. 6,454-11-2. The total receipts amounted to Rs. 1,73,108-15-6 while the total charges were Rs. 2,02,336-13-10, showing a difference of Rs. 29,227-14-4. Deducting this from the cash balance at the credit of the Book Depôt Fund in the books of the Accountant-General (Rs. 35,682-9-6), the balance was Rs. 6,454-11-2. The sum of Rs. 10,000 remaining to be refunded of the trading capital advanced by Government referred to in the concluding portion of G.O., Educational, No. 703, dated 19th October 1883, was paid during the year under report.

The following statement shows the percentage of charges distributed under certain heads. The decrease under the head of books and the increase under agency are satisfactorily explained by the Curator :— Books.

Heads.	Charges.			Per cent. to total cost.
	RS.	A.	P.	
Books	31,073	4	11	50
Agency	19,961	0	2	32
Cost of transit, &c.	946	13	9	2
Refund of permanent advance ...	10,000	0	0	16

The Curator concludes his report by bringing to notice the good services rendered by the late manager and accountant of his office and by the clerks. He also refers to the onerous and responsible duty performed by him for upwards of 16 years. The Government are well aware of the excellent service done by Mr. Krishnamachariar as Curator of Government Books. I am glad that by his good judgment and tact the affairs of the depôt were satisfactorily wound up.

New series of text-books.

201. The Anglo-Telugu Second Book and the Anglo-Hindustani Third Reader were published during the year. The Fourth Tamil Reader, Part I, by Mr. Krishnamachariar, has, during the current year, been completed and is being sold at the Madras School Book and Vernacular Literature Society's Depôt. It will probably be necessary before long to revise the edition of English Readers. Owing to the fact that they were prepared by different persons, they have not been graduated as satisfactorily as is desirable.

Revision of Malayalam and Canarese text-books.

202. As Mr. Garthwaite was acting in the Presidency division for the greater portion of the year, he was unable to make much progress in regard to the revision of Malayalam and Canarese text-books. I understand, however, that on his return to Calicut, which will take place shortly, a full report of the work of the committee will be submitted.

Library of Oriental Manuscripts.

203. The working of the library during the official year will be gathered from my review on the Curator's annual report.

Dr. Oppert returned from leave and took charge on the 31st December 1883.

The permanent, temporary and travelling establishments seem to have been actively employed during the year. A statement of the work done by them is given in obedience to the orders of Government. The proposals of Dr. Oppert, as contained in his paragraph 5, will be separately dealt with.

From paragraph 8 of the report, Dr. Oppert appears to have done useful work since his return, and it is gratifying to be able to note that the first volume of the "Lists of Sanskrit Manuscripts in the Private Libraries of Southern India" has been very favorably received by European scholars. The second volume is in active preparation. A copy of the Vaijayanti was sent to Dr. Bühler in accordance with the instructions of Government in paragraph 2 of their order on the report for 1882-83, and the work is stated to be highly valued by him. Two copies of the Bodháyana Sútra, also referred to in the same order, were furnished to Dr. Buhler. Dr. Oppert reports that he is also engaged in preparing the second volume of the Sukranítiśara, and he records the criticism on his editions of the Sukranítiśara and Nitiprakáśika by M. A. Barth, who is described as one of the first Sanskrit scholars of the day.

During the year, copyists were employed transcribing rare and useful manuscripts for the library. The number and names of manuscripts copied are not stated, but a detailed list is given of the 26 manuscripts collected by Mr. Seshagiri Sastri. Mr. Seshagiri Sastri catalogued lists containing the names of 6,800 manuscripts. He also bought a collection of 105 manuscripts, of which 44 are works which the library did not possess. During the last quarter of the official year Dr. Oppert collected lists of about 5,000 manuscripts. The complaint is still made that owners refuse to part with their manuscripts. Mr. Seshagiri Sastri is reported to have made good bargains in the Salem and North Arcot Districts, but the prices paid are not noted. Dr. Oppert himself is in treaty for the acquisition of a valuable library. Dr. Oppert has also been able to obtain some most important manuscripts on Hindu architecture, and he expresses his belief that the library is the only one in India or elsewhere which possesses complete copies of the extremely rare works named, a full description of which is given in the report. The library is indebted for the works to their owner, a lady, who allowed them to be copied ; to S. Vythianatha Sastri of the permanent staff, to Venkatasubbáśári, and the Tahsildar of Vellore.

During the year, the library had 643 visitors. Of these, 420 were readers and 102 copiers of manuscripts. The remaining 121 were mere visitors.

Books.

Three manuscripts sent through the Collector of Kurnool were transcribed and returned and certain ordinary manuscripts sent by the Tahsildars of Krishnagiri and Athúr Taluks were returned as not worth transcription. Dr. Oppert has addressed tahsildars generally, requesting them to send lists of books, so that he may select those the library needs. A list of printed books and publications presented to the library is given in paragraph 15 of the report, and an appendix is attached giving lists of important manuscripts purchased and transcribed.

No statement is given of the financial transactions of the year. This information should be embodied in all future reports.

Viewing the report as a whole, the Director considers the work done very creditable to Messrs. Oppert and Seshagiri Sastri, the latter having been in charge for three-fourths of the year. The work done has been considerable and the number of manuscripts added to the library numerous.

The Madras School Book and Vernacular Literature Society.

204. No report of the operations of the Society was published during the year under report; but the Society has been doing good work, and has been made the vending agency of Government for books, Malayalam and Canarese excepted. The conditions under which the Society took over the agency, are—

I. That either party be at liberty to terminate the agreement on giving six months' notice in writing.

II. That the Society agree to keep the stock separate from its own property, and to maintain such separate registers and accounts, &c., as may be prescribed by Government.

III. That the Society's accounts in connection with Government books be annually examined by the Accountant-General, and that the stock in hand be annually verified by an officer of the Educational Department as is now the case.

IV. That such annual and monthly accounts be rendered of stock received and sold and on hand, and progress of business, as may be prescribed by Government.

V. That books be sold at prices, wholesale or retail, fixed by the Director.

VI. That the Society enjoy the use of the godowns now occupied by the Curator, together with the furniture thereto belonging, rent-free.

VII. That all monies received on account of sale of books belonging to Government be paid as received to the credit of Government in the Bank of Madras.

VIII. That the Society be entitled to deduct 5 per cent. from all sale-proceeds, before paying the amount into the treasury, as commission to defray the cost of sale, extra establishment, and all other contingent charges.

IX. That the Society be responsible for the safe custody of the books and for all monies received by them in connexion with this business.

X. That the Society give timely notice of any books running out of stock.

The arrangement with the Basel Mission for the sale of Government books is as follows:—

(*a*). That they comply absolutely with the order of the Director in regard to the number of copies of each edition, size, type, paper, and all other particulars, and that no fresh edition be printed without obtaining such formal sanction. Reservation of Government rights to be set forth on the title page of each book;

(*b*). That, if required, all proofs shall be passed by the Director before printing;

(*c*). That the price of sale shall be that fixed by the Director, and that no alteration in that price be made without his express permission;

(*d*). That they render all such returns and accounts as may be required by the Director;

(*e*). That they undertake all risk for books in their custody and are responsible for loss and damage, and provide such reasonable security as the Government may demand;

(*f*). That they vend all books entrusted to them for publication and sale at their branch depôts and by colporteurs.

(*g*). That they print and sell at their own charge, on estimate approved by the Director, receiving as remuneration 20 per cent. of sale-proceeds, paying in monthly to Government the difference between the net cost of printing and binding the copies sold and the sale-proceeds *minus* 20 per cent.

(*h*). That in all matters of dispute they abide by the decision of the Director subject to appeal to Government; and

(*i*). Six months' notice may be given by either party of termination of agreement.

I have the honor to be,
Sir,
Your most obedient servant,

H. B. GRIGG,
Director of Public Instruction.

OFFICE OF DIRECTOR OF PUBLIC INSTRUCTION,
20th February 1885.

GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

READ—Report on Public Instruction in the Madras Presidency in 1883-84.

ORDER—dated 27th May 1885, No. 364, Educational.

The Governor in Council proceeds to review the report on Public Instruction for 1883-84. The report, though dated the 20th February 1885, did not reach the Government until the 27th March 1885, or almost twelve months after the close of the year to which it relates. The labour involved in the preparation of the necessary information is doubtless heavy; but it is of such importance that the Government should be able to review the educational work of the year as soon after its close as possible, that His Excellency hopes that every possible effort may be made to submit the report before the 10th of October (the prescribed date) in future years.

2. The number of schools and other educational institutions connected with the department on the 31st March 1884 was 16,139 compared with 17,494 in the previous year. Under the forms now in use, however, each institution is treated as a single school, without reference to the number of departments it may contain; this has not been the case hitherto, the separate departments of the same institution having been treated as separate schools. Treating the returns of 1882-83 in a manner similar to that in which the returns for the year under report are treated, the number of schools open on the 31st March 1884 shows a diminution of 451, compared with those open on the 31st March 1883. The number of Art Colleges increased by 1, the number of High schools by 19, the number of English-teaching Middle schools by 3, but the number of Primary schools for boys decreased by 460. Girls' schools show a satisfactory increase, for, though the primary schools for girls were 18 less in 1883-84 than in 1882-83, the upper and lower secondary schools showed an increase of 26 schools in all. The numbers of normal schools increased by 10, and professional and technical schools by 3. The total number of scholars in all schools rose from 446,324 to 447,786. The Director notices the operation of the revised grant-in-aid rules, under which a higher standard is required as a condition for aid than was previously the case. With reference to this it is observed that one great object in view in future should be the provision of trained teachers for primary and secondary schools. It is no doubt too often the case now that funds are wasted upon small schools under untrained indigenous schoolmasters, the result of whose labour must be almost unappreciable.

3. Four districts—Ganjam, Godávari, Salem and Tinnevelly—show a large fall both in the number of schools and pupils. It is noted that the ranges of the deputy inspectors in Ganjam and Tinnevelly are very heavy; but that funds have been provided for additional appointments in those districts, there is ground for hope therefore that the results of the current year will be more favorable. The marked increase both in the number of schools and scholars in South Canara is very satisfactory, and is, no doubt, due chiefly to the intelligent interest taken in education by the local board and also to the improvement in the inspecting agency, the district having been formed into a separate division, supervised by the educational officer in charge of Coorg.

4. The proportion of population to pupils ranged from 15 to 1 in Madras, to 124 to 1 in Vizagapatam, seven districts showed better results in this respect than in the previous year, five retained their position, while ten districts lost slightly. The general result shows that the proportion of male population to one male pupil was 38, and that of female population to one female pupil was 328.

5. With reference to female education the number of girls at school is still only 2 per cent. of the girls of school-going age, but the year shows a great advance in numbers compared with the previous year, the numbers having risen from 43,671 to 47,550 or 9 per cent. It may be noted that in the year 1870-71 the number of girls under instruction was only 10,185.

The advance in the standard of female education is shown by the improvement that has taken place in the attendance in female high schools, and in the results attained at public examinations. Ninety-four pupils were reading in the high departments of the high schools at the close of the year compared with 76 in 1882-83. The report of the Inspectress of Girls' Schools is encouraging; the teaching appears to be generally improving in almost all subjects. The number of middle schools for girls rose from 88 in 1882-83 to 114 in the year under report, and the attendance in the middle department of such schools from 623 to 873.

The Government primary schools numbered 15 compared with 19 at the close of 1882-83. The attendance, however, rose from 623 in March 1883 to 866 in March 1884. The number of Municipal and Local Fund girls' schools rose from 37 to 46, and the pupils from 1,610 to 1,758. The main increase in the number of girls under instruction has been of girls in boys' schools. The remarks of Mr. Monro upon this subject, so far as he expresses himself as unable to hope for any great progress in female education in the absence of a sufficient number of girls' schools, are more desponding than is justified by the results up to date. The objections to mixed schools are no doubt considerable, but the fact that so large a proportion of girls now undergoing instruction frequent mixed schools, viz., 19,492 girls out of a total of 47,550, shows that there is not such an aversion to this class of school among the native population as Mr. Monro seems to think. The Government agree with the Director in thinking that whenever the progress of education renders it practicable, separate schools for girls should be established.

Omitting the statistics regarding European and Eurasian female education, the returns show that of Native Christians 10,892 or 21·3 per cent. of the school-age population, of Muhammadans 1,939 or 1·3 per cent., of Brahmans 6·207 or 7·4 per cent., of Sudras 23·118 or 1·7 per cent., of other Hindus 2,215 or 0·3 per cent. are under instruction. It is satisfactory to note that female education among the Muhammadans shows marked progression; five years ago only 381 Muhammadan girls were shown as under education compared with 1,963, the number returned for the year under review.

6. The following remarks may be made upon the educational condition of each section of the population. As regards Europeans and Eurasians there was a slight advance in the number of pupils under instruction. It may be noted that the Government have recently approved of certain changes in the Grant-in-Aid Code, in view to afford substantial aid to schools for European and Eurasian children. The percentage of Native Christians under instruction to the population of school-going age fell from 58 to 52 under boys, but increased from 19 to 21 under girls. In the examination for B.A. degree and in First in Arts examination the population of Native Christians to the total number of passes has fallen, but in the Matriculation examination they head the list in the order of merit.

The Government observe the satisfactory educational progress among Muhammadans, the numbers now under instruction being 31,419 compared with 16,516, the figure of five years ago. Though the results of the University Examination were not favorable, the Muhammadans took the second place in the order of merit in the Matriculation examination.

The Director reports that seven new schools were at work in Madras at the close of the year under report, under trained pupils of the Muhammadan Normal school, he also quotes from a report of Mr. Monro showing that the number of Mapilla schools

in Malabar increased by 35 per cent. and the pupils by 52 per cent., while the number of Mapilla girls under instruction—1,014—nearly doubled during the year.

The returns furnished show for the first time the statistics relating to the education of Brahmans separately, the result being that 75 per cent. of boys and 7·4 per cent. of Brahman girls were at school at the close of the year. The returns in regard to the other classes of Hindus show comparative backwardness. With reference to Vaisyars and Sudras no doubt this is to be explained by the large proportion of them who are engaged in agriculture. It is observed that the Director has under his consideration special measures for extending education among Paraiyas. Progress in this direction must necessarily be slow.

The distinction of pupils according to the occupation of their parents shows that educational advantages are much neglected by the artisan classes, not one artisan boy in twelve receiving instruction. Mr. Garthwaite thinks the absence of this class from school is mainly due to the faulty system of teaching English and accounts followed in so many schools. His remarks quoted in a later portion of the report with regard to secondary education are in the same direction, and the Government are inclined to agree with him in thinking that one great object in the future should be the better organization of instruction. The Director and his staff seem to fully appreciate this.

The following table showing the numbers of pupils in all schools studying the various vernaculars, compared with the number of persons whose mother-tongue is one of these languages, is interesting :—

	Persons in thousands.	Pupils in thousands.	Percentage.
Tamil	12,091	216	1·8
Telugu	11,745	141	1·2
Malayalam	2,366	41	1·7
Canarese	1,296	11	·7
Hindustani	694	5	·7
Urya	1,020	14	1·3

It must be remembered that not one-sixth of the Muhammadan pupils in our schools read Hindustani.

The following table gives the number of schools and scholars in Municipalities and Local Fund Circles in the two years 1882-83 and 1883-84 :—

	1882-83.		1883-84.	
	Schools.	Pupils.	Schools.	Pupils.
Municipalities	1,812	102,166	1,785	105,801
Local Funds	14,778	344,158	14,351	341,985

School Fees.—There was an increase in the income derived from school fees of over 10 per cent. over the income of the previous year. This increase extended to all classes of institutions.

The following table compares the attendance and school fees of ten years ago with those of the year under report, it shows at a glance the stride which education has made in the past decade :—

—	Government schools : Attendance.	Fees.	Local Fund and Municipal schools.		Public schools under private management and private schools.		Total.	
			Attendance.	Fees.	Attendance.	Fees.	Attendance.	Fees.
		RS.		RS.		RS.		RS.
1874-75	10,075	1,13,378	19,292	22,072	225,770	5,37,150	255,737	6,72,600
1883-84	10,297	1,77,040	48,225	86,826	389,264	8,93,763	447,786	11,57,629

The Director reports that he has reason to believe that the fee revenue of the current year will approximate 13 lakhs. The recent enhancement of fees, which was sanctioned from 1st January 1884, will result, it may be hoped, on the one hand in an

increase of educational facilities, and on the other in rise in the pay and so in the social position of teachers. With regard to the latter consequence, the Government agree with Mr. Monro in thinking that the general raising of the status of the teacher will do almost as much as improved normal training to improve the quality of the teaching.

The percentage of fees to total expenditure for the year under report compared with that of the two former years is shown in the following table. A satisfactory rise occurred in the case of many colleges. Percentage of fees,

College.	1881-82.	1882-83.	1883-84.
Kumbakónam	33·85	46·00	47·4

In all the Government High Schools, Kurnool excepted, more than 50 per cent. of the charges is met from fees. For almost all the schools, both Government and aided, an increase occurred over the percentage of the previous year.

The Government notice that the amount expended in grants-in-aid to private institutions increased from Rs. 6,71,499 in 1882-83 to Rs. 6,75,279 in the year under report.

Various improvements were made in the Grant-in-Aid Code during the year.

The work done by the controlling officers of the department was generally good. The Government concur with the Director in hoping that in some of the larger and richer districts the local boards will see their way to appoint District Superintendents of Education, and thus relieve the deputy inspectors of their present administrative work, confining them to the inspection and examination of schools for grants on behalf of Government. Continued efforts should be made to improve the class of inspecting schoolmasters.

The results of the University Examinations were on the whole satisfactory. The number of graduates who obtain to the degree of Master of Arts is still lamentably few; it is much to be regretted that so few of those who take their Bachelor's degree in Arts appear to pursue their studies further, and that such a large proportion of the candidates for the degree of Bachelor of Arts failed in English. On the other hand, the increasing number of candidates who take up physical science, forms a satisfactory feature in the report. The number of candidates in this subject has risen from 18 in 1879-80 to 110 in the year under report. The percentage of passes for the degree of Bachelor of Arts fell from 54·3 to 47·6. The number of candidates for the First in Arts Examination increased from 783 in 1882-83 to 1,110 in the year under report. Figures are adduced to show that a larger proportion of the First in Arts candidates continued their studies for B.A. course than was the case in the previous year, which is satisfactory.

The report of the working of the different first-grade colleges shows that the Presidency College, Madras, maintained its reputation. It is noteworthy that only one-fourth of the pupils were Natives of the Madras and Chingleput districts, the remaining pupils coming to the college from up-country. The preference exhibited for the Metropolitan colleges generally is satisfactory as it is in these that the best general culture and the highest education can be imparted. The system of charging and collecting fees by the term which was introduced at the beginning of the year has worked with success.

The strength of Kumbakónam College fell in consequence of the greater resort of the pupils to the Presidency town. The results of the year gauged by success in

the public examinations were more satisfactory than those of the previous year. In the Rajahmundry College there was also a falling off in attendance. The college was not successful in the Matriculation Examination, but the success of the candidates in the B.A. Examination was very satisfactory. It is to be hoped that before long an effective scheme for agricultural education in this college will be introduced. The attention of the Director of Public Instruction should be given at an early date to this subject. The Madras Christian College worked with admirable results during the year. It is noted that the income from fees meets about 36 per cent. of the expenditure in the College department and as much as 76 per cent. of the expenditure in the School department. The number of pupils increased from 1,333 to 1,405, and the Director reports that the tutorial staff has been considerably strengthened by the establishment of four additional tutorships.

With regard to secondary education, there was an increase of about 14 per cent. in the number of candidates for the Matriculation Examination, while the number of passes rose by 6 per cent. only. The departmental schools did not do so well as in the previous year. There was, however, an improvement in the numbers of those who passed in English, which is satisfactory. There was an increase of 16 upper secondary [High] schools during the year. The strength, however, of upper secondary classes in these schools actually fell slightly, for various reasons, noted by the Director.

The number of English Middle schools fell from 505 to 494 and Vernacular schools from 136 to 99, but the attendance in these schools has in the English risen from 10,844 to 10,900 and in Vernacular fallen from 619 to 426. The number of Government schools has fallen, owing to the transfer of a number of schools to the charge of Municipal Councils.

The Board schools rose from 85 to 136.

The primary departments of colleges and of secondary schools for boys and girls as well as the primary schools proper were reckoned as primary schools in previous returns. In the returns now submitted, primary schools proper alone are counted primary schools. This change in the mode of return explains the apparent slight decrease in the number of primary schools and pupils attending them. The number of Local Fund primary schools has fallen from 1,042 to 973, and the attendance from 37,770 to 30,825. This reduction seems to have been due in a great measure to a more careful examination into the educational needs of the different districts, schools being withdrawn in places where good results schools already existed. The attendance in municipal schools rose from 4,453 to 4,662. The total number of aided and unaided elementary result schools was 8,279 and 4,837 compared with 9,830 and 5,993 in the previous year. It must be remembered that the primary departments of secondary schools are not now counted as separate institutions.

The popularity of night schools seems to be largely increasing in some districts. In Malabar there are as many as 55 of these institutions with 1,750 pupils. The students are reported to be most regular in their attendance.

There was, during the year, an increase of three Medical schools and six Normal schools for masters, and four Normal schools for mistresses. The three Provincial Medical schools at Nellore, Tanjore and Dindigul were brought under the department. The results of the Dindigul Medical schools appear to have been very satisfactory, nine students having obtained hospital assistant certificates.

The Normal schools are doing good work. Every effort should be made to get the schoolmasters of indigenous schools under training in the place of youths having no connection with any indigenous school. The conservative feeling of parents leads them to prefer the old school to the new, and the result is too often that the trained new comer finding teaching unprofitable seeks other employment and the trouble and money spent on his training is thus wasted. Good normal instruction to indigenous pial schoolmasters is a crying want in all districts.

The total expenditure upon education during the year was Rs. 39,54,205 compared with Rs. 37,50,799 in 1882-83. Rs. 10,75,823 were provided from Provincial funds, Rs. 6,31,076 from Local funds, and Rs. 1,24,042 from Municipal funds; Rs. 21,23,264 were provided from fees and other sources of revenue. The amount of

fees rose from Rs. 6,28,403 to Rs. 12,34,529. The expenditure was distributed in the following manner:—

	Rs.
Upon University education including Arts Colleges and Colleges for professional training	3,87,019
Upon secondary education	13,39,188
Upon primary education	13,23,558
Upon special education	2,91,892
Upon the University, Direction, Inspection, Scholarship and Miscellaneous	6,12,548

It must be remembered that the outlay on primary departments of High and Middle schools is included in the total outlay upon secondary education.

The total expenditure by Local Boards was distributed thus:—

Upon secondary education	8·5 per cent.
„ primary „	64·4 „
„ inspection	12·7 „
Miscellaneous	14·4 „

That from Municipal funds thus:—

Secondary education	31·7 per cent.
Primary education	58·6 „
Inspection	4·8 „
Miscellaneous	4·9 „

The Education Commission completed their inquiry and submitted their report during the year. The Government have since acted upon various recommendations in that report, and hope that all the recommendations made by the Commission and since approved by them will receive the careful attention of the Director of Public Instruction in working out the educational policy of the future.

The general features and results of the administration of 1883-84 were satisfactory.

(True Extract.)

E. F. WEBSTER,
Chief Secretary.
